

RP-005 Description

Keys signals by switching to MCU, The Encoded data sent to the RF module, Oscillation in the RF module to the 2.4G frequency modulation, then transmit the signal by antenna.

- 1 . Voltage : 3VDC
- 2 . dynamic current : 4-6mA
- 3 . quiescent current : 0.04-0.06mA
- 4 . Frequency : 2.4GHz
- 5 . Modulation : GFSK
