### RE: CONFIDENTIALITY REQUEST FOR FMG-3, FCC ID: YVDFMG3

To Whom It May Concern:

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. We have requested that the Schematic, Block Diagrams, Bill of Materials, and Technical Operation documents required to be submitted with this application be permanently withheld from public review.

Our product is marketed for DoD applications. It is part of a system that has won the U.S. Army's Next Generation Wireless Communications (NGWC) contract to monitor and track all goods that the U.S. Army ships. Technical information for this product cannot be released for public inspection.

We can't allow our competitors access to our proprietary information. Much of the technical documentation included with this application is the result of years of engineering. If it were made publicly available, our competitors could use it to bypass all of the NRE we have invested in our product and sell a knock-off for a fraction of the price.

Please contact me if there is any information you may need.

Sincerely,

Bryan Shah
