MV3000
User Manual

Thank you for purchasing a MV3000 Handset Mobile phone. We built our Handset to give user what we believe user really want from a wireless phone, clear sound, and fashion outlook.

Our advanced technology is designed to grow with user's communications needs so that one day you will be able to rely entirely on users Handset to stay connected.

This guide will familiarize user with our technology and new Handset phone through simple, easy to follow instructions.

This section provides the entire information user needs to quickly activate phone, and much more.

We congratulate on your choice.

1

Safety Information

Please read and understood the details which are both safe to you and your environment. Failure to observe these instructions may lead to suspension of cellular phone services to the user, or some legal action

Important information for parents:
Please read the operating instructions and safety precautions carefully before use. Explain the content and the hazards associated with using the phone to your children.

Emergency Calls (SOS)
Emergency call can be made from your cellular phone even without a SIM in the network service area.

Traffic Safety
Please do not use your cellular phone while driving; find a safe place to stop first.

Switch off in Hospital
The use of cellular phones may interfere with the functionality of some possible insufficiently protected medical devices in hospital.

Switch off in Airplane
The use of cellular phone in an aircraft may be dangerous to the operation of the aircraft, disrupt the cellular network and may be illegal.

Switch off in Gasoline Station and Explosive Site
It is advisable that users turn off cellular phone when refueling is in progress, users are reminded to observe restrictions on the use of radio equipment in fuel depots.

2

Operating Environment
Mobile radio transmitting equipment, including cellular phones, may be subject to interference and may cause danger. Switch off your phone whenever it is forbidden to use it.

Use Sensibly
Do not hold the phone to your ear when it rings or when you have switched on the hand free function. Otherwise you risk serious permanent damage to your hearing.

Appropriate Maintenance
Only qualified and authorized personnel should service your cellular phone. Faulty installation or repair may be hazardous.

Replace
You may only open the phone to replace the battery and SIM card. You must not open the battery under any circumstances. All other changes to this device are strictly prohibited and will invalidate the operating license.

Interference Noticed
The phone may cause interference in the vicinity of TV sets, radios and PCs.

Safety Warnings

Accessories
Use only accessories and charging devices approved by the phone manufacturer! Otherwise you risk serious damage to health and property. The battery could explode, for instance.

Power Voltage
The mains voltage specified on the power supply unit (Volt) must not be exceeded. Otherwise the charging device may be destroyed.

Waste Disposal
Dispose of worn out batteries and phone in accordance with local provisions!

Rechargeable Battery

- *If battery is over discharged the handset will need to pre-charge less than 10-20 minutes.*
- *Avoid accidental shorts across the contacts of battery by metal parts. Shorts can cause rapid discharge currents that can damage the battery, the part that creates the short or cause injuries.*
- *Prevent extreme low and high ambient temperatures for the battery. Therefore, do not place battery near a heater or on the car dashboard.*
- *Do not open, penetrate or otherwise physically damage the battery.*
- *Do not incinerate battery.*

FCC Regulations

- You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or

more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

- This device complies with Part 15 of the FCC Rules.Operation is subject to the following two conditions:
  1) this device may not cause harmful interference and
  2) this device must accept any interference received, including interference that may cause undesired operation of the device.

- FCC RF Radiation Exposure Statement:
  For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines."

  This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.This device is designed for habd-held operation only.This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter except those transmotters that are factory installed.

Warning:

- SAR Head Max value : 0.629 W/Kg(1g)
- Body Max value : 1.32 W/Kg(1g)

SIM Card and Battery Information

<u>Insert SIM Card</u>

The SIM card is inserted into the back of the phone underneath the battery.

- Press the knob and open the battery cover off.
- Remove the battery.

- Place the card inside the SIM cardholder such that the golden connectors are facing downwards.

<u>Insert Memory Card</u>

- Use only compatible T-Flash (Micro SD) card with this device. Other memory cards, such Secure digital (SD) cards, do not fit in the T-Flash (Micro SD) card slot and are not compatible with this device. Using an incompatible

10

memory card may damage the memory card as well as phone, and data stored on the incompatible card may be corrupted.
- The T-Flash (Micro SD) cardholder is the side of the phone.
- Place the T-Flash (Micro SD) card in the notch. Make sure that the T-Flash (Micro SD) card is properly inserted and that the golden contact area on the card is facing upwards.

Insert Battery
- Slide the battery into the cradle and press the battery down flat.
- Place the back cover and slide it into place.

Warning:

1. If the battery is totally empty, charging icon or LED is not on. There fore, you should charge the battery maximum up to 10-20 minutes.
2. If you turn off handset abnormally, please take out battery about 10 seconds then insert battery. Otherwise the battery will discharge and run out of power quickly.
Carga de la Batería

1. Conecte el cargador tal como se muestra en la ilustración. En la pantalla se indicará el proceso de carga de la batería durante algunos segundos si el teléfono está encendido y entonces regresará al estado anterior. (El teléfono puede utilizarse mientras se está cargando la batería).
   Si se apaga el teléfono la pantalla mostrará de forma permanente el proceso de carga de la batería.
2. Cuando finalice la carga, la pantalla tendrá el aspecto de la ilustración. Para quitar el cargador, mantenga presionados ambos extremos y acontinuación extráigalo.

