Wireless Mouse

User Manual

Compliant model: MMY30/E01E

Precautions

This manual describes the important precautions you should take for safe operation of this product.
Observe these precautions carefully to avoid personal injury, damage, fire, and other problems.

Meaning of symbols

⚠WARNING

Failure to observe precautions carries the possibility of serious personal injury or death due to fire, electric shock, or other causes.

⚠CAUTION

* Screenshots will be replaced with the target language version's when they are all ready.
* XXX will be determined when they are all fixed.

Failure to observe precautions may result in personal injury due to electric shock or other causes, and may damage other equipment.

Prohibited action

Mandatory action

Situation that needs attention

Notes and reference information

⚠ WARNING

If a foreign object (water, metal chips) enters this product, stop using immediately and remove the battery.

Continuing to use the product as it is may cause a fire or an electric shock.

If abnormalities such as overheating, emitting smoke, or strange odors occur, stop using the product immediately and disconnect it from the connected device. Also, after confirming that there is no heat generation, please remove the battery from this product while being careful to avoid burns. Afterwards, please contact your dealer.

Continuing to use the product as it is may cause a fire or an electric shock.

Please do not drop or hit this product.

In the event that the product is damaged, cease usage immediately. Turn OFF the power and remove the battery. Afterwards, please contact your dealer.

Fires or electric shocks may occur if this product is used when damaged.

Do not attempt to disassemble, modify, or repair this product.

Doing so may cause a fire, electric shock, or product damage.

Malfunctioning is not covered under warranty.

Do not put this product in fire.

Breakage may cause fire or injury.

The receiver unit presents a swallowing hazard for children, so be sure to store it in a place out of the reach of children.

⚠ CAUTION

Do not place this product in any of the following environments:

・In a car exposed to sunlight or a place exposed to direct sunlight.
・In a place that becomes hot, such as around a heater.
・In a moist place or a place where condensation may occur.
・In an uneven place or a place exposed to vibration.
・In a place where a magnetic field is generated (such as near a magnet.)
・In a dusty place.

This product does not have a waterproof structure. Use or store in a place not exposed to liquids such as water.

Any liquid such as rain, water spray, juice, coffee, steam, and sweat, may cause this product to breakdown.

・Only use this mouse with PCs, smartphones, tablets, and video game systems.
・Do not use this product with any device that may significantly be affected in the case of this product malfunctioning.
・When you no longer need to use this product and the battery, be sure to dispose of them in accordance with the local ordinances and laws of your area.

Batteries

CAUTION

Please use either an AA alkaline battery, an AA manganese battery or an AA nickel-metal hydride rechargeable battery.

When not using this product for long periods of time, remove the battery.

Not removing them may cause leakage or malfunction.

Cleaning the Product

If the body of this product becomes dirty, wipe it with a soft, dry cloth.

Using a volatile liquid such as paint thinner, benzene or alcohol may affect the material quality and/or discolor this product.

Please note the following for disinfection.

Gently soak a cleaning cloth, such as a microfiber cloth, in the disinfectant solution. Make sure there are no loose droplets and gently wipe the product using the cloth.
After wiping, dry thoroughly and wipe off any residual liquid.
* Do not spray any liquid onto the product directly. Doing so can cause electric malfunctions.

⚠ IMPORTANT

Do not spray any liquid onto the product directly.

Doing so can cause electric malfunctions.

Do not use organic solvents or expose the product to ultraviolet light.

Usage can result in deterioration of the housing components or paints, which can cause damage to the exterior.

We recommend using disposable gloves.

When using any alcohol-based products, please check that it is appropriate for the specific purpose and that it is used properly.

Please ensure to turn off any connected devices.

* When in sleep or hibernation mode, turn off connected devices.
* Please unplug the AC adapter and power cable from the outlet.

- Please note that the customer is fully responsible for repair costs in the event that the product is damaged or operates abnormally due to the disinfection process.
- It is recommended that you sanitize your hands before and after using PCs and peripherals that are used by multiple people to prevent the spread of infection through the equipment.

Cautions for Wireless Equipment

This product is a wireless device that can use the entire 2.4 GHz band, and is able to avoid the mobile entity identification device range. The GFSK method is adopted as the radio wave method, and the interference distance is 10 m. The 2.4 GHz band is also used in medical devices, Bluetooth, and wireless LAN devices of the IEEE 802.11b/11g/11n standards.

- Before using this product, check that there are no other “radio stations”* operating nearby.
- If electromagnetic interference occurs between this product and other “radio stations”*, move this product to another location or stop using this product.

* Other "radio stations" refer to industrial, scientific and medical devices using the 2.4 GHz band, the same as this product, other radio stations of this type, licensed radio station premises for a mobile object identification system that is used in factory production lines, certain non-licensed low power radio stations, and amateur radio stations.

⚠ WARNING

・Do not use in equipment which may cause serious effects due to it malfunctioning. There are rare cases in which an external radio wave at the same frequency, or the radio wave emitted from a mobile phone, causes this product to malfunction, slow down, or fail to operate.

・Do not use this product in places where radio wave usage is prohibited, such as hospitals. Radio waves of this product may affect electronic devices and medical devices (for example pacemakers).

・Due to the possibility of hindering safe navigation of aircraft, use of wireless mouse in aircraft is prohibited by the Civil Aeronautics Act. Turn off the power of the wireless mouse before boarding and do not use after boarding.

* ELECOM is not liable for any accidents or any indirect or consequential damage incurred due to the failure of this product.

How to use

Items included in this package

The following are included in this package. Verify the package to ensure all items are accounted for prior to using this product. While every effort has been made to ensure proper packaging, in the event that any shortage or damage is discovered, please contact the retailer where the product was purchased.

- **Mouse × 1**
- **Receiver unit x 1**

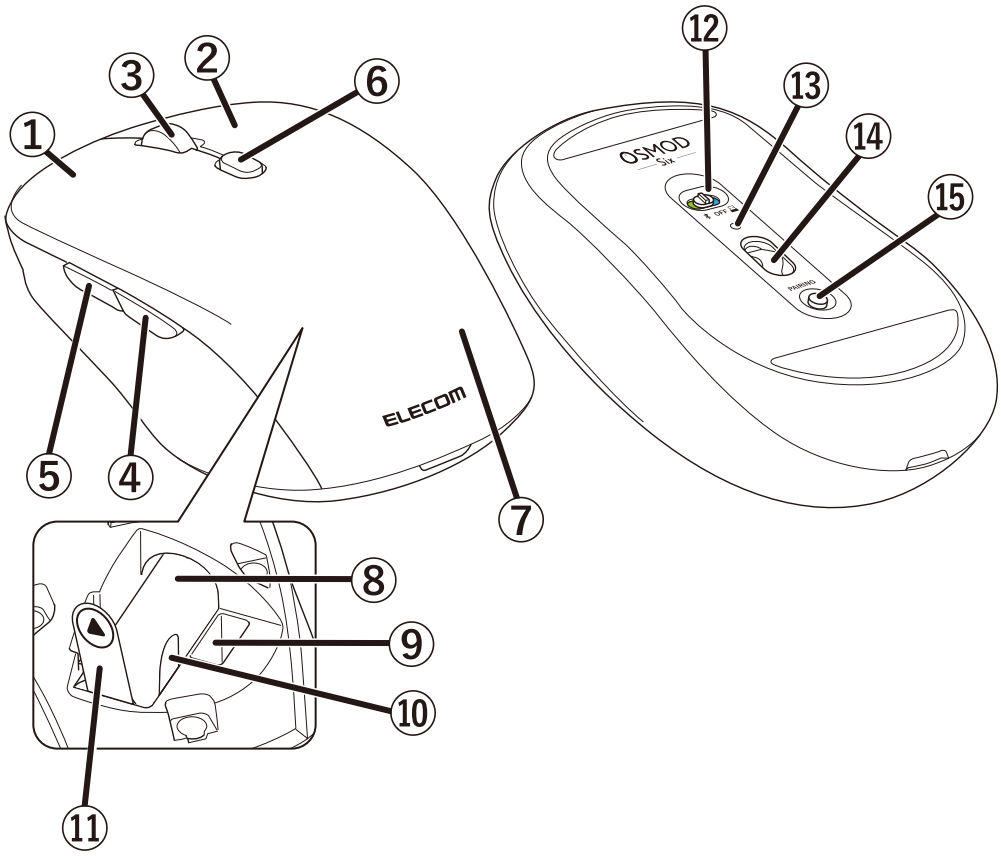
At the time of shipment, it is stored in the mouse. Please remove before use.

- **AA alkaline battery for confirming operability × 1**

It is pre-inserted in the mouse body. Please remove the battery insulating pull tab before use.

Name and function of each part

■Mouse



① Left button

To left click on your PC.

② Right button

To right click on your PC.

③ Wheel

Rotate forward and backward or click like a button to operate your PC.

④ “Back” button

Performs the “Back” function on the Web browser.

⑤ “Forward” button

Performs the “Forward” function on the Web browser.

"Forward" button
Continue to next page.

"Back" button
Return to previous page.

You will need to install the “ELECOM Mouse Assistant Mac version” from our website to use the “Back” and “Forward” button on Mac. Refer to “Install ELECOM Mouse Assistant”.

⑥ Multi-function button

Functions can be assigned to this button. At the time of purchase, no functions have been assigned.

In order to assign functions to buttons, download and install “ELECOM Mouse Assistant” from our company website. Refer to “Install ELECOM Mouse Assistant”.

⑦ Battery cover

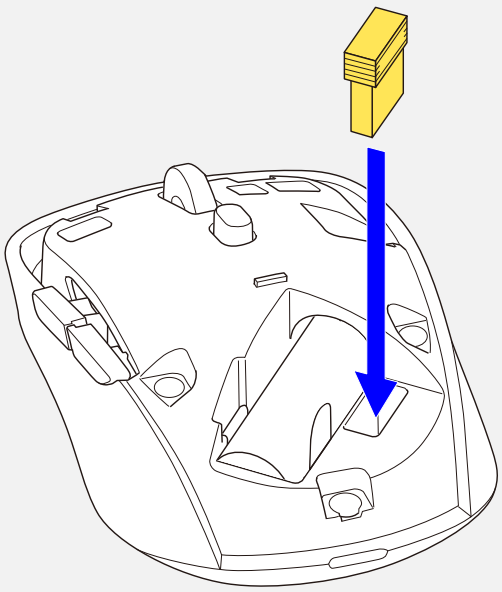
Remove this cover and insert the battery.

