## Welcome

Thank you for purchasing a VZ219 Handset Mobile phone. We built our Handset to give user what we believe user really want from a wireless phone, clear sound, and fashion outlook.

Our advanced technology is designed to grow with user's communications needs so that one day you will be able to rely entirely on users Handset to stay connected.

This guide will familiarize user with our technology and new Handset phone through simple, easy to follow instructions. If users have already reviewed the Quick Start Guide, which was packaged with new Handset, then user is ready to explore the advanced features outlined in this guide.

If users have not read "Quick Start Guide", go to Section One Getting Started. This section provides the entire information user needs to quickly activate phone, and much more.

We congratulate on your choice.

## Safety Information

Please read and understood the details which are both safe to you and your environment. Failure to observe these instructions may lead to suspension of cellular phone services to the user, or some legal action

### **Important information for parents:**

Please read the operating instructions and safety precautions carefully before use. Explain the content and the hazards associated with using the phone to your children.

### **Emergency Calls (SOS)**

Emergency call can be made from your cellular phone even without a SIM in the network service area.

### **Traffic Safety**

Please do not use your cellular phone while driving; find a safe place to stop first.

### **Switch off in Hospital**

The use of cellular phones may interfere with the functionality of some possible insufficiently protected medical devices in hospital.

### **Switch off in Airplane**

The use of cellular phone in an aircraft may be dangerous to the operation of the aircraft, disrupt the cellular network and may be illegal.

### **Switch off in Gasoline Station and Explosive Site**

It is advisable that users turn off cellular phone when refueling is in progress, users are reminded to observe restrictions on the use of radio equipment in fuel depots.

### **Operating Environment**

Mobile radio transmitting equipment, including cellular phones, may be subject to interference and may cause danger. Switch off your phone whenever it is forbidden to use it.

### **Use Sensibly**

Do not hold the phone to your ear when it rings or when you have switched on the hand free function. Otherwise you risk serious permanent damage to your hearing.

### **Appropriate Maintenance**

Only qualified and authorized personnel should service your cellular phone. Faulty installation or repair may be hazardous.

### **Replace**

You may only open the phone to replace the battery and SIM card. You must not open the battery under any circumstances. All other changes to this device are strictly prohibited and will invalidate the operating license.

### **Interference Noticed**

The phone may cause interference in the vicinity of TV sets, radios and PCs.

## Safety Warnings

### Accessories

Use only accessories and charging devices approved by the phone manufacturer! Otherwise you risk serious damage to health and property. The battery could explode, for instance.

The mains voltage specified on the power supply unit (Volt) must not be exceeded. Otherwise the charging device may be destroyed.

### Waste Disposal

Dispose of worn out batteries and phone in accordance with local provisions!

### Rechargeable Battery

- *If battery is over discharged the handset will need to pre-charge less than 10-20 minutes.*
- *Avoid accidental shorts across the contacts of battery by metal parts. Shorts can cause rapid discharge currents that can damage the battery, the part that creates the short or cause injuries.*
- *Prevent extreme low and high ambient temperatures for the battery. Therefore, do not place battery near a heater or on the car dashboard.*
- *Do not open, penetrate or otherwise physically damage the battery.*
- *Do not incinerate battery.*

## FCC Regulations

- You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.
- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - 1) this device may not cause harmful interference and
  - 2) this device must accept any interference received, including interference that may cause undesired operation of the device.
- FCC RF Radiation Exposure Statement:  
For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the

handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines."

**Warning:**

- SAR Head Max value : 0.599 W/Kg(1g )
- SAR Body Max value : 0.925 W/Kg(1g)

## Getting Started

### SIM Card and Battery Information

#### **Insert SIM Card**

The SIM card is inserted into the back of the phone underneath the battery.

- Press the knob and open the battery cover off.
- Remove the battery.
- Place the card inside the SIM cardholder such that the golden connectors are facing downwards.

