Information to User
To assure continued compliance, (example - use only shielded interface cables when connecting to computer or peripheral devices) any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Warranty Information

The Goldtouch Ergonomic Mouse is protected against defects by a one-year manufacturer warranty.

The Warranty is applicable to the original purchaser only and is non-transferrable. Goldtouch warrants that, at the time of purchase, the product will be in working order and will be free from defects in materials and workmanship. This Warranty does not apply to normal wear and tear, neglect, accidental damage, or modifications made by any unauthorized Goldtouch Service Representative. In the event that, during the one-year warranty period, the product is determined to be defective by an authorized Goldtouch Service Representative, the product should be returned for repair or replacement to the original place of purchase.

Ergonomic Design

Goldtouch designed this mouse with one thing in mind, putting comfort and control at your fingertips.

There is no need to adapt to a radically new mouse orientation to gain ergonomic benefits. Unlike mice and joysticks that require a completely vertical orientation of the hand, the Goldtouch Ergonomic mouse positions the hand and wrist in a naturally sloping angle.

- The patented, sloping design elevates the thumb and declines at a 24 degree angle toward the little finger.
- Design elements of the Top of the mouse are tailored to support the hand, wrist, and forearm in a natural position, minimizing pronation and supporting the hand in natural, at-rest position.
- Design elements of the thumb area of the mouse are tailored to greatly reduce stress on the thumb joints in response to increasing cases of RSI's related to improper and overuse of the thumb while texting and emailing from mobile phones, Blackberrys and PDA's.
- Design elements of the front of the mouse are tailored to support the natural curvature of the fingers in a relaxed, non-flexed state.
- Oversized buttons provide the maximum surface area to evenly distribute the work-force required for clicking.

Neutral hand posture, also known as the position of "repose" is the most relaxed and unstrained position for the hand. In this position, little muscle activity is present in the hand, wrist or forearm. The position of repose for the hand is with fingers slightly cupped and splayed, with the thumb forming a "C" shape with the index finger. The amount of pronation varies within individuals, but should be in the range of 10 to 45 degrees from the horizontal. This position is easily observed in a weightless environment, for example, while the hand is relaxed and suspended in a bath or swimming pool.

System Requirements

- Windows XP SP2 or later
- Windows Vista
- Windows 7
- Macintosh OS X 10.4 or later
- Available USB port or integrated Bluetooth adapter

Important Bluetooth Installation instructions

Please refer to the Quick Installation Guide before plugging in the included Bluetooth adapter.

Many newer PC's, Mac's and laptops have a built-in Bluetooth adapter, and do not require the use of the included adapter to support you new Goldtouch Ergonomic Mouse.

If you already use other Bluetooth devices on your computer, you do not need to install the included Bluetooth adapter, you may use any Bluetooth adapter that may have been provided with other external devices.

To determine if your computer has an imbedded Bluetooth adapter, please refer to the manufacturer's documentation.

For all Windows PC's the Device Manager will list the adapter under "Bluetooth Radios" if a Bluetooth adapter is present

Windows XP: In the Control Panel, there will be section titled Bluetooth Devices.

Windows Vista: In the Control Panel, go to the title, Network and Internet. If a Bluetooth adapter is installed, you will see a section titled Bluetooth Devices.

Windows 7: In the Control Panel, type "Bluetooth" in the "Search Devices and Printers" box.

Mac OS X: In System Preferences, you will see a Bluetooth icon in the Hardware section of the Window.

Goldtouch Bluetooth Mouse Quick Install Guide

The Goldtouch Bluetooth Mouse is designed to utilize Microsoft and Apple's built-in support for Bluetooth devices. There are no third-party drivers required to use the Goldtouch Bluetooth Mouse. This Quick Install Guide will walk you through the installation of the Bluetooth adapter and mouse by following some easy to follow instructions.

If your computer has a built-in Bluetooth adapter, then the adapter supplied with your Goldtouch Mouse is not necessary. You may skip the adapter installation steps in this guide and begin by pairing your device.

To put the mouse in pairing mode, simply press the recessed button on the bottom of the mouse using a paperclip or the tip of a pen.

WARNING!!!

It is strongly recommended that you DO NOT use the supplied Bluetooth adapter on your computer with a built-in Bluetooth adapter.