⑧ Battery storage compartment

Holds the battery.

⑨ Receiver unit storage compartment

The receiver unit can be stored here when the mouse is not connected wirelessly.



⑩ Battery removal sheet

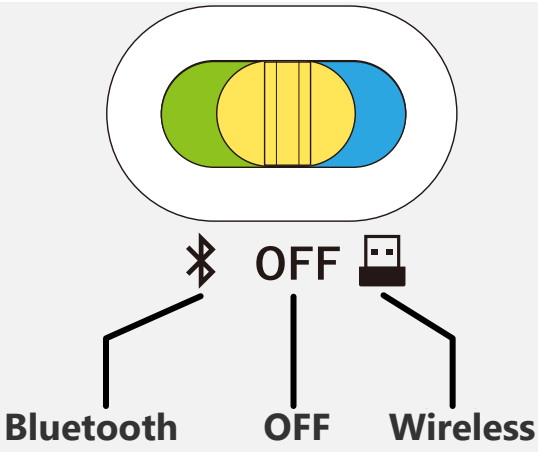
Used to remove the battery from the battery storage compartment.

⑪ Battery insulating tab

Remove this tab before using.

⑫ Power/connection selection switch

Slide to the side to turn on the power in Bluetooth mode.
Slide to the side to turn on the power in Wireless mode.
Slide to the OFF position to turn off the mouse.



⑬ LED light

- This will blink slowly when the mouse is switched ON.
  : Blue
  : Green
- During pairing standby state, the LED light will blink blue quickly. If the pairing is successful, it will light up blue for 3 seconds.
- The LED light blinks red rapidly for 5 seconds when the battery runs low during use

⑭ Optical sensor

The LED light will light up blue when the power is on.

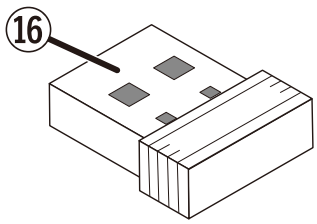
This sensor will detect mouse movements when you move the mouse.

* Please note that looking directly into the sensor light may hurt your eyes.

⑮ Pairing button

- Pair this product with your PC's Bluetooth module or a Bluetooth adapter.
  Press and hold for 3 seconds during Bluetooth pairing to enter pairing mode.

■Receiver unit



⑯ USB-A plug

Connects to the PC USB-A port.

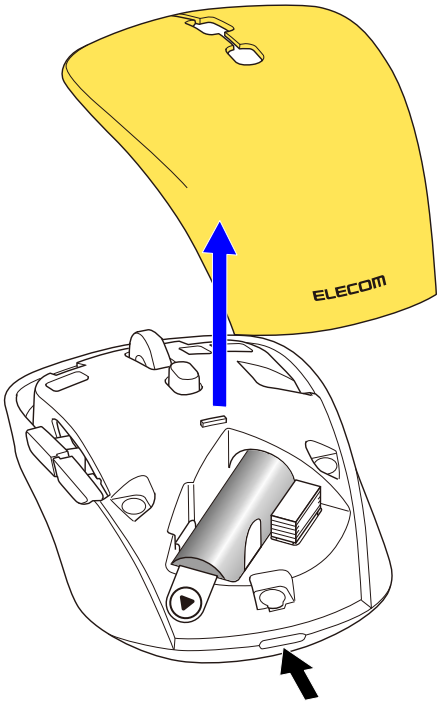
Connecting and setting up the mouse

Windows®

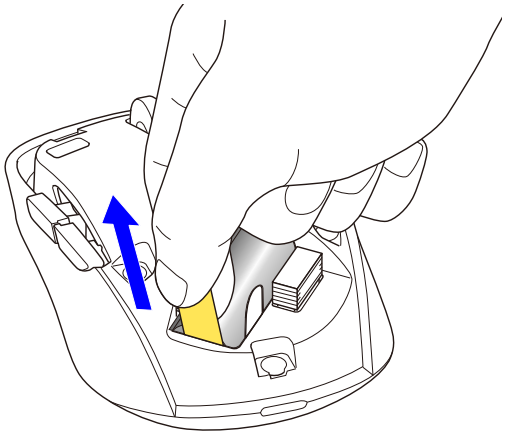
Using Bluetooth connection

1. Remove the battery insulating tab.

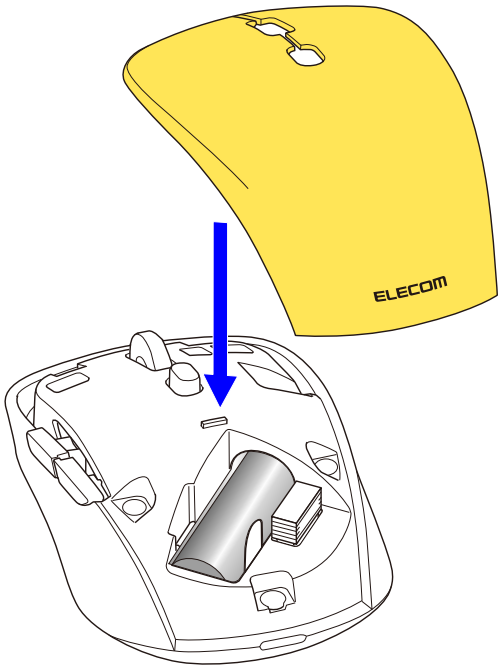
1) Remove the battery cover.



2) Remove the battery insulating tab.

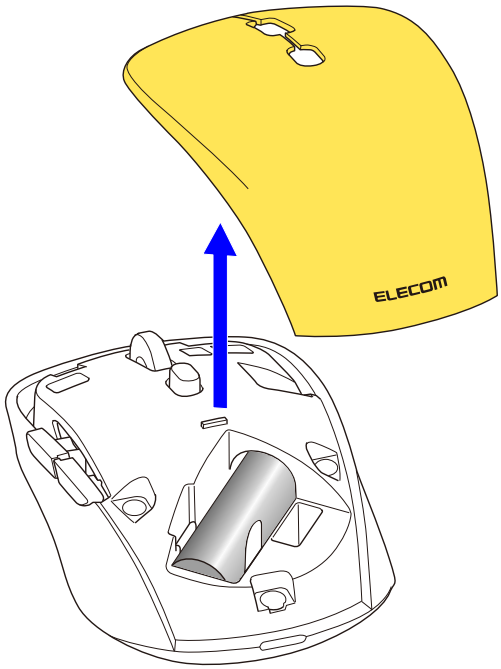


3) Put the battery cover back on.



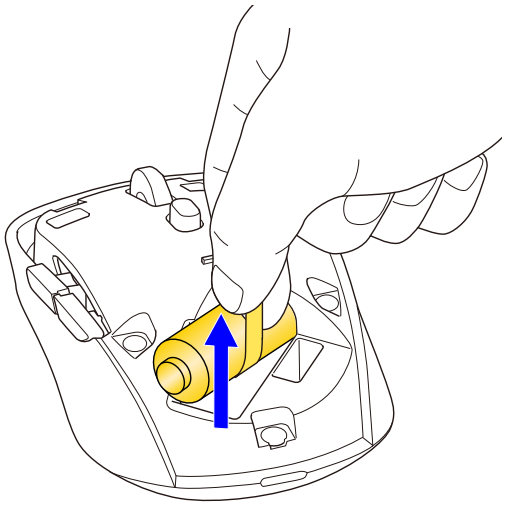
Replacing the battery...

1) Remove the battery cover.

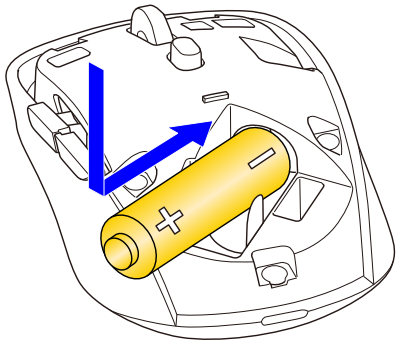


2) Remove the battery.

Pull the battery removal sheet to remove the battery.

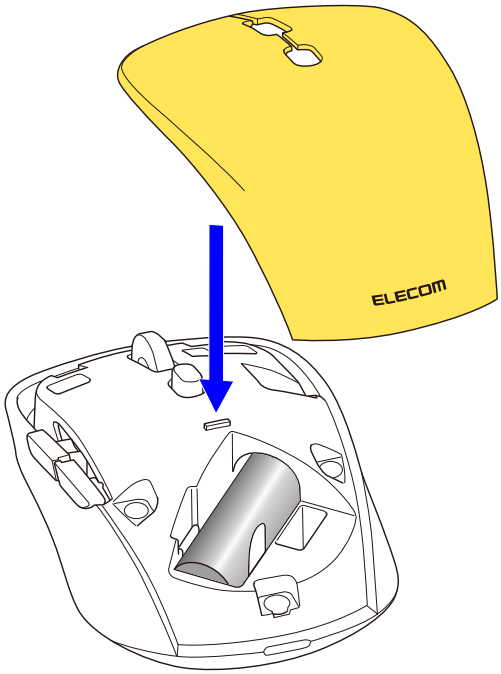


3) Insert the battery with the negative (-) side facing back.



