Re.: Limited Module Approval for YN3-01007001

To Whom It May Concern:

We, Bit Cauldron Corporation, hereby request a Limited Module Approval as provided in Section 15.212 of the FCC Rules.

The requirements of this section have been fulfilled as follows:

15.212(a)(1)(i): Requirement of RF Shielding: The module meets radiated emissions limits of part 15 of the FCC Rules. However the module does not require or have its own RF shielding. This will need to be provided by the device into which it is installed as required.

15.212(a)(1)(ii): Requirement of Buffered Input: The module incorporates buffered inputs which meet the requirements.

15.212(a)(1)(iii): Requirement of Power Supply Regulation: The module incorporates its own regulators, which meets the requirements.

15.212(a)(1)(iv): Antenna Requirement: The module incorporates a permanently attached antenna.

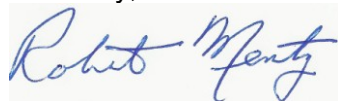

15.212(a)(1)(v): Stand-Alone Test Configuration: The module was tested in a stand-alone test configuration as described in the test report.

15.212(a)(1)(vi)(A): Labeling Requirement: The module will be labeled with its own FCC identification number, and the device into which the module is installed will display a label referring to the enclosed module. A picture of the label is included in the documentation.

15.212(a)(1)(vii): Operating Requirements: The module meets the specific rules for this type of transceiver, and the User's Manual contains instructions for maintaining compliance.

15.212(a)(1)(vii): RF Exposure: The module complies with RF exposure requirements as demonstrated in the test report.

Sincerely,

Robert Mentz
CFO
