

DESCRIPTION

The 1999 Remote Control is a self-contained unit that can control the operation of the EP9 500 / EP9R 500 humidifier.

When utilized on its own, the 1999 can act as a hygrometer to measure indoor relative humidity. This unit is not recommended for outdoor use.

The remote is effective within 20 feet of the humidifier. It does not have to be pointed at the unit when making changes to the setting.

It has three buttons on the front and a two level LCD screen that displays:

- Fan speeds from F1 (low) to F9 (high).
- Humidity settings that increase/decrease in 5% increments (25%- 65%).
- Temperature measuring range: (+14°F to +122 °F) (-10 °C to +50°C) with 0.1°F/°F resolution.
- Humidity measuring range: 10 - 99% with 1% resolution.