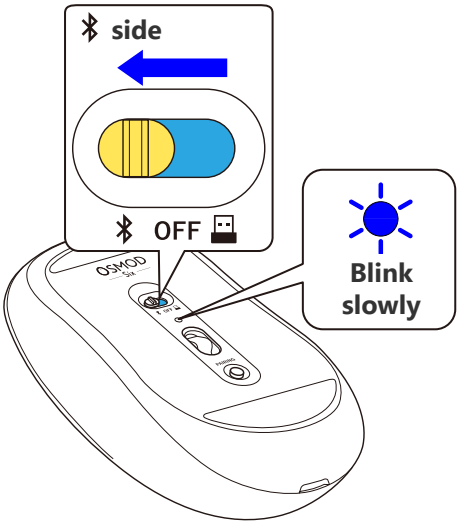
Ensure that the battery is inserted with the positive (+) and negative (-) terminals oriented correctly.

4) Put the battery cover back on.



2. Turn the power ON

1) Slide the power/connection switch on the underside of the product to the position.



The LED light will blink blue slowly.

* The LED will blink red for 5 seconds when the battery runs low.

- **When the power/connection switch is slid to for the first time**

Pairing mode is enabled and the LED light blinks quickly in blue.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

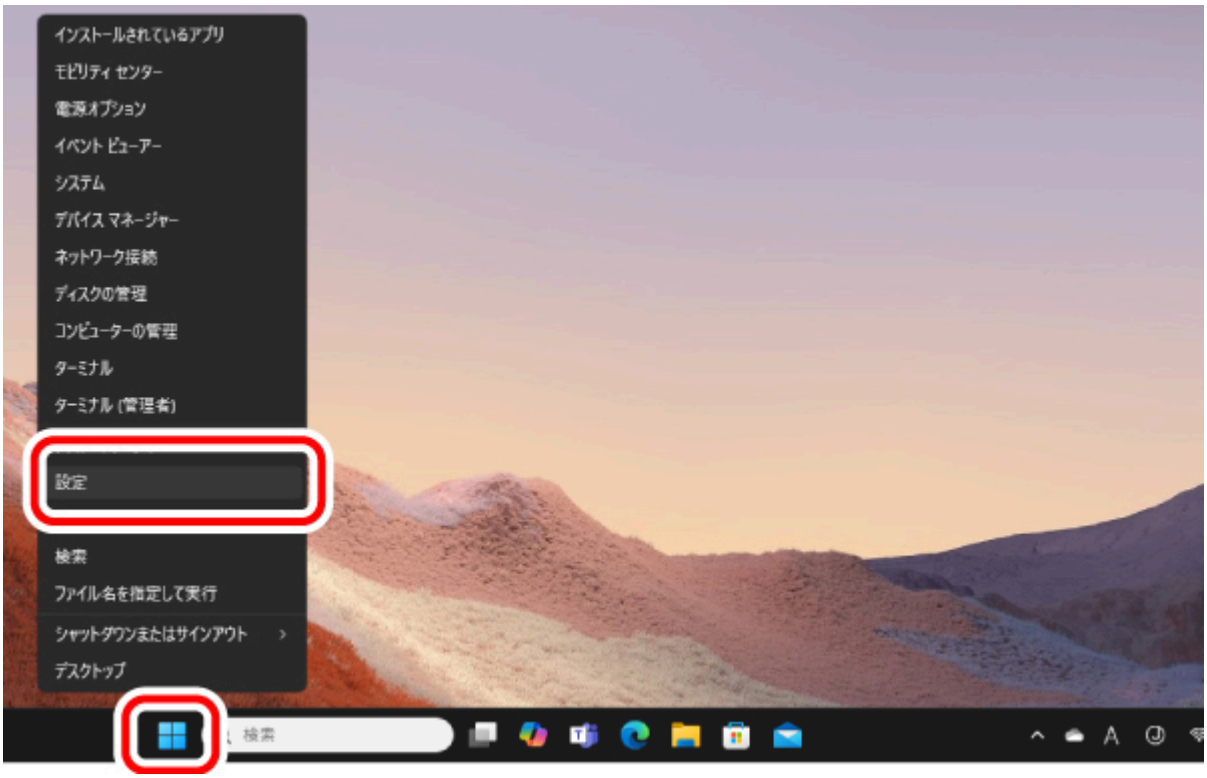
* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

3. Pairing with a PC

- Pairing involves registering Bluetooth devices (in this case, this product and your device) with each other, and authorizing a connection between them.
- This section covers Windows standard Bluetooth functions. Depending on your device or Bluetooth adaptor, unique Bluetooth functions may be used. Please read the respective manuals for each function.
- Please carry out the pairing operation using your current mouse or touchpad on your device.
- The following instructions are for Windows 11 (23H2).

1) Right click on “Start” on the bottom of the screen and then, click on “Settings”.

The “Settings” page will appear.

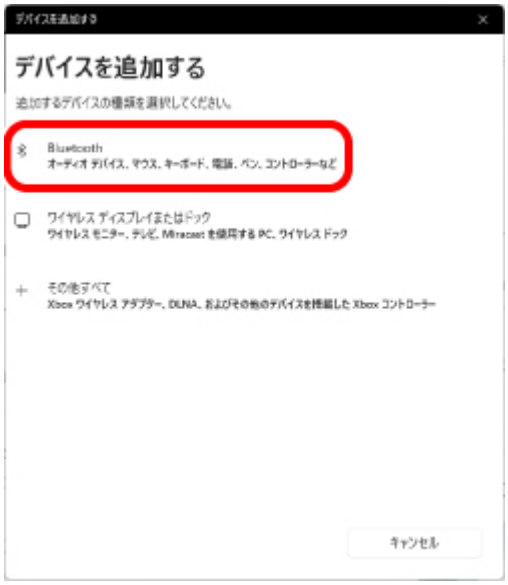


2) Under "Home", click "Add device" under "Bluetooth devices".

The “Add a device” page will appear.

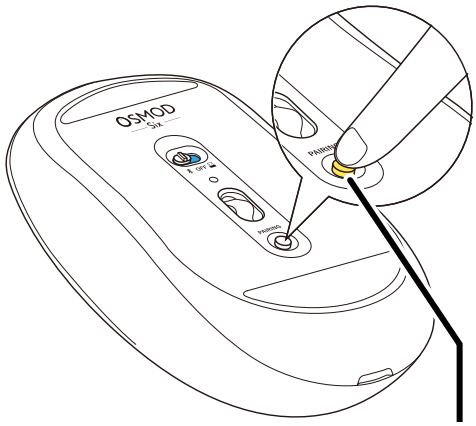
If “Bluetooth” is off, turn it on.

3) Click “Bluetooth”.



4) When the “Add a device” screen is displayed, hold down the PAIRING button on the underside of this product for 3 seconds and then release.

Pairing mode is enabled and the LED light blinks quickly in blue.



PAIRING button

6) Click on “ELECOM OSMOD Six”.

Pairing begins.

7) When the message changes to “Your device is ready to go!”, click “Done”.

8) Pairing is complete when this product is added to “Bluetooth devices” and the status is “Connected”.

The LED light will turn on for 3 seconds then turn off.

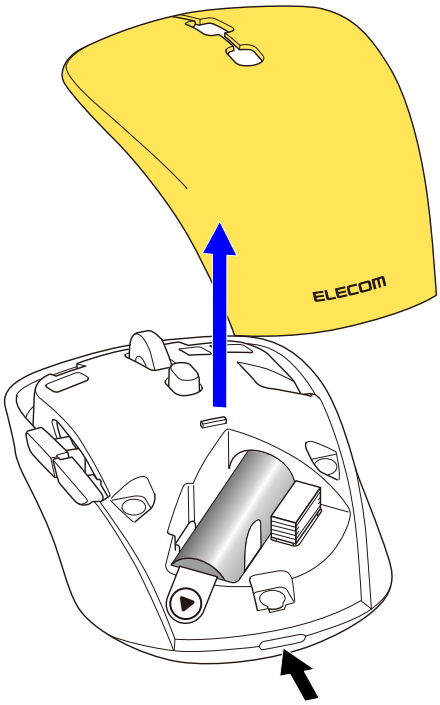
You can now use the mouse.

By downloading and installing the "ELECOM Mouse Assistant" from our company website, functions such as button assignment function and presentation mode can be used. Please proceed to “Install ELECOM Mouse Assistant”.

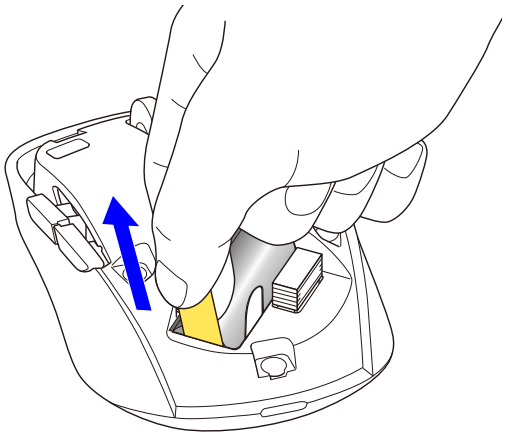
Using wireless connection

1. Remove the battery insulating tab.

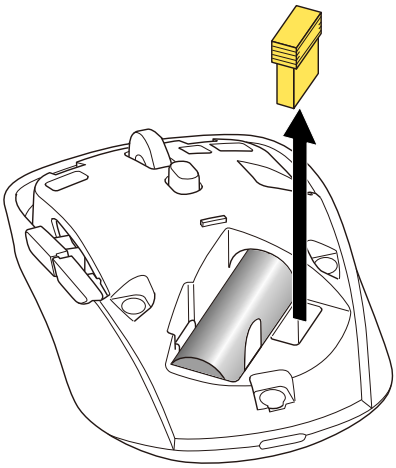
1) Remove the battery cover.



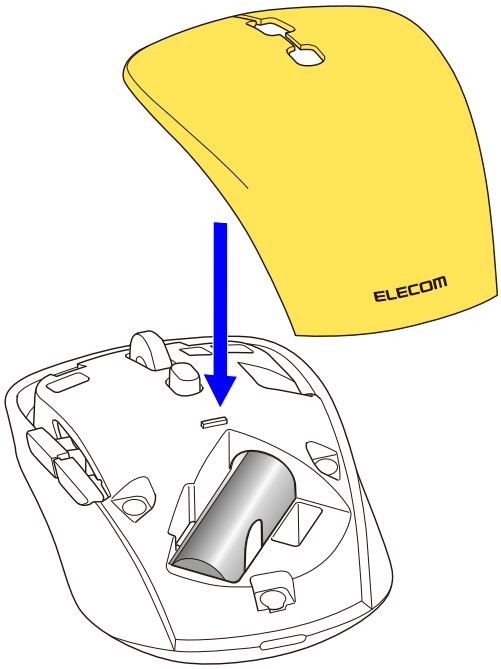
2) Remove the battery insulating tab.



