Reference: FCC ID: **YPC-VULKANO3** and IC ID: **7867A-VULKANO3**

As requested, here are the differences between the VULKANO3 models.

Similarities and Differences between model VULKANO3 BLAST and VULKANO3 LAVA, VULKANO3 FLOW, VULKANO3 STREAM:

Similarities:
1. The electrical circuit, design and the components used are exactly same in all 4 models listed above.
2. There is no change in the WiFi radiated power, receive sensitivity or antennas type and antenna gain in 4 models.
3. The PCB layout and dimension at 183mm x 177mm is identical in VULKANO3 BLAST, VULKANO3 LAVA and VULKANO3 FLOW and VULKANO3 STREAM.
4. The physical dimensions of the models at 200mm x 200mm x 34mm are identical.

Differences:
VULKANO3 BLAST: High end model with all hardware and software features. Supports streaming to all remote client device types.
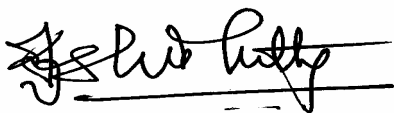

VULKANO3 LAVA: No hard disk inside.

VULKANO3 FLOW: No hard disk inside, no SD Card slot, no HDMI output. Different software with reduced software features.

VULKANO3 STREAM: hard disk inside, no SD Card slot, no HDMI output. Different software with reduced software features and limits the streaming to iPhone, iPAD, PC and MAC client devices. In the future we could reduce the number of client devices supported or add more client devices support. This is all done in software.

I trust this satisfactorily answers your questions. If not, please feel free to call me directly.

Sincerely,

Keshava Murthy
Director of hardware engineering
