

Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) and a metal component. The PCB is rectangular with various electronic components, including a black integrated circuit (IC) and several resistors. It is connected to a black cable. The metal component is a small, rectangular piece with a central hole and a small protrusion. Both components are placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters and centimeters.
Solder Board-Component View 3	 A photograph showing the same green PCB and metal component from a different angle. The PCB is oriented vertically, showing its top surface with various components. The metal component is placed next to it. The components are on a blue textured surface next to a black ruler with white markings.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, model TRP04BKM 240401, placed on a blue textured surface. The component is rectangular with various electronic components and solder joints. A black L-shaped ruler is positioned to the left and bottom of the component, with white markings in millimeters. The component is oriented vertically.
Antenna View	Antenna  A photograph of the same green PCB component, model TRP04BKM 240401, placed on a blue textured surface. A red box labeled "Antenna" is positioned to the left of the component, with a red line pointing to a specific area on the component's surface. A black L-shaped ruler is positioned to the left and bottom of the component, with white markings in millimeters. The component is oriented vertically.