3) Remove the receiver unit.

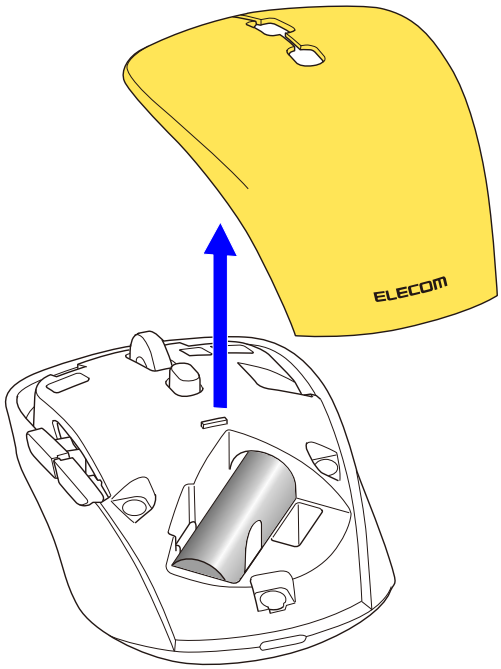


4) Put the battery cover back on.



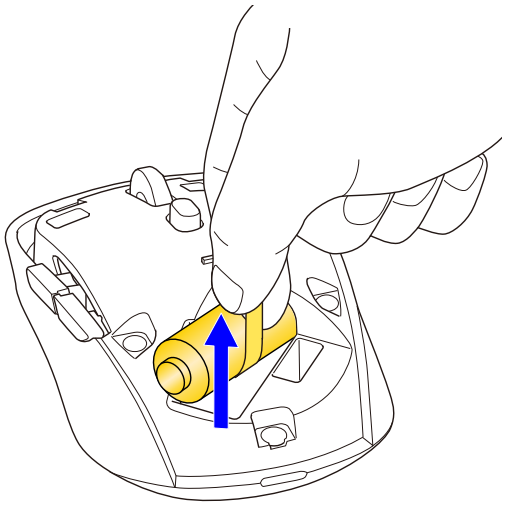
Replacing the battery...

1) Remove the battery cover.

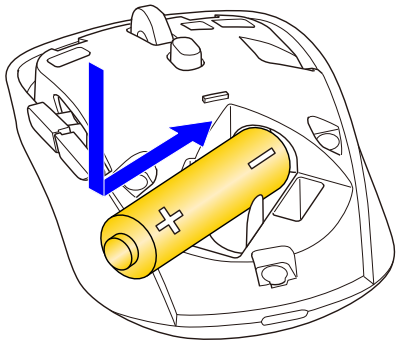


2) Remove the battery.

Pull the battery removal sheet to remove the battery.

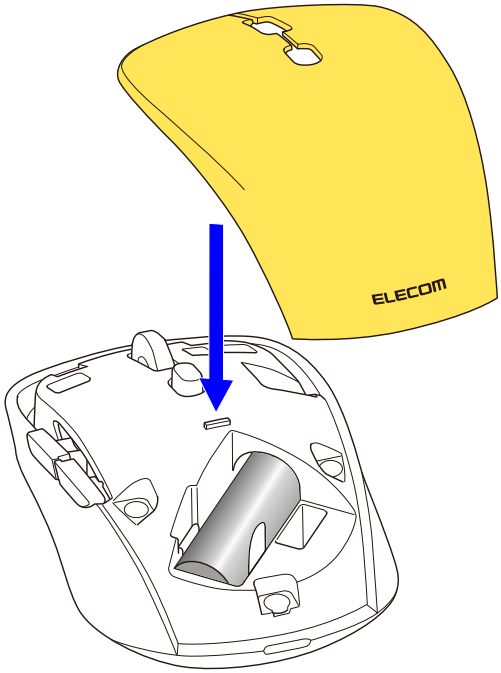


3) Insert the battery with the negative (-) side facing back.



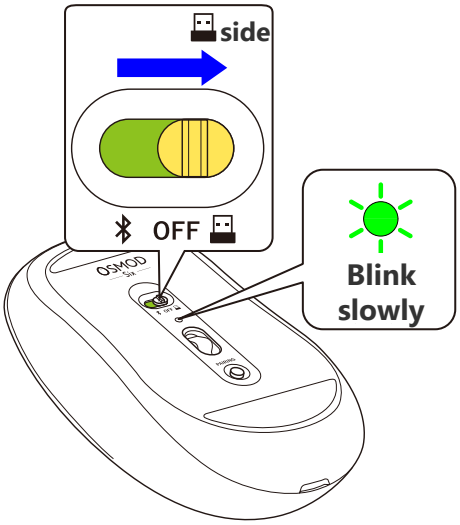
Ensure that the battery is inserted with the positive (+) and negative (-) terminals oriented correctly.

4) Put the battery cover back on.



2. Turn the power ON

1) Slide the power switch on the underside of the product to the position.



The LED light will blink green slowly.

* The LED will blink red for 5 seconds when the battery runs low.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

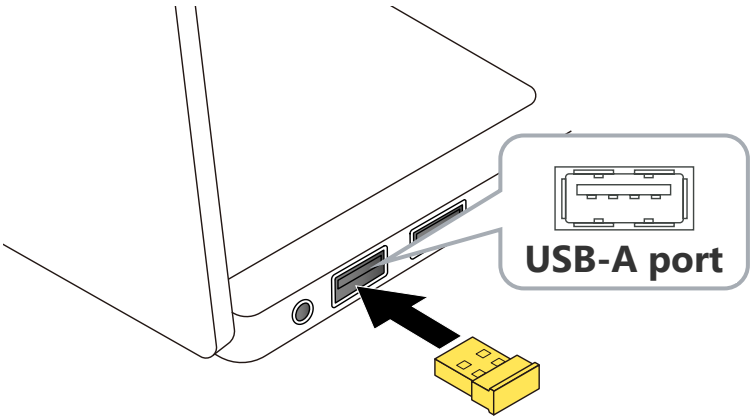
* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

3. Connect to a PC

1) Start up your PC.

Please wait until the PC has started up and can be operated.

2) Insert the receiver unit into the PC's USB-A port.



You may use any USB-A port.

- Ensure that the connector is correctly oriented to the port.
- If there is strong resistance when inserting, check the shape and orientation of the connector. Forcibly inserting the connector may damage the connector, and there is a

risk of injury.
- Do not touch the terminal portion of the USB connector.

When removing the receiver unit

This product supports hot plugging. The receiver unit can be removed while the PC is on.

4) The driver will be automatically installed, and you will then be able to use the mouse.

You can now use the mouse.

By downloading and installing the "ELECOM Mouse Assistant" from our company website, functions such as button assignment function and presentation mode can be used. Please proceed to “Install ELECOM Mouse Assistant”.

Change the mouse pointer speed

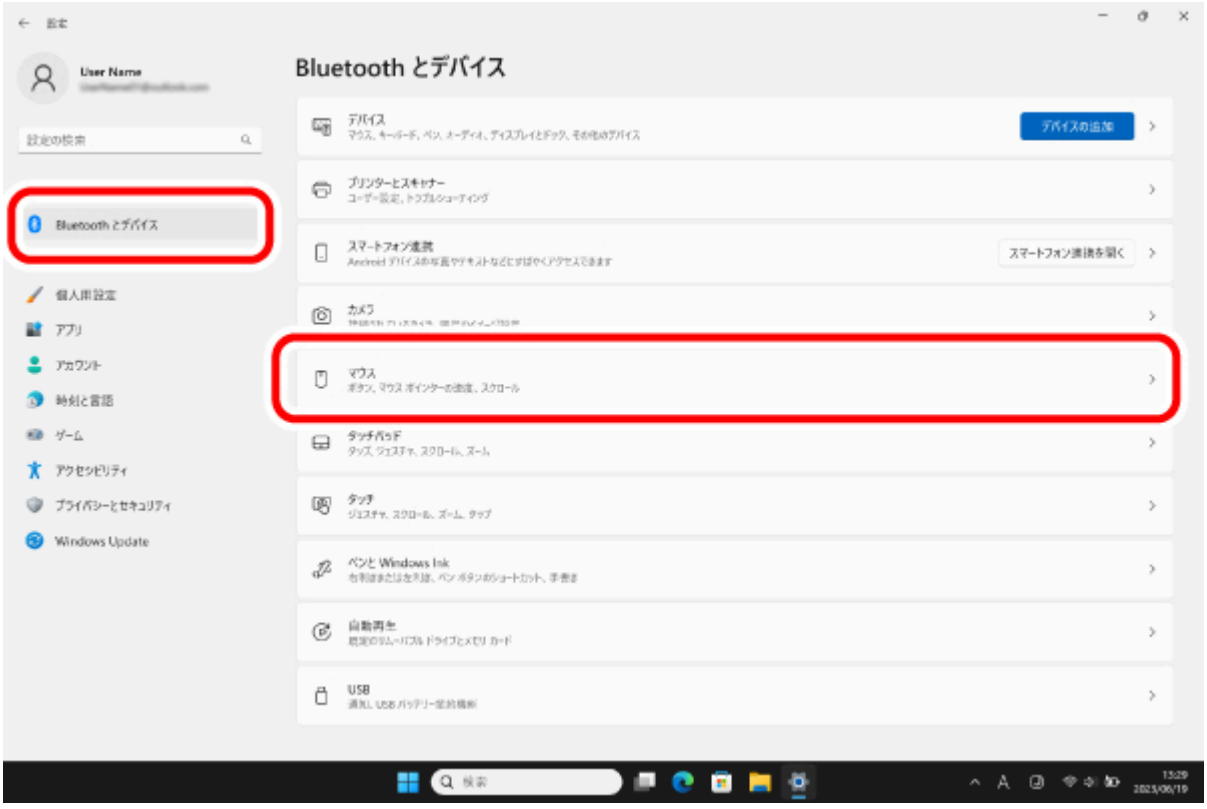
Adjust the mouse pointer movement speed on your PC if the mouse pointer moves too fast or too slow.

