RE: Cutting Edge Industrial Design, Inc's FCC ID: YHUGL2100

To Whom it May Concern:

Enclosed please find a request for a Class II Permissive Change from Cutting Edge Industrial Design, Inc. The manufacturer has placed the module into a Host and the power was reduced along with limited frequency requirements. No hardware changes were made to this modular approved device and remains electrically identical to the Certified unit.

Sincerely Yours,

Garry Vinje  
Cutting Edge Industrial Design, Inc.
