

# **Circuit Description**

Battery Input 3.7V-4.2V DC voltage by CON3, 3.7V-4.2V To the IC CSC4863 power, CSC4863 for audio input and for Power amplifier IC Actuation speaker, 3.7V-4.2V from (U3) IC IC6206A33 then will reduce to 3.3 Volts, 3.3 Volts To Blue tooth Module .

The Charge status : Input 5V DC voltage by J1, 5 V voltage from D4 rectifier diode TO Battery Charge.