■ For Windows 11

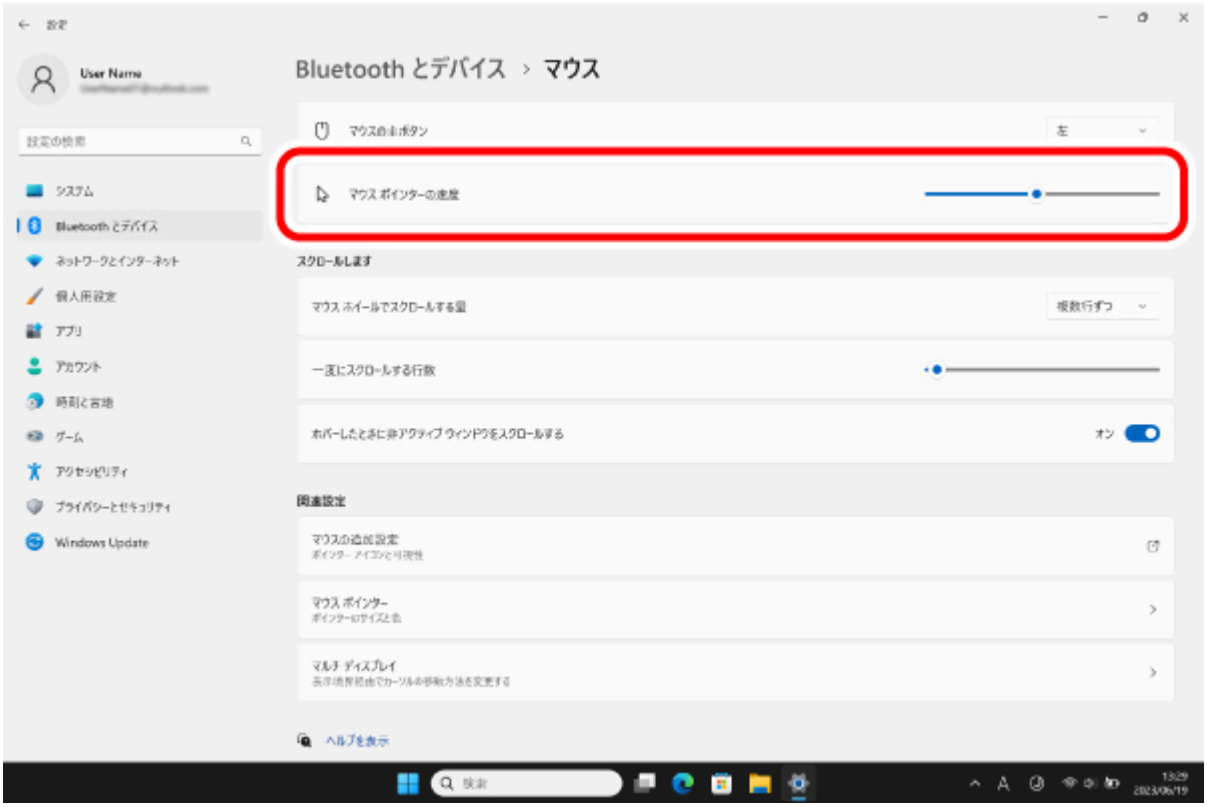
1) Click on “Start” on the bottom of the screen and click on “Settings”.

The “Settings” page will appear.

2) Click on “Bluetooth & devices” and then “Mouse”.



3) Adjust the “Mouse pointer speed” slider bar to adjust the mouse pointer movement speed.



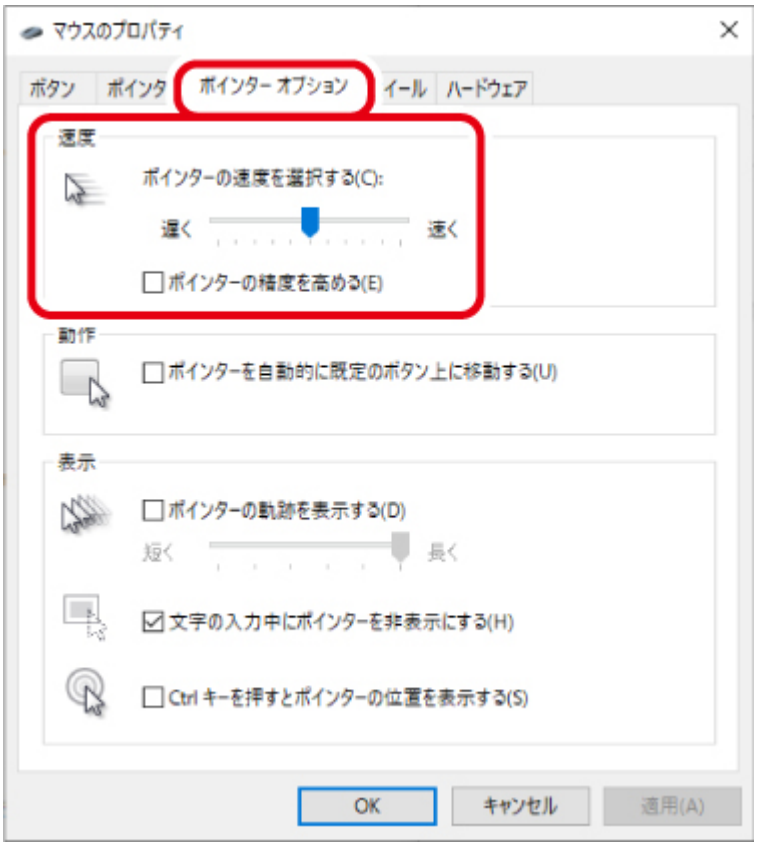
■ For Windows 10

1) Open “Mouse” properties.

From the start menu, click the Settings icon, select “Devices” → “Mouse”, then click “Additional mouse options” under “Related Settings”.

2) Select the “Pointer Options” tab.

3) Adjust the “Select a pointer speed” slider bar to adjust the mouse pointer movement speed.



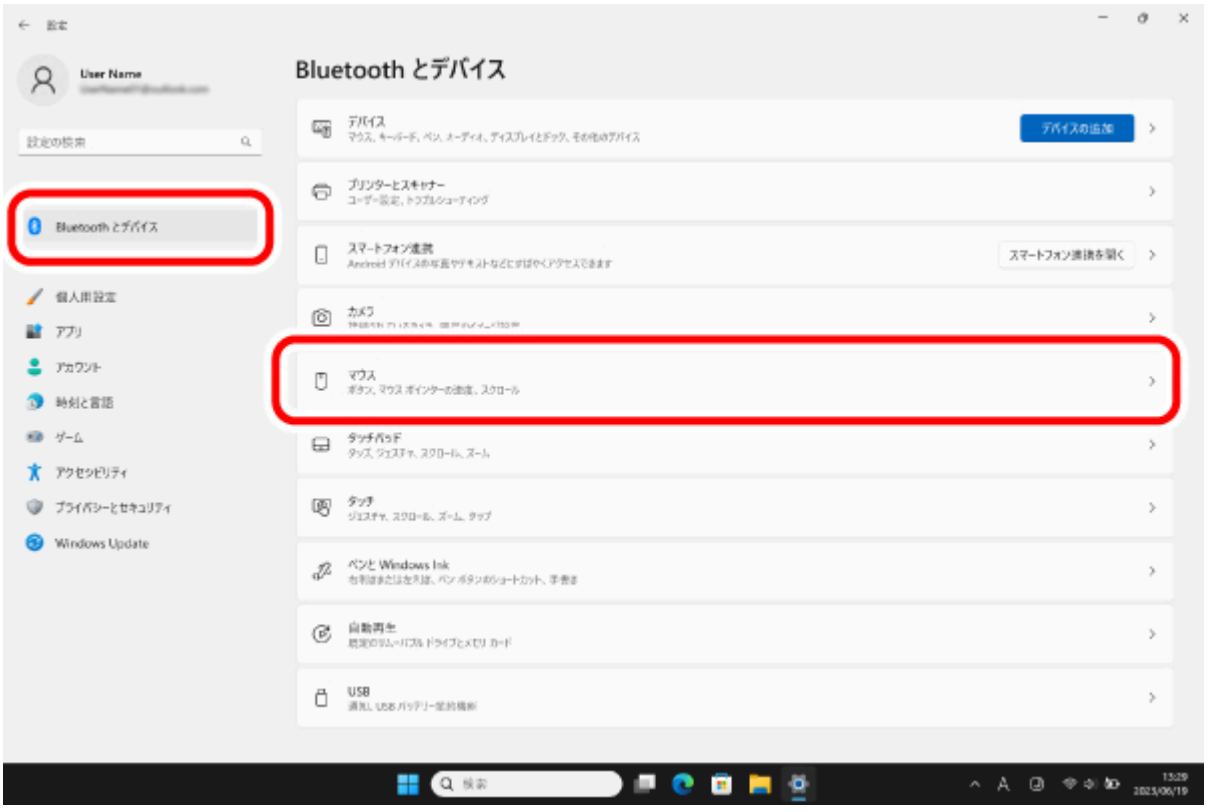
Change the number of lines scrolled in one wheel turn

■ For Windows 11

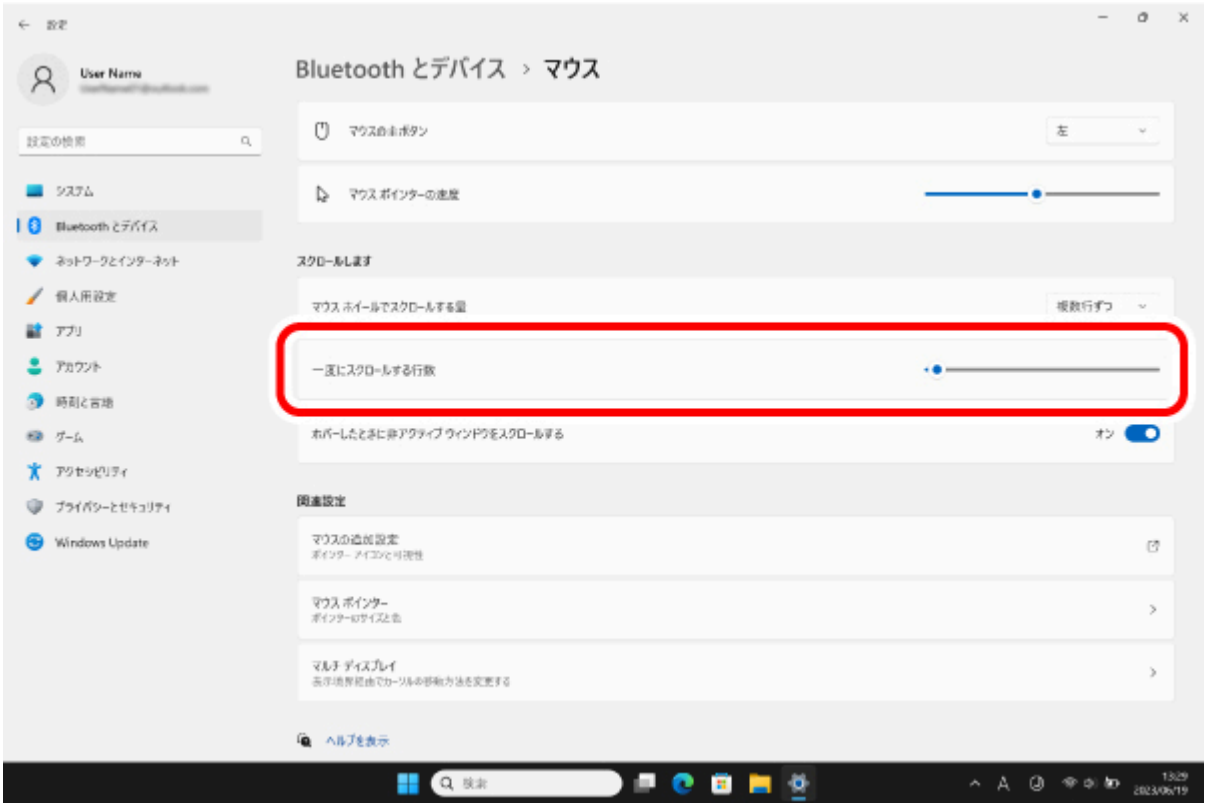
1) Click on “Start” on the bottom of the screen and click on “Settings”.

The “Settings” page will appear.

2) Click on “Bluetooth & devices” and then “Mouse”.



3) Adjust the “Lines to scroll at a time” slider bar to adjust the number of lines per scroll.



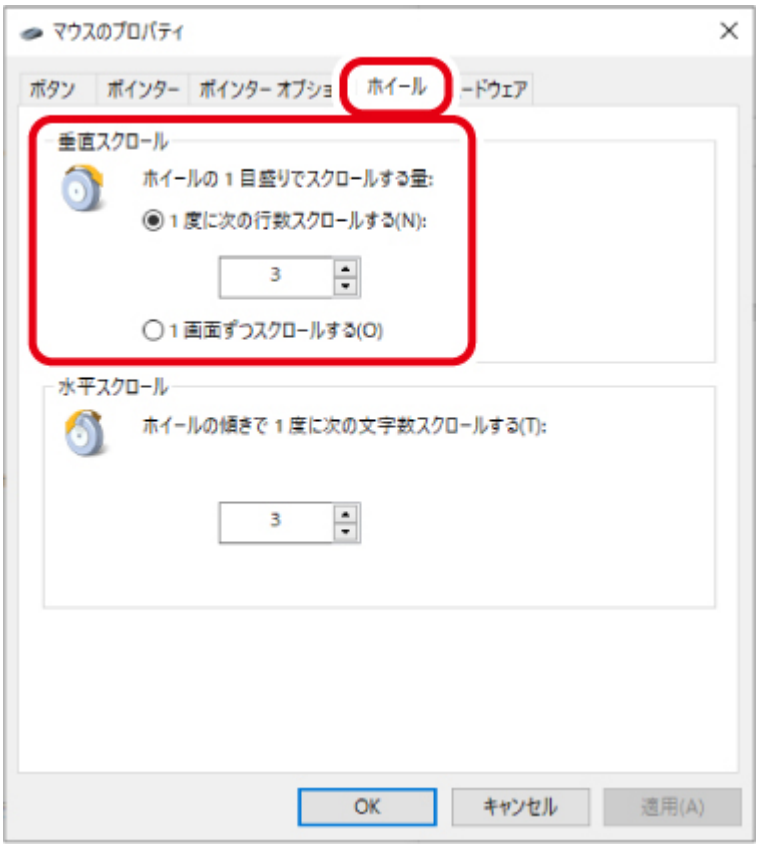
■ For Windows 10

1) Open “Mouse” properties.

From the start menu, click the Settings icon, select “Devices” → “Mouse”, then click “Additional mouse options” under “Related Settings”.

2) Select the “Wheel” tab.

3) Change the value of “The following number of lines at a time” under “Roll the wheel one notch to scroll”

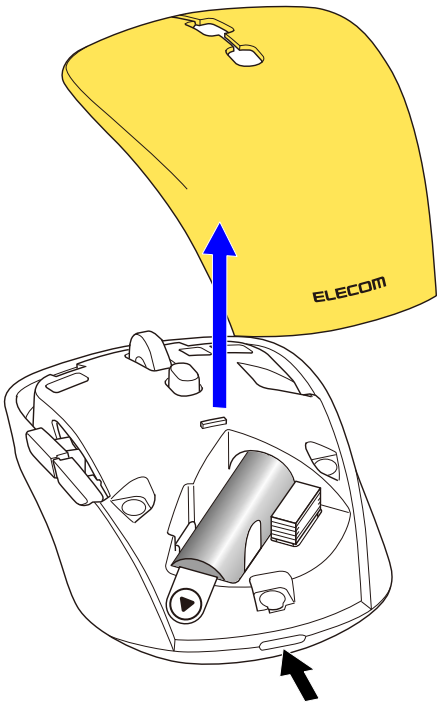


Mac

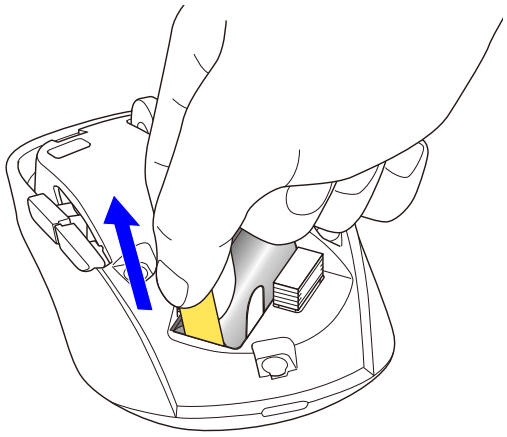
Using Bluetooth connection

1. Remove the battery insulating tab.

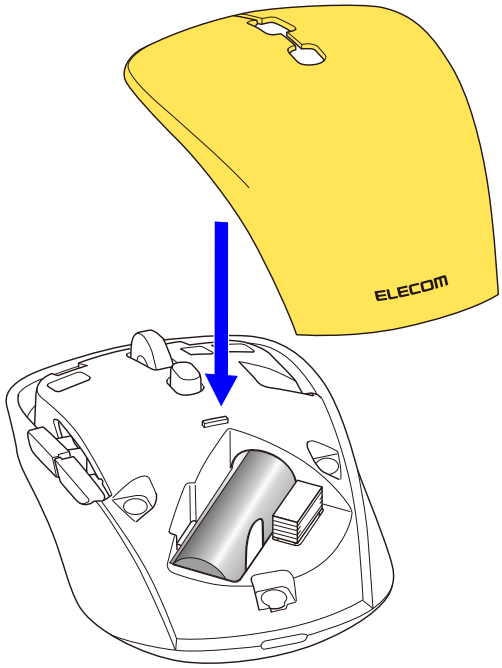
1) Remove the battery cover.



2) Remove the battery insulating tab.

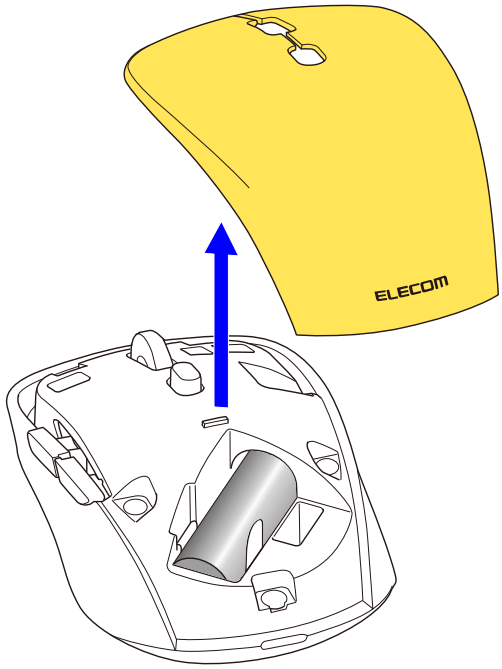


3) Put the battery cover back on.



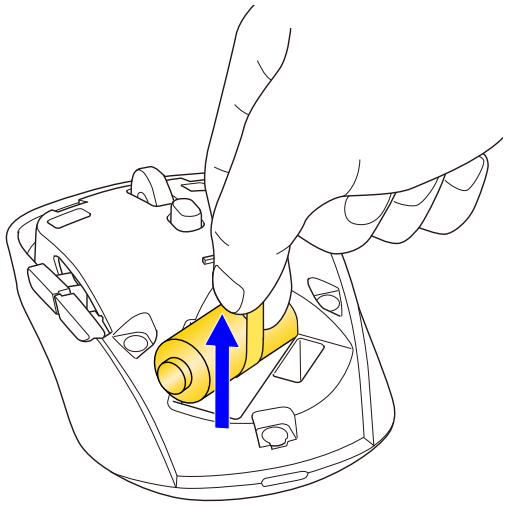
Replacing the battery...

