## Warnings :

1. The transmitter ,the field strength not exceeding 1000microvolts/m measures at 3 meters The modulation of carrier frequencies is 88.1,88.3,88.5 , 88.7 MHZ
2. Environmental conditions : Temperature :25 C ,Relative Humidity : 52% , ATM Pressure :100.9kpa
3. The field strength of any emissions radiated on any frequency ,out of the specified 200KHZ band shall not exceed the table radiated emission limits .
4. Using the transmitter , please don't put heavy product on it
5. Can't use metal shielding box superjacent .

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The user manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** Any changes or modifications not expressly approved by the party Responsible for compliance could void the user's authority to operate this equipment.
