Statement of Wireless LAN Function Disable

To: Federal Communications Commission
7435 Oakland Mills Road
Colombia MD 21046

Product: Mobile phone
Model No. : 101F
FCC ID: YUW-101F

Channels 12 and 13

The above device (mobile phone) has capability of Channels 12 and 13. These functions cannot be activated by the user in case the mobile phone is used or switched on in the United States. These channels disable upon PCS 1900 and W-CDMA Band V Mobile Country Code (MCC) checking. Channels 12 and 13 are not activated when mobile phone switched on in the United States or mobile phone switched on outside service area in both cases these functions are also not activated automatically.

When the mobile phone is inside the service area of a network, it will search all available networks. These functions are never activated in the United States where there is no commercial network for those services. While searching for the network the mobile phone does not transmit any signal.

Also, the user access to all functions related to Channels 12 and 13 will be disabled where it cannot detect networks having those services and this prevents the user from manually switching on these functions.

In case you have any question, please contact us,

Name and surname of applicant (or authorized representative):

Date:
