#### WARNING:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reorient or relocate the receiving antenna.
- ☐ Increase the separation between the equipment and receiver.
- ☐ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ☐ Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference and
- 2) this device must accept any interference received, including interference that may cause undesired operation of the device.

The following are the suggested text on SAR information

Specific Absorption Rate (SAR) information

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. This model (FCC ID: YROG333) has also been tested against this SAR limited. The highest SAR value reported under this standard during product certification for use at the ear is 0.523 W/kg. There are no body worn configurations (e.g. belt-clips, holsters or similar accessories), then body SAR is not required.

**Shielded cables must be used with this unit to ensure compliance with the Class B FCC limits, and the shielded cables is marketed with the mobile phone, don't use others.**

**GPRS Class: Class B**

## Statement of rights

Without authorization by our company, not allow using any contents of the manual, which comprise reproduction, transmission, distribution, and store it on any conditions. With continuous perfect and development, the company reserves the right to revise or improve the products which described in this manual, maybe will be released without notification.

In any case, the company will not be responsible for any data loss or other loss, and any special events, suddenness caused by direct or indirect damages.

User manual is provided according to original phone sample, unless there is another explanation by current applicable law. Otherwise, can't guarantee its accuracy, reliability and content, including but not limited, user experience and detailed use. the company reserves the right to revise or withdraw at any time without notice in advance.

Picture in this manual are only for your reference. If some pictures are not matchable, please use it based on produce in marketing. Network functionality (including some special service) are provided by local network operator, those service can be available or not depending on the operator.

If you find something not in line with this manual, or you want to get latest information, or have any question or new idea about this product, please contact our hotline: 400-6111111

## Safety notes

In order to use your phone safely and effectively, please read the following information before using.

- Please do not use your phone while driving the car.
- Please switch off the phone in the plane, and confirm you have canceled alerting and auto-power on.
- Please don't use the phone when you are near chemical fuel spot, gas station, oil storeroom or other explodes.
- Please comply with the relevant rules when using your phone in the hospital.
- Please stay away from the precision electronic instrument when using the phone.
- Please set your phone in the vibration mode, to avoid influencing others.

- Please don't clean the phone by using the chemical detergents.
- Please don't litter wasted batteries, and would be preferred you can input them into battery recycling bin.
- Please don't touch the antenna during the call, to avoid downgrading the signal.
- Please don't assemble or use the phone and accessories for humid, heat, cold, and dusty environments.
- Please put the phone and battery in reliable place to avoid vibrating and colliding strongly.
- Please note that the battery is fully charged when first use the phone.
- Don't dismantle the phone permissively, please specify the specialist agencies when you need for maintenance.
- Please don't leave your phone and its accessories within the reach of the small children.
- Please keep the SIM card appropriately, to avoid bending, scratching and static electricity.
- Please use the original accessories on our model product.
- Please use our standard configuration including battery, charger and other accessories. Our company will not be liable for the consequences caused by using the third-party's accessories and fittings.
- Please use the phone within the limits of the network coverage.
- During the strong temperature changes and long time call, the show effect of LCD will change.
- Note the following point when using the medical equipment:

#### Pacemaker

The pacemaker manufacturer recommends that a minimum distance of 15 cm (6 inches) be maintained between phone and pacemaker. People with a pace maker please note :

- Keep the distance between phone and pacemaker more than 15 cm when the phone is open.
- Please do not put the phone into your outside coat pocket.
- If you suspect the interference occurs, please turn off the phone immediately.
- Please use the phone in the other side of the pacemaker, to reduce the potential interference.

#### Audiphones

Some digital phones may interfere with certain audiphones. You need to contact with your manufactures to find the solution when it appears the interference.

#### Other medical instruments

If you are using other medical instruments, please consult the manufacturers and confirm whether the instruments can fully shielding the RF information all around. Anyway, you can also consult the relative information with the doctor.

## Battery safety

- Please use the original produced battery. Use of non-original fittings will be fail to all the warranty, and does not cover damage caused to use non-original fittings responsibility.
- Do not allow the short circuit between the metal objects and battery contactor. (e.g. the key)
- Do not bend or use brute force to open the battery.
- Do not place the battery into the fire or water.
- Charge the batteries only at room temperatures. if the temperature may be below 0 degrees C(32 degrees F) or above 45 degrees C(113 degrees F), the battery would not charge.

## Fast and light travel charger

Using the fast & light travel charger can quickly charge your phone batteries.

Please following the using method:

- Make sure that you have installed the batteries properly before initiating a charge, and do not move the battery in the processing of charging.
- Please put the USB data cord into the travel charger, and the other end of the cord into the phone.
- After connected properly, put the travel charger into the 220 volts socket to start charging.

Warning: it can use as US data cable to connect the phone and the computer to charging.

Important notes:

You can insert the USB data code when the computer is already turned on, and pull it out while shut down, otherwise, the computer will be damage.

User manual are only for your reference, if some pictures are not matchable, please use it based on produce in marketing.

# 1 Quickly using

## Part of the name and function
