Statement: Our company reserves the right, in customer's interest, to improve and alter its products without prior notice, and reserves the final right to the technical specification of its products. We are devoted to the production improvement and put forward the updating version time after time. The content of this manual may be slightly different in the actual function, size or design from your mobile. Please refer to your purchased mobile, and accept our apology for updating without prior notice.

## Precautions

Read these provisions carefully, violation of these provisions could cause danger or break law. Precautions are provided in these manual.

### Secure Power-on

Don't power on where mobile phone is forbidden, so as to avoid interference and danger.

#### Traffic Safety

According to recent research, it is danger to use phone during driving even though hands-free devices (vehicle hands-free device, earphone, and so on) are adopted. The electromagnetic wave radiating from the mobile phone will disturb electronic systems, such as ABS and airbag. For your safety, please:

- Don't put mobile phone on instrument panel or the installation area of airbag.
- Check with the dealer or manufacturer of vehicles to ensure that the electronic systems of vehicle are insulated absolutely.

#### Interference

The performance of mobile phone could be affected by outside interference, while the performances of other electrical equipments (Ex. Television, radio, PC.) could be affected by mobile phone.

#### Power-off in medical care places

Power off in medical care places except for designated areas, mobile phone can disturb the operations of other electrical, electronic and radio frequency devices near by.

#### Power off on plane

Please follow any relevant limitation, the phone can interfere the plane, power off before boarding.

#### Power off during refueling

Power off in the gas station or in the place where there are dangerous things of fuel, chemicals, and so on.

#### Power off in the blasting place

Power off in the place where there are signs of "Blasting site" or "Power off tow-way radio devices". Place observe and carry out all the rules related with mobile phone.

#### Appropriate use

Use your mobile phone in the proper place, and don't enter the antenna area.

Keep child from using the mobile phone when there no adult take care him. You could move SIM card away, and avoid that child swallow these small parts.

Pregnant women shouldn't use mobile phone too long.

### **Accessories and Battery**

Use attached accessories and battery; don't use unauthorized accessories and battery. Before removing the battery, please power off. Cope with the used battery in a proper way.

### **Not waterproof**

Your mobile phone is not waterproof; don't expose it to the bad climate and conditions (such as humidity, rain, leakage, fog, and so on).

### **Emergency Call**

Ensure the mobile phone is power on and in the service area. Press Hang-up button repeatedly to clear the display and return to standby mode, or directly press number keys to input the emergency number, and then press the answer key to tell the answerer your position. Don't hang up without permission.

## **1. Mobile phone exterior**

The multimedia mobile phone, dual card dual flip phone to be. Phone with color screen display, built-in vibration motor, and one charging. The icons in the user manual are used for descriptions of functions so they are for reference only and there is slight difference between the icons in the user manual and that in the actual conditions, so it is subjected to the actual cell phone. Some of the menus mentioned in the user manual, because that the conditions cannot be met, may be hidden automatically by the cell phone.

## 2. Preparatory work before use

### What is SIM?

This phone can support two SIM cards and two stand-by, there are two slot to place the two SIM cards (SIM1 & SIM2) . When you register your mobile number.you will get the SIM cards (Subscriber Identity Module). And you put the SIM cards into the slots then you'll got the functions includ communication data, mobile number, PIN code (for identity verification), phonebook, message,as well as other additional system service. Note: please take care usage of the SIM card, friction or bend may damage it. If it is lost, please contact the network operator, The SIM cards is pretty small , do not allow children to touch it to avoid swallowing it by mistake !

### Insert your SIM cards

Switch off the mobile before inserting the SIM card. The SIM card is at the back of the mobile. Please follow the steps as bellow:

1. Turn to the back, press the cover button then slide the back cover along the phone body, unclip the battery from the slot and remove it. Refer to the picture below.
2. Place the SIM card with the chip facing downwards and slide it into its housing by aligning the SIM card's nick and the slot's one, push the SIM card as deep as possible. Refer to the picture below.

Note: This mobile has two slots for Sim1 and Sim2, the phone reads the SIM1 under factory setting (you can exchange SIM1 and SIM2 by "settings/Dual SIM settings" ), or enter "menu/settings/Dual SIM settings" to exchange or choose the Dual SIM settings" without SIM card, it's no need to execute switch on/off.

3. Insert and engage the battery into the fixing slot, press the battery downwards, and then slide the back cover upwards along the phone body until it is locked. Refer to the picture below.