#### **Insert Memory Card**

- Use only compatible T-Flash (Micro SD) card with this device. Other memory cards, such Secure digital (SD) cards, do not fit in the T-Flash (Micro SD) card slot and are not compatible with this device. Using an incompatible memory card may damage the memory card as well as phone, and data stored on the incompatible card may be corrupted.
- The T-Flash (Micro SD) cardholder is the back of the phone underneath the battery.
- Place the T-Flash (Micro SD) card in the notch. Make sure that the T-Flash (Micro SD) card is properly inserted and that the golden contact area on the card is facing upwards.
- Close the cover of cardholder.

#### **Insert Battery**

- Slide the battery into the cradle and press the battery down flat.

- Place the back cover and slide it into place.

**[Warning]:**

1. If the battery is totally empty, charging icon or LED is not on. There fore, you should charge the battery maximum up to 10-20 minutes.
2. If you turn off handset abnormally, please take out battery about 10 seconds then insert battery. Otherwise the battery will discharge and run out of power quickly.

**Charge Battery**

- Connect the USB cable the power jack on the right side of your phone.
- Connect the charger to an AC wall socket. The charging icon is displayed briefly if the phone is switched on. If the battery is completely empty, it may take a few minutes before the charging indicator appears on the display or any calls can be made.

## Calling

### Making and answering call

Before you can make or answer any calls, make sure that the phone is charged and your SIM card is inserted before you power on the phone.

Ensure that the phone is on, the network operator name is displayed and the signal strength meter shows network coverage is available in the current area.

### To make a call

- Enter phone number include area code you want to dial. If you key in wrong character, press  to delete it.
- Press  (Send key) to call the number.
- Press  (End key) to end the call or to cancel the call attempt.

### To make international call

- Press  key twice to input a + sign.
- Enter the country code, area code and phone number, and then press  (Send key) to make a call.

### To answer call

- To receive a call, the phone must be switched on and the signal strength meter must be displayed.
- Press  (Answer key) to answer a call.

### Missed calls

- When an incoming call is not answered, the Missed call log is displayed on your screen. To display the Missed call entry.
- Select the entry and press  (Left soft key) to read call detail.

### To use loudspeaker during a call

- Loudspeaker mode is uses handset as loudspeaker during a call. Do not hold the handset to your ear if loudspeaker mode on. To activate/deactivate the loudspeaker

during a call, press  (Right soft key) H-free/H-held, and the single will show on the screen.

- The loudspeaker is automatically deactivated when you end the call or call attempt or connect the headset to the phone
- The loudspeaker is default setting for playing MP3, voice recorder, using the loudspeaker with MP3 player and Voice recorder, see detail on MP3 player and Voice recorder.

### To call emergency

- Your phone supports the international emergency number, for example, 060, 112 or 911. This number can normally be used to make emergency calls in any country, with or without a SIM card inserted, if a GSM network is within range.
- You can place emergency calls "dial 060, 112 or 911 and press  (Send key)" even if your phone is locked or your account is restricted.

### Tip of call options

A call can be connected to any single caller by pressing  (Left soft key). When user press  (Options) during active call, user can choose one of those functions from the list:

- ◆ Hold single call: Put a call on.
- ◆ End single call: End a call.
- ◆ New call: Make a new call during an active call.
- ◆ Phonebook: Shortcut to phonebook menu.
- ◆ Message center: Shortcut to Message menu.
- ◆ Sound recorder: Star recorder conversation.
- ◆ Mute: Mute the call during the conversation.
- ◆ DTMF: Set On / Off for DTMF (Dual Tone Multi-Frequency) tone dialing system.

### Hold single call

Pressing  (Options) and selecting **Hold single call** allows you to put an active call on hold. This feature can be used when an incoming call is received during an active call or if you want to make another without disconnecting the active call.

### Make a new call during a call

You can dial a number during a call without disconnecting the active call.

- Press  (Send key) and selecting **Hold single call** to put an active call on hold and press **Options** select **New call** make a new call by keying new number.
- Press **Options** and select **Swap**, new number will go on hold, and old number will be active.
- Also, you can select record from phonebook, after select **New call**, press **Back** to option list and choose **Contacts**.

