What's in the box

Compliance note:
 • Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
 • This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 – Reorient or relocate the receiving antenna.
 – Increase the separation between the equipment and receiver.
 – Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 – Consult the dealer or an experienced radio/ TV technician for help.
 • The antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be located or operating in conjunction with any other antenna or transmitter.
 • Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

- Blackberry**
- Download Vulkano Player to your phone from Blackberry App World
 - Install and run Vulkano Player
 - Go to **Settings > Selected Vulkano > Add Vulkano**
 - Enter the name and password of Vulkano
 - Go back to the Home screen and push **Live TV** to get started

Troubleshooting

Set Top Box control problems

If you have any problem controlling your Set Top Box, use the included IR Blaster cable. Insert the plug into the "IR Blaster" jack in the back of Vulkano and place the IR 'paddles' in front of the remote window on your STB. These paddles have an adhesive strip to help hold them in place once you determine the correct position.

Additional information and technical support are available at www.myvulkano.com/support.html

Support

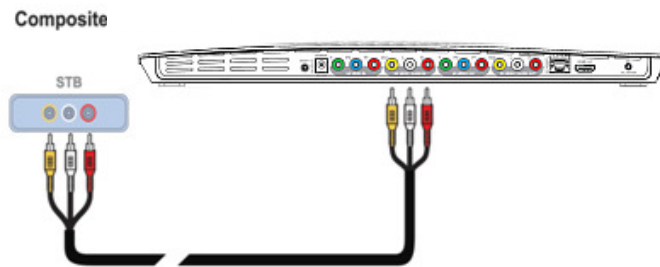

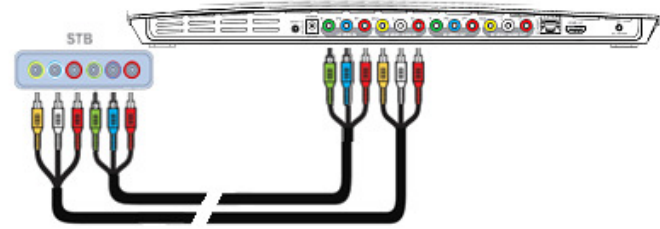

9:00 AM to 9:00 PM PST (Monday – Saturday)
phone: +1 (866) 937-4282
e-mail: support@monsoonmultimedia.com

Step 1 Connect Vulkano to Your Set Top Box (STB)

Your STB has input connectors on the back for Component, Composite, or both.

- Component will provide the next best quality, using the included Component and Composite cables.
- Composite uses the included Composite cable only.

Connect your Vulkano to your STB as shown in the diagram below.

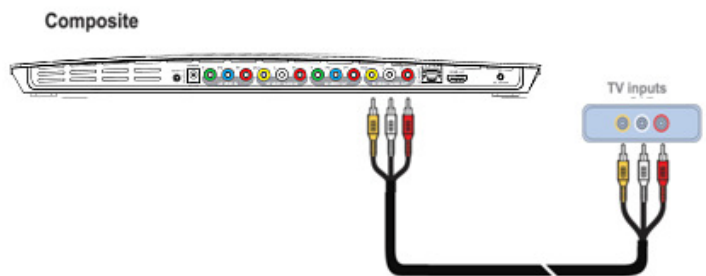

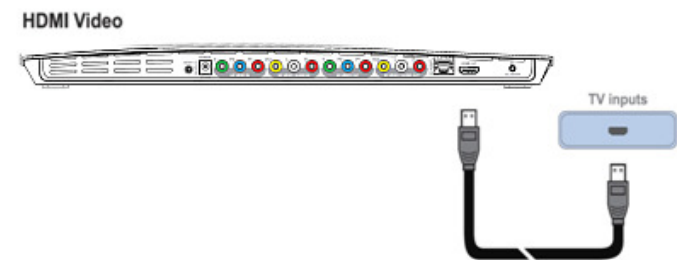

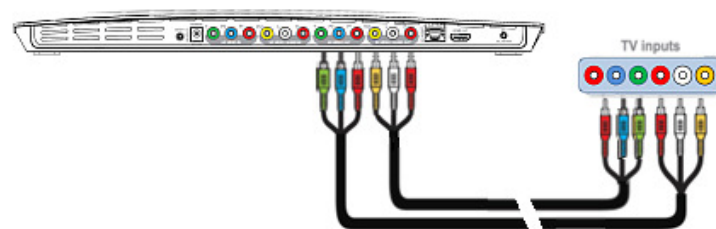

Note: Vulkano does not support HDMI input.

Step 2 Connect Vulkano to Your TV

Your TV has input connectors on the back for Component, HDMI, Composite, or more than one.

- HDMI will provide the best video quality, using included HDMI cable.
- Component will provide the next best quality, using included Component and Composite cables.
- Composite uses the included Composite cable only.

Connect your Vulkano to your TV as shown in the diagram below.

Step 3 Storage

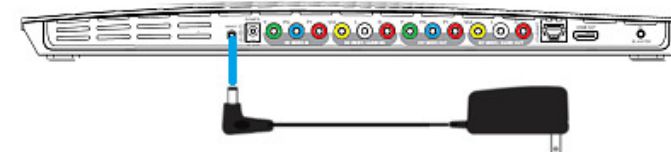

Vulkano Blast – skip to step 4.

Vulkano Lava comes with an SD memory card. Insert it into the SD card slot as shown.

Step 4 Power

Connect the included power supply as shown.

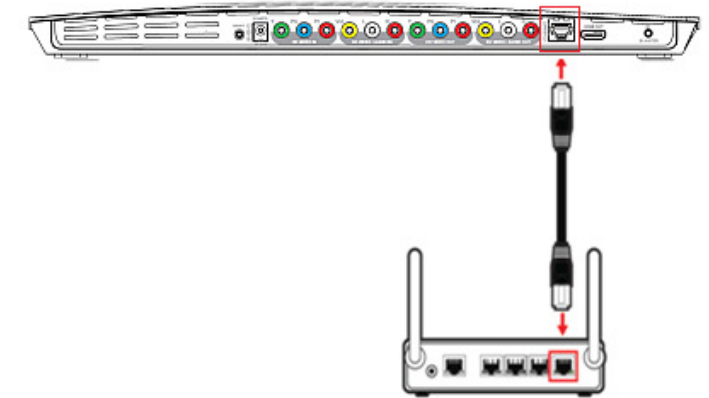

Step 5 – Home Network Connection

Vulkano connects to your home network using Wi-Fi or Ethernet.

Wi-Fi - You will connect Vulkano to your Wi-Fi network when you run the Setup in Step 6.

Ethernet - Connect your Vulkano to your router as shown using the Ethernet cable.

Step 6 - Setup

- Turn on your TV
- Use your TV's remote control to select HDMI, Component or Composite input from your TV's setup menu. The selection should match the cable you used to connect Vulkano to your TV.
- Plug Vulkano's power supply into an available wall socket.
 - If connected using Ethernet, Vulkano's status light will initially go through the sequence: Red, Red Flashing, Green.
 - If not connected using Ethernet (you plan to use Vulkano on a wireless network), Vulkano's status light will initially go through the sequence: Red, Red Flashing, Blank (off). The light will turn green when you complete wireless setup.
- Point your Vulkano remote control at Vulkano's front panel and press "1" to choose Component output, "OK" to choose HDMI output, or "2" to choose Composite output. The instructions on the screen will flash until you make your selection.
- Follow the on-screen instructions to complete setup.
