Re: Transas M3 AIS transceiver – FCC application

Dear Sir or Madam,

Transas Marine International AB (TMI) hereby requests a new FCC ID number to be issued for its model M3 Class A AIS transceiver. The FCC ID number would be YUV-1806153.

The Transas M3 AIS transceiver is identical to the Class A AIS transceiver manufactured by Software Radio Technology Ltd. (SRT) with model number Poseidon 405-0002. The original FCC ID number is UYW-405-0002. The date of this original grant was May 12th, 2010.

No permissive changes have been made to the transceiver and the Transas M3 AIS transceiver is electrically and in design identical to the Poseidon 405-0002. Presently only the branding ( logo ) and the FCC ID labelling is different. Once the grant has been received the new FCC ID label will be affixed to the M3 AIS transceivers.

Enclosed you will find a statement from SRT indicating that the two transceivers are identical. The same test results as were achieved for the Poseidon transceiver are applicable to the M3 transceiver.

Also enclosed you will find the Transas M3 user guide, which will be updated with the new FCC ID number once approved.

Your quick processing of this application will be greatly appreciated.

Sincerely,

Paul Welling  
Sales Manager, Marine Technologies – TRANSAS USA  
On behalf of Transas Marine International AB

Best regards,

Anders Rydlinger  
Product Manager Navigation Systems