1) Remove the battery cover.

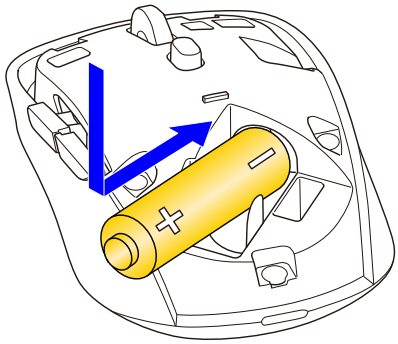


2) Remove the battery.

Pull the battery removal sheet to remove the battery.

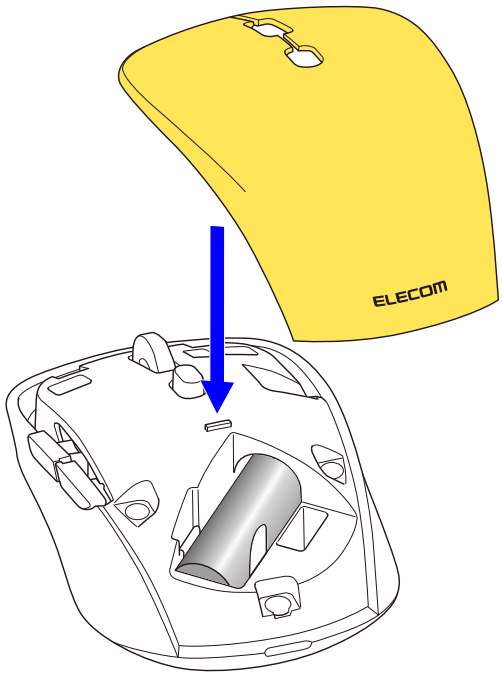


3) Insert the battery with the negative (-) side facing back.



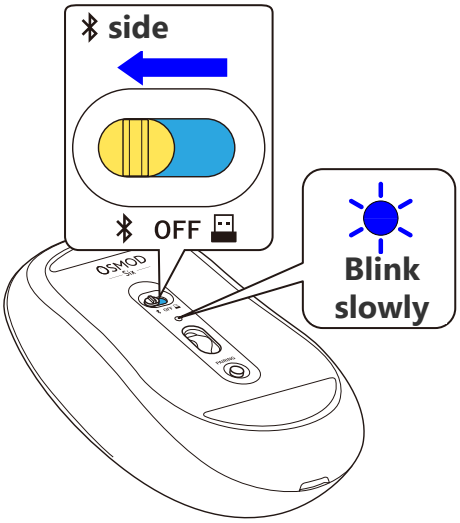
Ensure that the battery is inserted with the positive (+) and negative (-) terminals oriented correctly.

4) Put the battery cover back on.



2. Turn the power ON

1) Slide the power/connection switch on the underside of the product to the position.



The LED light will blink blue slowly.

* The LED will blink red for 5 seconds when the battery runs low.

- **When the power/connection switch is slid to for the first time**

Pairing mode is enabled and the LED light blinks quickly in blue.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

3. Pairing with a PC

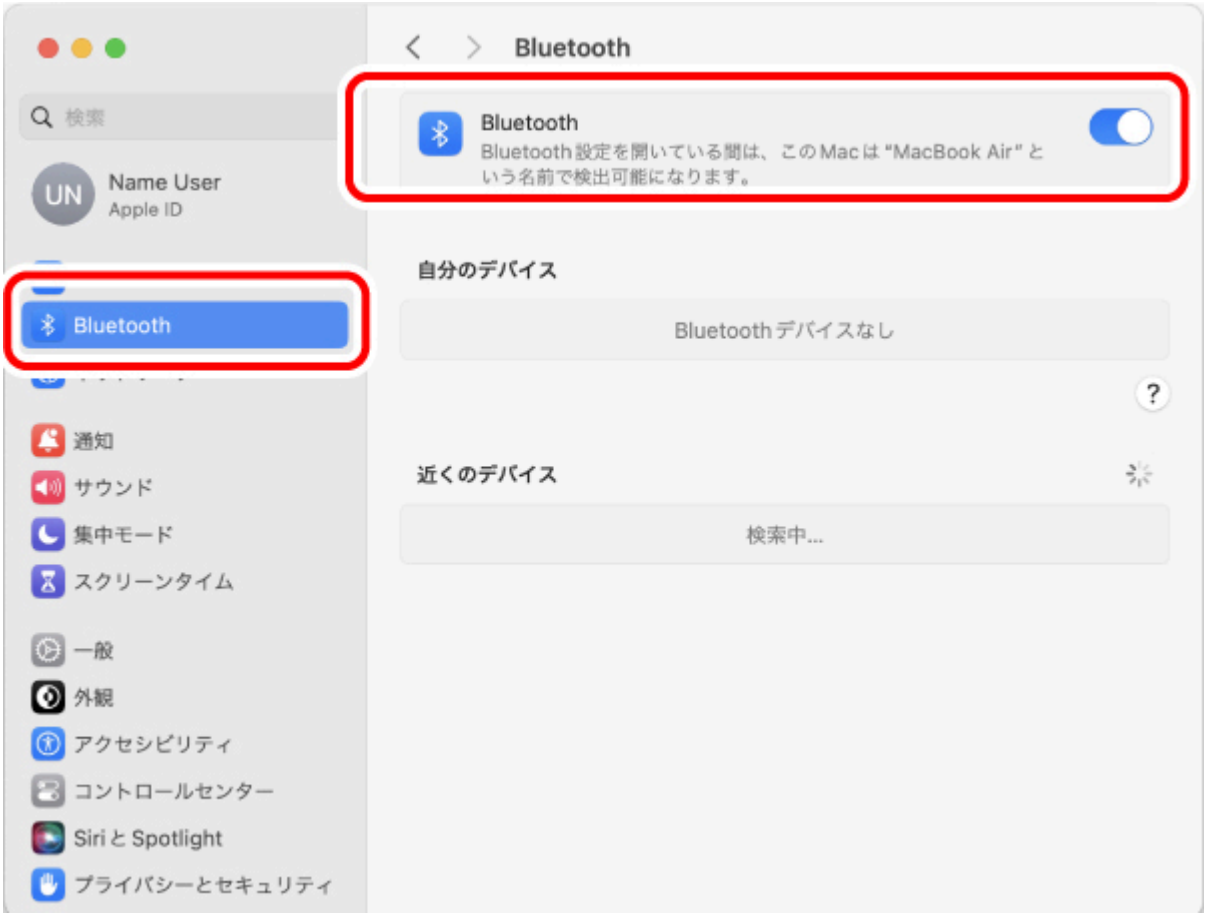
- Pairing involves registering Bluetooth devices (in this case, this product and your device) with each other, and authorizing a connection between them.
- This section covers macOS standard Bluetooth functions. Depending on your device or Bluetooth adaptor, unique Bluetooth functions may be used. Please read the respective manuals for each function.
- Use your current mouse or the touchpad on your device to operate your device until pairing is complete.
- The following instructions are for macOS Sonoma (14).

1) From the Apple menu, click on “System Settings...”

The “System Settings” page will appear.

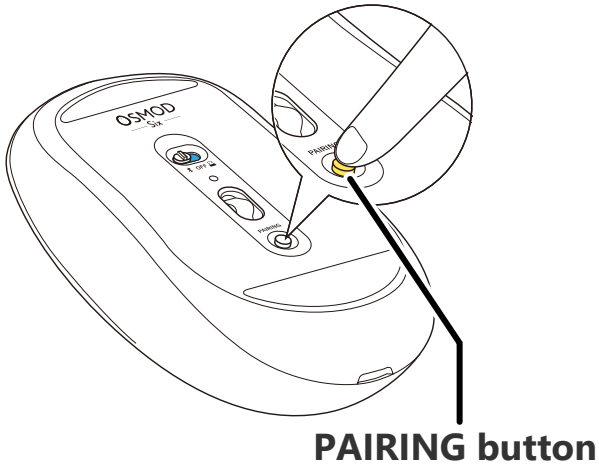
2) Click on “Bluetooth” to turn on “Bluetooth”.

The “Bluetooth” system settings page will appear.



