

Initialization

While you are using IDENTITY tab, errors occur or IDENTITY tab does not work properly, refer to the image below. To initialize the system for returning back to its default settings, press the Initialize button with a thin, long metal object such as ballpoint pen, etc. You can initialize IDENTITY tab without any loss of the applications and data saved in the SD card memory.

* NOTE: The volume is set to default values after initialization. Press the volume buttons to adjust the volume.

● Initialization button

Warranty Statement

Product Name	PAD	Model Name	YUE-ESP-E201U
Purchased	Y M D	Serial No.	
Agency	Sales Price		

* Quality warranty period: Within one year for PAD and 6 months for the battery from the date of purchase.

- Performance and functional failures occurred while in normal use within the period of stocking components

Consumer detriment type		Warranty coverage	
		In warranty period	Out of warranty period
Failures within 14 days from the date of purchase (However, it is subject to change depending on the provider's circumstances.)		Replacement or refund	N.A.
Failures within one month from the date of purchase which requires critical repair		Replacement or free repair	
Damage incurred during delivery or installation of the product after purchase		Replacement	
Failures within one month from the date of replacement which requires critical repair		Replacement or refund	
Replacement is unavailable.		Refund	
There are components for repair, but repair is unavailable.		Replacement or refund	
Repair available	Failures have occurred twice due to the same cause.	Free repair	Charged repair
	Failures have occurred three times due to the same cause.	Replacement or refund	Charged repair
	Failures have occurred five times due to the same cause.		Charged repair
The provider has lost a product which the consumer requested for repair			Refund money = (the actual product price - depreciation price + 10%)
Repair is unavailable because components for repair are not stocked within the components stocking period			

- Breakage due to consumer intention or error

Consumer detriment type		Warranty coverage	
		In warranty period	Out of warranty period
Failures due to consumer's intention or mistakes	Repair unavailable	The product will be replaced after charging the amount for charged repair	The amount for charged repair will be charged and depreciation cost will be applied prior to product replacement
	Repair available	Charged repair	Charged repair

Warranty Statement

Criteria for free and charged warranty service

- Free warranty service**

You can receive free warranty service for performance and functional failure of the product which occurred while using your product normally within the warranty period.

- Charged warranty service**

When failures occurred due to consumer errors

- Failures caused by incorrect use or handling (dropping, submerging, impact, excessive operation, etc.)
- Failures caused by repair conducted by unauthorized personnel at a service center which is not designated by Ensper
- Failures caused by consumer intention or errors
- Failures caused by the use of uncertified consumable parts or accessories
- Failure caused by not adhering to the installation and use specified in this guide

- Other**

- No failures
- Failures caused by natural disasters (lightning, fire, salt damage, flood damage, abnormal power, etc.)
- Consumable parts reached the end of their life spans (battery, lamps, oscillator, etc.)
- Failures caused by consumer error
- Failures caused by incorrect handling by the consumer
- Failures caused by repair or modifications made by the consumer
- Failures caused by repair conducted by unauthorized personnel or a agency which is not designated by Ensper
- Failures caused by the use of optional parts that are supplied by Ensper
- Failures or damage caused by incorrect handling

- The product warranty period in the above stipulations is within one year from the date of purchase. (However, the warranty does not apply to the purchase of used products.)
- For a refund within the above stipulations, the consumer must attach the purchase receipt or purchase details.
- Besides the stipulations mentioned above, all failures occurring after the expiration of the product warranty period requires charged repair.

FCC information

U.S.FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT INFORMATION TO THE USER

* NOTE: This equipment has been tested and founded to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment dose cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encourage to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet of a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for assistance.

Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Connecting of peripherals requires the use of grounded shielded signal cables.

Safety information

1. SAFETY INFORMATION FOR FIXED WIRELESS TERMINALS .POTENTIALLY EXPLOSIVE ATMOSPHERES

Turn your tablet pc OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

2. INTERFERENCE TO MEDICAL DIVICES

Certain electronic equipment may be shielded against RF signal from you wireless tablet pc. (pacemakers, Hearing Aids, and so on) Turn your tablet pc OFF in health care facilities when any regulations posted in these areas instruct you to do so. RF signals may affect improperly installed or inadequately shielded electronic system in motor vehicles.

3. EXPOSURE TO RF ENERGY

Use only the supplied or an approved replacement antenna. Do not touch the antenna unnecessarily when the tablet pc is in use. Do not move the antenna close to, or couching any exposed part of the body when making a call.

Safety information for rf exposure

Body worm operation

This device was tested for typical body-worn operations with the back of the **tablet pc kept 5 mm. from the body. To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 5 mm. separation distance between the user's body and the back of the tablet pc, including the antenna. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.**

SAR information

THIS MODEL TABLET PC MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless tablet pc is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless tablet pc employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *

Tests for SAR are conducted with the tablet pc transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the tablet pc while operating can be well below the maximum value. This is because the tablet pc is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a tablet pc model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for

NOTE : This equipment has been tested and found to comply with the

Thank you very much for using IDENTITY tab.

Find out how to set IDENTITY tab and how to use the key functions through the Quick Start Guide.

You can also refer to the Instruction Book included in the accompanying CD-ROM and visit www.identitytab.com for more information about its functions and descriptions.

- This guide contains the installation procedures and initial uses of this product.
- Please read this guide carefully for the correct use of the product before you actually use it.