### Multiparty call

- You can connect to several people together or individually at a time.
  1. Make a call to the first participant.
  2. Call the second participant as explained in **Make a new call during a call**.
  3. Press  (Options) and select Conference. This joins the calls to the conference.
  4. Repeat step 2 and 3 to allow new participants to be connected to the Conference.
  5. Press **Options** and select **End all** to end the call. Or press  (End key).
- Any call (participant) can be disconnected by press **Options** key and select **End Single call**.

### Switch two calls

- Press  (Options) key. The first call is put on hold.
- To switch between two calls, press **Options** and choose **Swap**.
- To end the active call press  (End key). (Or to end both calls at the same time).

Press **Options**, and then move to **End single call** or **End all calls**. And press **OK**.)

## Menu Functions & Their Descriptions

### Call history

The numbers of the last 150 (Each page of Missed calls / Dialed calls/ Received calls can save 50 calls) calls that you have made are saved in the call record list. If your subscription includes the Calling Line Identification service and the caller's number is identified, the call record list also shows the numbers of received and missed calls. Call records, Dialed calls, Received calls and Missed calls are list under separate tabs. User can press  (Send key) enter call list from idle mode. Use navigation key to scroll between the tabs.

- \* Users only can see **Call history** information by pressing  (Send key) from idle mode.
- \*\* If the call record is moved to the private, you can not see the detail information in the **Call history---All calls / Missed calls / Dialed calls / Received calls**

folder, it will be find in the **Organizer---Private Menu---Call record--- All calls / Dialed calls / Received calls / Missed calls** folder.  
[Note: The default password is 0000]

Within the **Call history** submenu, we also have many other functions:

#### **Delete call lists**

- ◆ In this submenu, Press "OK" will display the following list
  - Missed calls
  - Dialed calls
  - Received calls
  - Delete all
- ◆ Press **OK** to delete it

#### **Call duration**

This function records the length of time or duration of all incoming and outgoing calls in hours, minutes, and seconds. Press "OK" will display the following list:

- ◆ Last call time: Display last one outgoing call in hours, minutes, and seconds.
- ◆ Total dialed: Display the time for all outgoing calls in hours, minutes, and seconds.
- ◆ Total received: Display the time for all incoming calls in hours, minutes, and seconds.
- ◆ Reset all time: Clear the time records.

#### **Call cost**

This network service allows you to check the cost of your last call or all calls. The call costs are shown separately for each SIM card.

- ◆ Last call cost: you can set the phone to show the cost of last call. You may need the PIN2 code to select the currency or unit. Contact your service provider for charging unit prices.
- ◆ Total cost: you can set the phone to show the remaining talk time in terms of charging units or units of currency by using this option. You may need the PIN2 code to select the currency or unit. Contact your service provider for charging unit prices.
- ◆ Reset cost: this option allows you to reset the call cost counter. You may need the PIN2 code to clear your setting.
- ◆ Max cost set: you can limit the costs of your calls to a certain amount of charging units or units of currency by using this option. You can make and receive charged calls as long as the specified cost limit is not exceeded. The number of remaining units is shown in the idle mode. You may need the PIN2 code to set the **Max cost**.
- ◆ Price per unit: this is the cost that the Service Provider charges for one unit of call time. At this point you will be asked to enter your PIN 2 code to set this function.

#### **SMS counter**

This function can show you how many SMS you already sent and received. Press "OK" will display contents

#### **GPRS counter**

With the GPRS counter you can check the amount of data sent and received data in last session in total and to clear the counters. The counters unit is a byte. To reset counter, answer "Yes" when confirm window show up. Press "OK" will display contents.

#### **STK**

In addition to the functions available in the phone, your SIM card\* may provide additional services under the SIM service submenu\*\*. By entering the submenu, you can find a list of services provided by your operator. The requested information may be responded via voice speech or SMS (Short Message Service). Additional charges may apply for services involve sending a SMS or making a phone call.

Note:

- \* Some SIM cards may not support SIM service. In such case, you won't be able to see the SIM service submenu.
- \*\* SIM service varies from operator to operator. The name and contents of the menu depend entirely on the SIM card provided by your operator. For availability, rates and information on using the SIM service, contact your network operator, service provider or other third-party vendor.