### PIN1 Code

The PIN1 Code is the Personal Identification Number for entering a SIM card. 'Input PIN' is requested each time the phone is switched on if this PIN1 code is activated.

You can get this code with the SIM card by your network operator. It usually has 4 digits. When you inputting the PIN1 code, '\*' will display on the main screen instead of the digits.

### PIN2 Code

The PIN2 Code is the Personal Identification Number for certain network features (Cost information, etc.) requested during their use when this code is activated.

<Warning>; If you enter 3 incorrect PIN1 Codes, the SIM card will be locked. You have to contact your network vendor for decoding. Unauthorized decoding may cause the SIM card to be invalid forever.

## Charging your battery

- The battery of this mobile is the rechargeable lithium battery.

Note: New batteries are partially charged, we recommend you to charge the battery before using your phone. It will take 3 hours to fully charge. The battery has no memory effect, so discharge it before charging is not necessary, and charging a battery that is not empty does not affect the lifetime of the battery also. We suggest that you charge the battery when its power is low to avoid the drained status.

- It is normal for batteries with slightly heat during charging. Your mobile will activate automatic protection when the temperature is rising in order to control the temperature.
- When battery power is low, the alarm rings and a low battery message displays. If battery power is completely drained, the mobile turns off automatically.
- Turn off your phone before removing the battery, otherwise the data stored in the mobile will be lost and the lifetime of the mobile will be affected.

Battery Type	Standby Time	Communication Time
Lithium Battery	200-400Minutes	240-400 Minutes

### Battery Charging Steps

- Plug the charger into the electrical outlet, and then plug the charger connector into the socket at the right side of the mobile. The side with the direction signal is upward, the charge direction is correct.
- When your phone is on during the charging, 'charger connected!' displays if the charger is connected successfully. Then the battery power level indicator in the external display shows how much of the charging modify is complete dynamically.
- When the mobile is off during the charging, an animation displays the charging modify.
- When the battery is fully charged, the charging modify will stop automatically with a full battery icon displayed. After charging is finished, please disconnect the charger as soon as possible.

Note:

1. When battery power is drained, we suggest you charge it in time.

If the battery has not been charged for 2 days, the mobile will change into slow charging mode without anything displays temporarily when you charge it again. The charging indicator may take about 15 minutes before appearing in the external display.

2. Do not alter the components and accessories of battery or open it by yourself to ensure the safe usage of the battery.

3. We suggest that you should use your telephone with the batteries compatible with your

model to avoid any damage to your mobile.

4. Mains powered chargers will operate within the temperature range: 0°C to 40°C, do not charge your phone under higher or lower ambient temperature.

Warning: Only use your telephone with qualified batteries, chargers and accessories compatible with your model authorized by our company. Do pull out the plug but not the cable when you cut off the power of any component. Please consult your vendor about the purchase of relative components.

### 3. The brief introduction of the mobile

#### The Communication Control Keys

The Call Key is used to make a call (when the numbers have been input or in the phone book) and pick up a call. In the stand-by status, press this key to access call memory (including answered, dialed and missed call records.)

The End Key is used to end a call (in dialing or calling status) or exit current menu and return to the stand-by status. Press and hold this key for 2 seconds to switch on or switch off your telephone.

#### Number Keys

Press the Number Keys from 0 to 9, Symbol\* and # Keys to dial and input password, English words, symbols and Chinese characters (Using stroke or spelling Input mode), etc.

pressed for more than another 2 seconds to restore the previous mode.

### **Navigation Keys and Soft Keys**

In the stand-by screen, you can press the Up/Down/Left/Right Key to enter the different menus (You can also redefine the function of the navigation keys by 'Menu//Setting/Phone Setting/Dedicated key'). Press the OK Key to access the main menu. Press the Right Soft Key to enter the phone book. send1 is the SIM card and phone records of a dial-up SIM1; SIM2 by Send2 enter the dial-up phone records and SIM2. The menu operation, left and right softkey functions of the two in the bottom of the screen and his party showed that they function and cell phones is closely related to the current status.

### **Nouns Explanations**

【Domestic calls】: Dial the region number followed by the number you are calling.

【International Calls】: Press and hold the '0' key until '+' appears, then input the country code, region number and phone number.

【Emergent calls】: Dial 112 to make an emergency call for help. This works even without a SIM card.

【IMEI】: International Mobile Equipment Identity. You can see a bar-code label with IMEI number at the back of the mobile if switching off the mobile and removing the battery. The number is also stored in the mobile, when inputting "\*#06#", it displays on the screen if the phone is in the stand-by status. The IMEI, unique globally without any duplication, must be printed on the every phone all over the world, no mater which brand the mobile belongs to.

