#### Synchronization:

NOTE: Windows should have already installed the drivers and recognized the presenter, if not or the presenter is in sleep mode, click the presenter button once to wake it up. If this does not work, you may need to manually reconnect or change the wireless connection channel.

#### To change the wireless connection channel:

Unplug and re-plug the USB receiver from the USB port. Windows will detect the presenter and install the required driver automatically. Press the ID 1, and then press the ID2 until the blue lightflash stably. Your presenter has now changed channels and is ready to be used. If for some reasons, the synchronization is not successful, please:

- a. Remove the batteries and unplug the receivers
- b. Wait for about 20 seconds and then try the above procedures again.

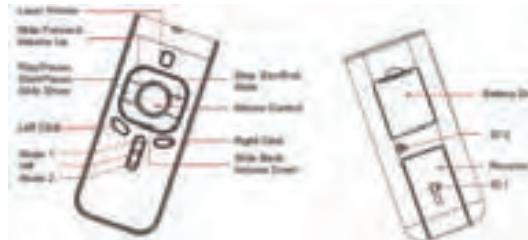

NOTE: During normal situation, please make sure that the presenter is within 10 meters from the receiver in order to have reliable connection.

#### Storing of the Receiver when traveling:

To prevent the loss of the receiver (also a USB flash disk for H2640A), we strongly suggest you to put the USB receiver on the bottom of the presenter receiver storage area after use. (4) IMPORTANT: Before boarding any aircraft, turn off or remove the batteries. The wireless presenter can transmit radio frequency energy, like a cell phone, when ever batteries are installed and the presenter is activated either by touch or button press. The presenter can transmit RF energy whenever batteries are installed and product is on.