## **mcontents**

### **Torch**

The WAP service enables your phone to surf the Internet. Your phone offers you several default profiles to choose from. These default profiles are based on the connection settings of major operators at the time this phone was manufactured. You can apply the desired connection settings by simply activating the respective profile, and you are ready to go.

- ◆ **Homepage**  
For each profile you are allowed to store a "Home URL" (Universal Resource Locator) address. You can quickly access the homepage of the active profile by selecting "Home URL" when the WAP menu is displayed.

- ◆ **Bookmarks**  
You can save the addresses of web pages as bookmarks in the phone's memory.  
Press **Menu**, and select **Services**, **WAP** and **Bookmarks**.  
Choose the bookmarks you want to use and press left soft key (Options). And then you can:

<b>Goto:</b>	Open a connection to the page associated with the bookmark
<b>Edit:</b>	Edit the select bookmark
<b>Send:</b>	Send this bookmark by SMS or MMS
<b>Delete:</b>	Delete the select bookmark
<b>Delete all:</b>	Delete all select bookmark
<b>Add bookmark:</b>	Add a new bookmark by entering the title and URL address

- ◆ **Recent pages**  
You can view the recent pages that you have read. And you can press left soft key

(Options), then you can:

- Goto:** Connect to the select page
- View URL:** View the select page's URL
- Delete:** Delete the select bookmark
- Delete all:** Delete all select bookmark

- ◆ **Offline pages**

You can view the offline pages that you have read. And you can press left soft key (Options), then you can:

- Goto:** Connect to the select page
- Delete:** Delete the select bookmark
- Delete all:** Delete all select bookmark

- ◆ **Go to URL**

Key in the URL address and press **OK** to connect to the address.

- ◆ **Service inbox**

Received return message from GSM operator.

- ◆ **Settings**

- **Profiles**

- The WAP settings are stored in a WAP profile. In most cases you only need to use one of the default profiles to access the Internet. The settings are different from operator to operator. Please consult your operator or service provider for the correct settings and proceed with care. Wrong settings will cause the connection to fail.
    - Within **Edit profile** submenu, press **OK** to enter profile-editing list. And then you can:

**Rename profile:** Rename the selected WAP profile

**Homepage:** Enter a title and address of the WAP web site as the homepage. You can only have a homepage for each profile.

**Data account:** Users are only allowed to choose a data account. The list of the accounts should be consistent to those under Service menu - Data account.

**Connect type:** Select **Connection-oriented** or **HTTP** from the list.

**User name:** Enter your user ID for the WAP gateway

**Password:** Enter your user password for the WAP gateway

- **Browser options**

**Timeout:** Set the timeout value for the browser. The browser will stop connecting to the web site if the web site does not respond within the timeout time.

**Show images:** Set option On/Off to view pictures while browsing.

- **Service message settings**

Turn **Off** or **On** to decide whether you want to receive the service message or not. The message is saved in the Service inbox.

- **Clear cache**

▪ The information or data you have accessed are stored in the cache of the phone. A cache is a file buffer that is used to store data temporarily.

▪ Within **Settings** submenu, select **Clear cache**, and press **OK**.

- **Clear cookies**

▪ It is advisable to clear any sensitive information like cookies of previously visited web sites. This is to avoid privacy and security risks if your phone is misplaced, lost or stolen.

▪ Press **OK** to clear all the cookies

- **Trusted certificates**

▪ For using some services, such as banking services, you need security certificates. After you have downloaded the required security certificate from the Internet, you can view the certificate and then save or delete it. If you save it, the certificate is added to the list of trust certificates under the **Settings** of **WAP** menu.

- View the list of Trusted Certificates:  
Press **Menu**, select, **Services / WAP / Settings / Trusted certificates** press **View**.
- If the security indicator is displayed during a connection, the data transmission between the phone and the gateway server is encrypted. However, the security indicator does not indicate that the data transmission between the gateway and the content server (the location where the requested resource is stored) is secure. It is up to the service provider to secure the data transmission between the gateway and the content server.

### **Data account**

Connect way while choosing the mobile phone to browse through the WAP. Detailed materials setting up value, please arrange with a network supplier.
