

RF Exposure Statement

1. Standard Applicable

According to 1.1307 (b)(1), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a mobile device, but then in normal use, sometimes the antenna position may have a distance below 20cm from user.

2. Measurement Result:

The operation frequency of this device is 2402MHz to 2480MHz

The max peak output power is 0.06 dBm , lower than that
low threshold $60/f \text{ GHz mW} = (24.19 \text{ mW}/13.8\text{dBm})$

The SAR/MPE measurement is not necessary.
