

1985 Hendersonville Road - Asheville, NC 28803 - 828-684-8441

Ref: FCC ID: YTI-SH002-102010

Dear Sirs:

SimplyHome LLC requests acceptance of the labeling proposal described below for the 802.15.4 Door/Window Contact bearing FCC identifier YTI-SH002-102010.

The Door/Window Contact pictured below is authorized under FCC part 15.249 TX and Part 15.109 Digital testing.

Because of the compact size of the Door/Window Contact, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the back housing is not acceptable because of a raised company logo. For this reason, SimplyHome proposes placing the label carrying the FCC identifier inside the front cover as shown in the image below.

The consumer packaging for the Door/Window Contact includes the battery as a separate item. The FCC Identifier is visible to the user when it is marketed and when the battery is installed.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chris Whitworth', is written over a horizontal line.

Chris Whitworth
Director of Engineering