<u>Calling</u>

Making and answering call

Before you can make or answer any calls, make sure that the phone is charged and your SIM card is inserted before you power on the phone.

Ensure that the phone is on, the network operator name is displayed and the signal strength meter shows network coverage is available in the current area.

To make a call

- Enter phone number include area code you want to dial. If you key in wrong character, press **Clean** key to delete it.

- Press [ ] to call the number.

- Press [ ] to end the call or to cancel the call attempt.

To make international call

- Press [key] key to input a + sign.
- Enter the country code, area code and phone number, and then press [key] to make a call.

To answer call

- To receive a call, the phone must be switched on and the signal strength meter must be displayed.
- Press [key] to answer a call.

Missed calls

- When an incoming call is not answered, the Missed call log is displayed on your screen. To display the Missed call entry.
- Select the entry to read call detail.

To use loudspeaker during a call

- Loudspeaker mode is uses handset as loudspeaker during a call. Do not hold the handset to your ear if loudspeaker mode on. To activate/deactivate the loudspeaker during a call, press "**H-free/H-held**", and the single will show on the screen.
- The loudspeaker is automatically deactivated when you end the call or call attempt or connect the headset to the phone.
- The loudspeaker is default setting for playing MP3, voice recorder, using the loudspeaker with MP3 player and Voice recorder, see detail on MP3 player and Voice recorder.

To call emergency

- Your phone supports the international emergency number, for example, 060, 112 or 911. This number can normally be used to make emergency calls in any country, with or without a SIM card inserted, if a GSM network is within range.
- You can place emergency calls "dial 060, 112 or 911 and press [key]" even if your phone is locked or your account is

23

restricted.

Tip of call options
A call can be connected to any single caller by pressing **Options**. When user presss "**Options**" during active call, user can choose one of those functions from the list:

♦ Hold single call: Put a call on.
♦ End single call: End a call.
♦ New call: Make a new call during an active call.
♦ Phonebook: Shortcut to phonebook menu.
♦ Messaging: Shortcut to Message menu.
♦ Sound recorder: Star recorder conversation.
♦ Mute: Mute the call during the conversation.
♦ DTMF: Set On / Off for DTMF (Dual Tone Multi-Frequency) tone dialing system.

Hold single call
Pressing "**Options**" and selecting **Hold single call** allows you to put an active call on hold. This feature can be used when an incoming call is received during an active call or if you want to make another without disconnecting the active call.

Make a new call during a call
You can dial a number during a call without disconnecting the active call.

● Press [   ] and selecting **Hold single call** to put an active call on hold and press **Options** select **New call** make a new call by keying new number.
● Press **Options** and select **Swap**, new number will go on hold, and old number will be active.
● Also, you can select record from phonebook, after select **New call**, press **Back** to option list and choose **Contacts**.

Multiparty call
● You can connect to several people together or individually at a time.
  1. Make a call to the first participant.

2. Call the second participant as explained in **Make a new call during a call**.
3. Press "**Options**" and select **Conference**. This joins the calls to the conference.
4. Repeat step 2 and 3 to allow new participants to be connected to the Conference.
5. Press **Options** and select **End all** to end the call. Or press ⬜.

- Any call (participant) can be disconnected by press **Options** key and select **End Single call**.

Switch two calls

- Press "**Options**". The first call is put on hold.
- To switch between two calls, press **Options** and choose **Swap.**
- To end the active call press ⬜.
(Or to end both calls at the same time. Press **Options**, and then move to **End single call** or **End all calls**. And press **OK**.)

Calls

The numbers of the last 150 (Each page of Missed calls / Dialed calls/ Received calls can save 50 calls) calls that you have made are saved in the call record list. If your subscription includes the Calling Line Identification service and the caller's number is identified, the call record list also shows the numbers of received and missed calls. Call records, Dialed calls, Received calls and Missed calls are list under separate tabs. User can press ▭ (Send key) enter call list from idle mode. Use navigation key to scroll between the tabs.

- Also, the function allows you **Select, Add, Edit**, and **Delete** setting.

Neo Navegacion

The Internet service enables your phone to surf the Internet. Your phone offers you several default profiles to choose form. These default profiles are based on the connection settings of major operators at the time this phone was manufactured. You can apply the desired connection settings by simply activating the respective profile, and you are ready to go.

Homepage
For each profile you are allowed to store a "Home URL" (Universal Resource Locator) address. You can quickly access the homepage of the active profile by selecting "Home URL" when the WAP menu is displayed.

Bookmarks
You can save the addresses of web pages as bookmarks in

the phone's memory.
Press **Menu**, and select **Neo Navegacion** and **Bookmarks**.
Choose the bookmarks you want to use and press left soft key
(Options**)**. And then you can:

Goto:	Open a connection to the page associated with the bookmark.
Edit:	Edit the select bookmark.
Send book mark:	Send this bookmark by SMS or MMS.
Delete:	Delete the select bookmark.
Delete all files:	Delete all select bookmark.
Add bookmark:	Add a new bookmark by entering the title and URL address.
Set as Homepage	Set the select URL address as homepage.

