VIDEO SET UP

Your new unit is set to a default video setting to ensure compatibility with most display sets in the market. This setting might not be the optimum setting for your display (TV) screen. To enjoy the best possible video quality for your display, please perform the instructions below. Before you begin, please identify your display (TV) optimum resolution.

- Go to Settings → Video
- Select your display's optimum video resolution and press "OK".
Make sure you select the correct resolution as provided by your display's user.
- Select OK button on screen and press "OK".
- If you do not see any picture on the display, this means your display does not support the selected video setting.
- To reset the unit to default factory settings, press the numbers 1 5 9 3 5 7 in sequence on the number pad of your remote control.
Doing this will reset the unit to factory default for all video, audio and network setting.

VIDEO CALIBRATION

Upon setting your optimum video resolution, it is advisable to check and calibrate your video dimensions to ensure the best viewing size for your unit. This ensures no part of the screen is overscanned by your TV.

- Go to Settings → Screen Adjustment.
- Press "Left, Right, Up, Down" to adjust the position to fit right to the edge of the screen. You should see an arrow sign in white color at the top left corner.
- Press "OK" to proceed to the next edge of the screen i.e. bottom right corner.
- Press "OK" to proceed to adjust the subtitle position.
- Press "OK" to proceed to adjust the rectangle. Adjust into a perfect square.
- Press "MENU" once all adjustments are completed to save your settings and exit.

AUDIO SET UP

Your new unit is set to a default audio setting to use HDMI output with automatic stereo downmixing to ensure ease of use with today's LCD TVs. If you have an advanced home theatre system or would like to use external speakers, you can further set the audio to provide optimum home theatre surround sound effects

- Go to Settings → Audio Output.

- Select desired audio output.

Analog - 3.5mm audio jack for stereo or 5.1 channels

HDMI - HDMI output to the TV or to digital amplifiers

SPDIF - Digital audio output to digital amplifiers

- Select additional settings.

Downmix - to enable complete audio when playing multi channels audio track using stereo or TV speakers

AC3 Receiver - to enable surround effects with AC3 capable amplifiers

DTS Receiver - to enable surround effects with DTS capable amplifiers

- If you do not hear any sound or missing sounds, please refer to your digital amplifier's manual for tuning. To reset the unit to default factory settings, press the numbers 1 5 9 3 5 7 in sequence on the number pad of your remote control.

Doing this will reset the unit to factory default for all video, audio and network settings

NETWORK SET UP

To fully enjoy your system, it is advisable to connect your unit to the internet. Your unit has multiple ways to be connected to the internet.

- Go to Settings → Network.
- Select your connection settings.
For wireless option, you will need to ensure that your external antenna is properly installed to maximize the signals.
- Select the mode for your home internet network.
Static - fixed IP
DHCP - dynamic auto assigned IP (most common in home network)
- If your internet service provider requires unique DNS, please key in your DNS addresses.
- Select OK button on screen and press "OK".
- If your unit is successfully connected to the internet, a solid orange glow circle can be seen at the bottom right of the screen, next to the weather or the date and time. Else, it will be a blank orange glow.

PIN SET UP

You are allowed to set a PIN Number to restrict your child or other person to access your content in Movies, Music, Games or Education modules.

- Go to Settings → PIN.
- Select ON to enable PIN field and press "OK"
- Key in a 6-Digit PIN at Six-Digit PIN field.
- Re-key in the PIN at Re-enter to Confirm field.
- Select the modules you want to activate the PIN and press "OK".
- To save the settings and Exit, select the OK button at the bottom of the screen and press "OK"

Please refer to on screen Help and User Guides for detailed functions and features tutorials. Please check the Help and User Guides periodically to learn new features and functions updated automatically if you are connected to the internet.

UPDATES

When any new updates is available for your unit, there will be a notification icon, indicated at the right side above the Advertisement banner. Follow the steps below to update your unit.

■ Go to Settings → Updates.

■ Select the OK button on the screen and press "OK".

Update your 1Box regularly to ensure that you maximize your enjoyment!

ACCESSORIES

Your unit is compatible with most USB devices and PC-speakers available in the market. You can purchase optional accessories to enhance your experience of using your unit.