## **4. Basic Operation of the mobile**

### **Switching on your mobile phone**

Press and hold on the End Key to switch on (or switch off) the mobile. If the password protection of the SIM card and telephone is not activated, the mobile will search for a network automatically. The name of the network will be displayed on the screen when the mobile is registered on the network, then you can make or answer calls.

Your phone will keep on searching a network if an available network couldn't be found temporarily.

If 'Insert the SIM card' is displayed after switching on your phone, please press and hold the End Key to switch off and check your SIM card is inserted correctly or not.

If the password or PIN code of the mobile is requested when switching on, please input the correct password. \* will be displayed instead of the digits, and then confirm with the left soft key. The registered network name and signal intensity will be displayed after unlocking.

If you do not know your PIN code, please contact your network operator.

The default password is '1122.'

### **Switching off your mobile phone**

Press and hold on the End Key to switch off the mobile. The telephone is power off after the power-off animation displayed. Do not switch off the mobile by removing the battery directly, which would result in the lost of the un-stored information in SIM cards.

### **Installing a T-Flash card**

The mobile supports a T-flash card (maybe needs to be purchased additionally). The T-flash card is a multimedia storage card used to extend the memory of your mobile. The card is small, so please be careful when you installing or removing it to avoid damaging it. The phone supports T hot-swappable cards, in the upper left side of the phone will be T-flash card is inserted into T-flash release slot.

Note: T-flash cards that compatible list as follows: Kingston 128MB, 256MB, 512MB, 1G card; And SanDisk 128MB, 512MB, 1G, 2G card; Lexar 1G card; Especially, please bring your handset when you purchase the T-FLASH card, and please make sure the T-flash card is compatible with your handset.

### **Making a call**

To make an international call, input '+' instead of '00', finish dialing the number and then send the call.

You can delete the last incorrect digit by pressing the right soft key and long pressing will delete all the digits you input. When the call is connected, call timer displays. If the sending call is not answered, the possible reasons are as follows:

- ◆ "Busy" indicates that the called number is busy or no free line can be used. If the automatic redial function is activated, the person you called will be called back automatically.
- ◆ "Rejected" indicates that the call is not allowed for reasons such as that Call Barring function is activated.

The caller's name is displayed if the incoming number has been stored.

Press the End Key or the right soft key to hang up the call.

### **Receiving a call**

When you have an incoming call, your telephone will prompt with ring, vibration, vibration and ring, vibration then ring.

- ◆ Press the Call Key to talk
- ◆ Press the End key to reject

The caller's number is displayed if the Calling Line Identification Presentation is activated. The caller's name is displayed if the incoming number has been stored.

To hang up a call is basically the same as the method mentioned above.

### **Speed Dial**

The mobile offers 8 shortcut keys (2-9) that can be customized to assign corresponding speed dial numbers. You can make a speed dial call by pressing and holding the number keys (2-9) in the stand-by status.

**Note: You should press and hold the key (2-9) for more than 2 seconds for speed dial. If the shortcut key pressed is not defined in 'phone book/speed dial,' you cannot make the speed dial.**

### **Use the earphone**

When used the earphone, you can receiving and dialing the call. Please operate it as followed form.

Execute	The button of earphone
Receiving the call	Press the button one time
End the call	Press the button when end the calling

### **Recent Call numbers**

In the standby mode, press the call button to display the recent telephone call records. Through the direction button to select the desired number, press the call button to allocate the number directly.

### **During the call**

During a call, you can access the "option" menu to choose the different functions (as followed). Press the left software to use "hand-free" function;

- ◆ Keep the single line: Keep the current call
- ◆ End: End the current call
- ◆ New call: Input the number to make another call.
- ◆ Phone book: Please refer to the chapter about Phonebook for details.
- ◆ Message center: Please refer to the chapter about Message for details
- ◆ Mute/Restore: Hear voice from the other end, but he/she cannot hear yours.
- ◆ Dual tone multi-frequency: Set whether an extension number could be called.

### **Missed calls**

A prompt sound or an icon would display on the main screen if you have missed calls in Sim1 and Sim2. You can view the missed calls by pressing the left soft key.

### **Cell Broadcast CB**

The main screen displays the warning words or a list When customers receive the cell broadcast, the user should press the left soft key to access the " list " to read the cell broadcast.

## 5. MEUN

### Idle screen