Recent pages

You can view the recent pages that you have read. And you
can press left soft key (Options), then you can:

Goto:	Connect to the select page
View URL:	View the select page's URL
Delete:	Delete the select bookmark
Delete all:	Delete all select bookmark

Offline pages

You can view the offline pages that you have read. And you
can press left soft key (Options), then you can:

Goto:	Connect to the select page
Delete:	Delete the select bookmark
Delete all:	Delete all select bookmark

Go to URL

Key in the URL address and press **OK** to connect to the
address.

Service inbox
Received return message from GSM operator.

Settings

♦ **Profiles**

- The WAP settings are stored in a WAP profile. In most cases you only need to use one of the default profiles to access the Internet. The settings are different from operator to operator. Please consult your operator or service provider for the correct settings and proceed with care. Wrong settings will cause the connection to fail.
- Within **Edit profile** submenu, press **OK** to enter profile-editing list. And then you can:

Rename profile:	Rename the selected WAP profile
Homepage:	Enter a title and address of the WAP web site as the homepage. You can only have a homepage for each profile.
Data account:	Users are only allowed to choose a data account. The list of the accounts should be consistent to those under Settings menu - Connectivity - Data account.
Connect type:	Select **Connection-oriented** or **HTTP** from the list.
User name:	Enter your user ID for the WAP gateway
Password:	Enter your user password for the WAP gateway

- **Browser options**

Timeout:	Set the timeout value for the browser. The browser will stop connecting to the web site if the web site does not respond within the timeout time.
Show images:	Set option On/Off to view pictures while browsing.

- **Service message settings**
  Turn **Off** or **On** to decide whether you want to receive

39

the service message or not. The message is saved in the Service inbox.

- **Clear cache**
  - The information or data you have accessed are stored in the cache of the phone. A cache is a file buffer that is used to store data temporarily.
  - Within **Settings** submenu, select **Clear cache,** and press **OK.**
- **Clear cookies**
  - It is advisable to clear any sensitive information like cookies of previously visited web sites. This is to avoid privacy and security risks if your phone is misplaced, lost or stolen.
  - Press **OK** to clear all the cookies
- **Trusted certificates**
  - For using some services, such as banking services, you need security certificates. After you have downloaded the required security certificate from the Internet, you can view the certificate and then save or delete it. If you save it, the certificate is added to the list of trust certificates under the **Settings** of **WAP** menu.
  - View the list of Trusted Certificates: Press **Menu,** select, **Neo Navegacion / Settings / Trusted certificates** press **View.**
  - If the security indicator is displayed during a connection, the data transmission between the phone and the gateway server is encrypted. However, the security indicator does not indicate that the data transmission between the gateway and the content server (the location where the requested resource is stored) is secure. It is up to the service provider to secure the data transmission between the gateway and the content serve.

Camera

BESS

GARATIA LIMITADA PARA TELEFONOS CELULARES ADQUIRIDOS EN PUNTOS DE VENTA DE MOVISTAR VENEZUELA.

COBERTURA Y PERIODO DE GARANTIA

BESS extiende garantía por un período de un (1) año para los equipos y seis (6) meses para los accesorios (baterías y cargadores) a partir de la fecha de compra (sujeto a evaluación técnica).

Durante el período de garantía BESS reparará o reemplazará el teléfono celular, sin cargos para el usuario final, siempre que presente el producto acompañado de la factura de compra.

CONDICIONES

BESS limita su garantía a lo establecido en el presente documento, tampoco tiene obligación respecto a la instalación de los equipos y de sus accesorios, al igual que los daños causados por la utilización de accesorios genéricos no provistos y aprobados por BESS.

EXCLUSIONES

Quedan excluidas de garantía todos aquellos dispositivos y accesorios que:

1. Presenten daños por el uso inapropiado de los mismos (impacto, accidentes, uso distinto al indicado en el manual de usuario, exposición a condiciones ambientales deficientes, exposición a agentes externos que deterioren el dispositivo, etc.)

2. Presenten evidencias de contacto con líquidos o con humedad, afectando así el normal funcionamiento del celular. Incluye tanto el daño como la oxidación.

3. Presenten evidencias de golpes, caídas o daños no imputables al normal uso o desgaste del dispositivo.

4. Presenten evidencias de daños causados por utilización de accesorios no originales.

5. Evidencien la reparación/reparaciones en talleres no autorizados por BESS.

6. Presenten fallas debidas a accidentes de fuerza mayor o constituyen una causa externa al dispositivo, esto es de vandalismo, quemaduras, humedad, fluctuaciones del voltaje, actos de la interrupción, perturbaciones radioeléctricas producidas por otros equipos, variaciones de tensión o frecuencia de la energía eléctrica, etc.

7. Presenten alteraciones o borrado del número de serie del dispositivo (IMEI).

8. No presenten fallas. La garantía no comprende las piezas deterioradas por el uso normal del dispositivo, como pueden ser los elementos de plástico, esmaltes, pinturas y pecado.

9. Estén fuera del período de garantía.
