

### **N3-015 Wireless Grip Circuit Description**

Receiver part circuit description:

1. Receiver part of the circuit is divided into mcu control circuit, power supply circuit, wireless receiver circuit, LED indicating circuit and mcu oscillator circuit.
2. Receiver module will handle data from grip sending part to mcu for data transfer. MCU makes the relevant return order of consoles send to grip through wireless module. MCU transfer LED signal to LED indicating circuit for LED lighting.
3. Mcu oscillator adopts 12MHz oscillator circuits.