- Please keep this guide for your reference - it contains how to use the product and how to change its settings. The figures in this guide may differ from the actual product.

- The contents of this guide may vary depending on the software versions or the communications service providers. The contents are subject to change without prior notice to users.

- A/S Request
 1. Call center: XXXX-XXXX
 2. Opening hours:
9 am to 6 pm during weekdays / Closed on weekends and national holidays.

- Precautions for battery use
 1. Do not disassemble the battery, put it in the mouth or eat it (also keep away from pets).
 2. Ensure that any leaked battery liquid does not come in contact with the eyes, skin or cloth.
 3. Do not impact the battery or make a hole in it with a sharp object.

Product and Accessories

The following items are the product and the accessories inside the package when you purchase the product. Please check the product and its accessories are all included. If there are any missing accessories, please contact Enspert or the agency you purchased the product from. The images of the product and the accessories may differ from the actual product and its accessories. Some accessories are subject to change.

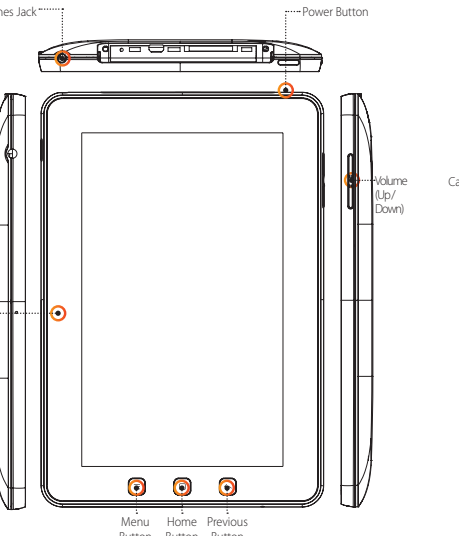

Frontal View

Press and hold the Power button to turn on or off IDENTITY tab.

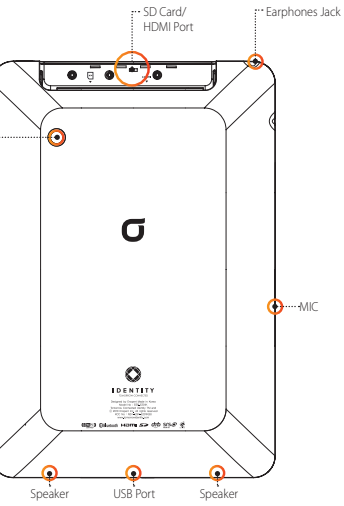

- When turning off the power, a pop-up window appears. Tap Power off.

To switch to Standby mode while using IDENTITY tab, press the Power button quickly. The screen is turned off, but all the functions are operating normally.

Rear View

Inside the rear cover, IDENTITY tab has an SD card slot and a Micro HDMI port, and an earphones jack on the right. Ensure that you insert your SD card in the correct direction. You can use the Micro HDMI port when connecting IDENTITY tab to your TV or PC. There is a jack for earphones on the right and also a DMB antenna port. IDENTITY tab has two speaker holes and a Mini USB port in the middle at the bottom.

Setting Home Screen

When you press the Home button, the Home screen appears. IDENTITY tab has three Home screens in total. You can flick or tap the circular icon on both sides of the screen to switch the Home screens. There are three soft keys in the bottom center of the Home screen.

- Menu Soft Key: You can view the Application list quickly.
- Internet Soft Key: You can access the Internet quickly.

Applications on the Home Screen

Adding

Open the menu window on the Home screen. Tap and hold down a frequently used application icon to add to the Home screen. While you are dragging the icon, the screen will switch to the Home screen.

Deleting

To delete applications icons on the Home screen, drag the icon that you want to delete into the recycle bin icon at the bottom of the screen.

- Add Icons
- Delete Icons

Widgets on the Home Screen

Adding

When you tap and hold down on a blank space of the Home screen, a window for adding widgets will appear. Select the widget that you want to add, and then the widget you selected will be added on the Home screen. While you are dragging the widget icon, the screen will switch to the Home screen.

Deleting

To delete widgets on the Home screen, drag the widget icon that you want to delete into the recycle bin icon at the bottom of the screen.

- Long Tab

Enlarging and Reducing the Screen

Enlarging and reducing

Tapping quickly the screen enlarges the screen. Tapping the screen again in the same manner reduces the screen. You can enlarge and reduce the screen consecutively. Dragging outwards with two fingers on the screen also enlarges the screen. Dragging inwards with two fingers on the screen reduces the screen.

- DoubleTab
- MultiTab

Connecting to the Internet

Connecting in Wi-Fi Zones

When a fan-shaped icon (Wi-Fi) is displayed on the indicator bar at the top of the screen, you can use the Internet free of charge. If you need to configure the Internet, please follow the procedures below.

- Select an application from the menu.
- Select an icon for setting the environment.
- Select wireless and network.
- Set Wi-Fi. (Enter security related information if necessary.)

Pictures

With IDENTITY tab, you can enjoy your pictures and manage the pictures by album. You can also rotate your pictures, apply various filter effects, and cut some part of the picture.

- All Pictures: View all the saved pictures.
- View Folder: View pictures by folder.
- My Album: Manage the pictures separately by adding albums.
- Slideshow: Enjoy a slideshow.

Browser

With IDENTITY tab, you can visit various web sites to search for information or bookmark favorite web sites. It also provides a Flash function and displays the Flash-based contents on a web page. Browser environments similar to those of PC are provided.