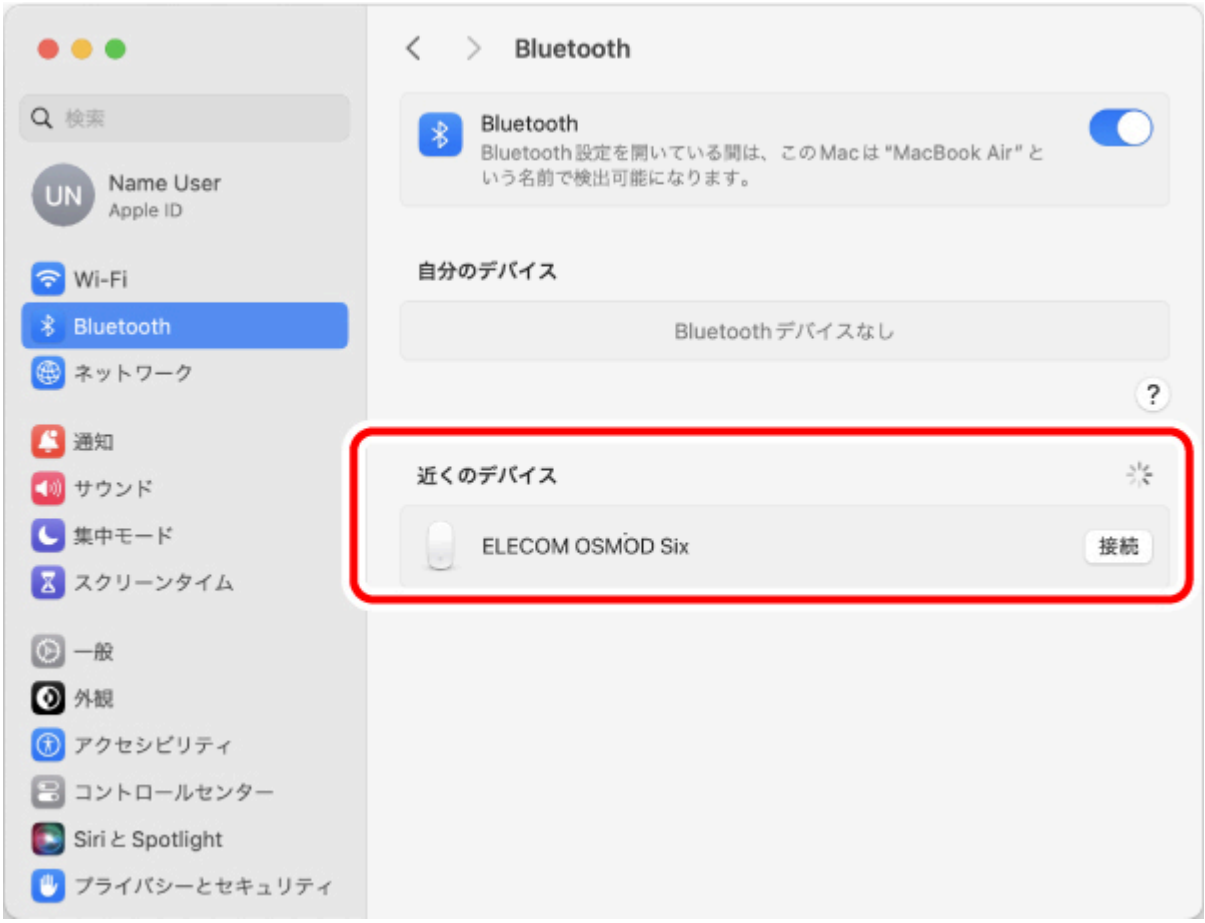
3) During the device search, hold down the PAIRING button on the underside of this product for 3 seconds and then release.

Pairing mode is enabled and the LED light blinks quickly in blue.



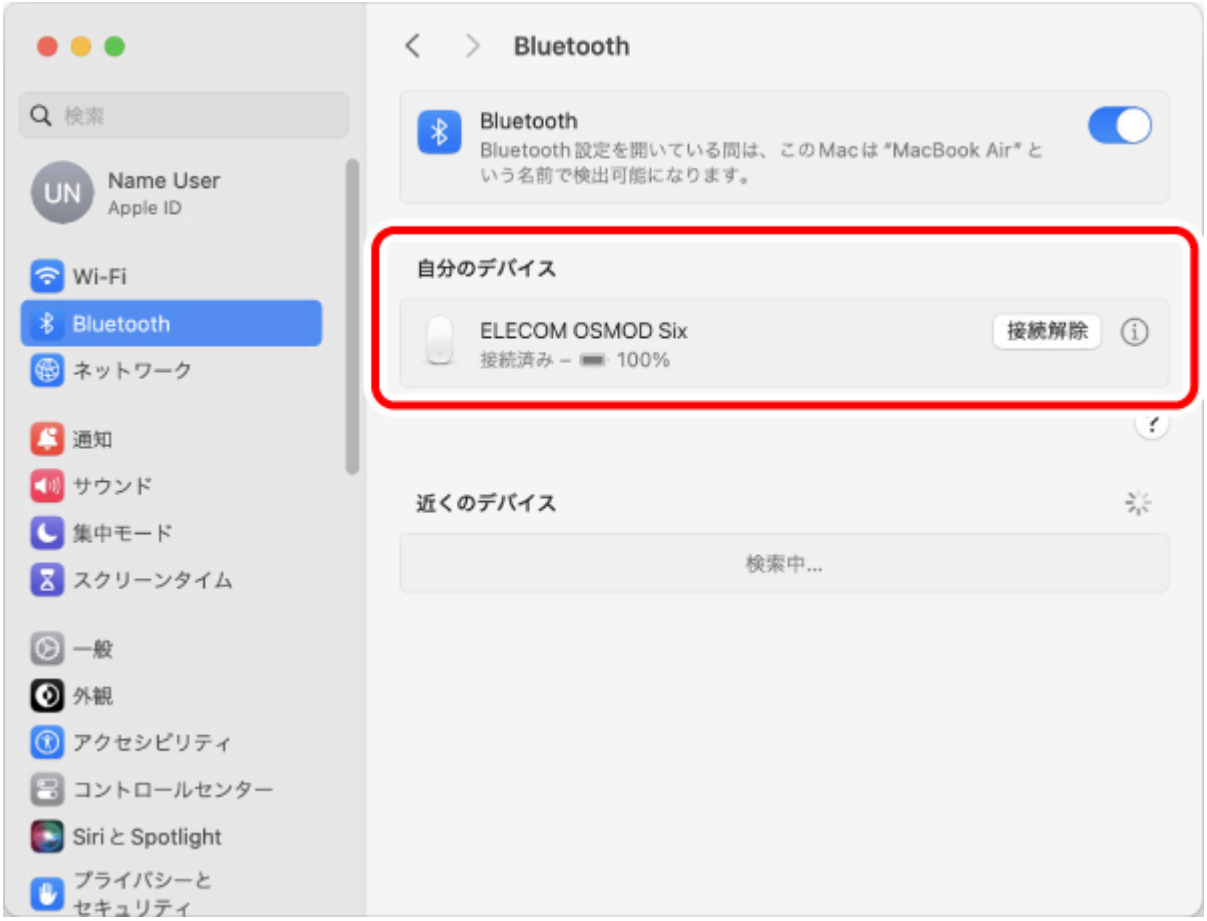
5) When "ELECOM OSMOD Six" is detected under "Nearby Devices", click “Connect”.

Pairing begins.



6) Pairing is complete when the status of “ELECOM OSMOD Six” changes to “Connected”.

The LED light will turn on for 3 seconds then turn off.



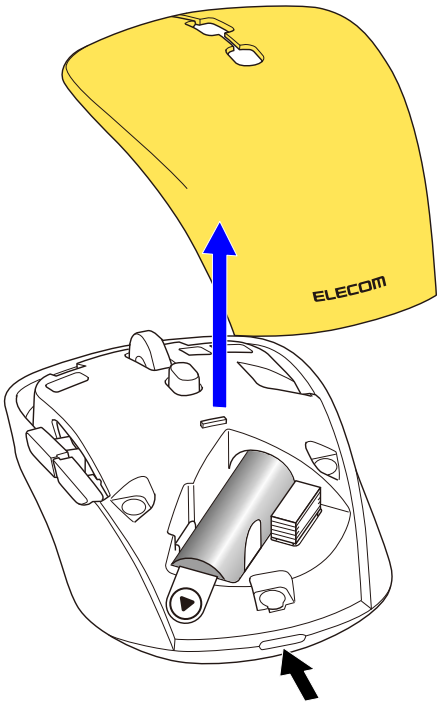
You can now use the mouse.

By downloading and installing the "ELECOM Mouse Assistant" from our company website, functions such as button assignment function and presentation mode can be used. Please proceed to “Install ELECOM Mouse Assistant”.

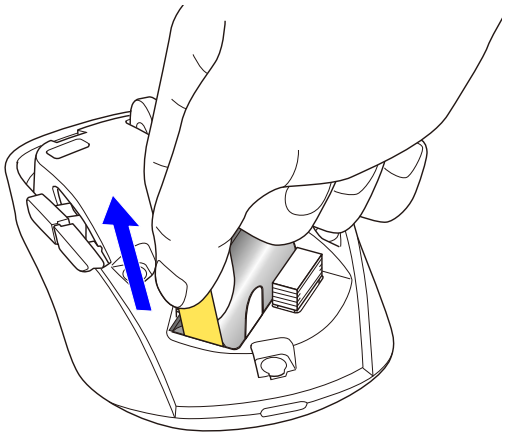
Using wireless connection

1. Remove the battery insulating tab.

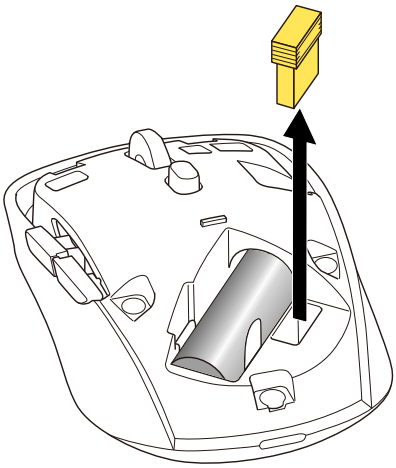
1) Remove the battery cover.



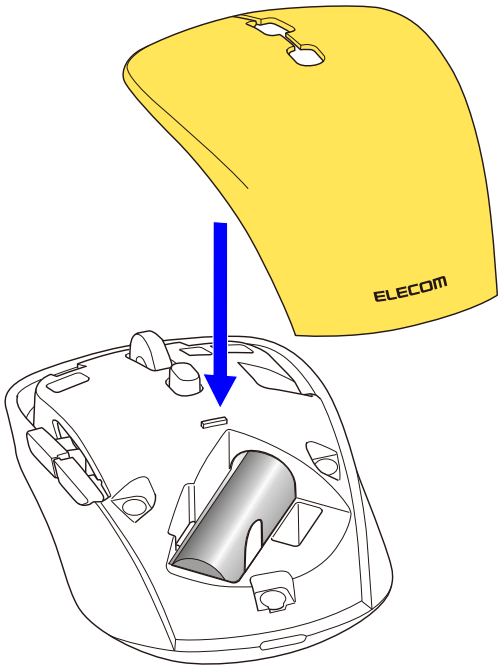
2) Remove the battery insulating tab.



3) Remove the receiver unit.



4) Put the battery cover back on.



Replacing the battery...

1) Remove the battery cover.

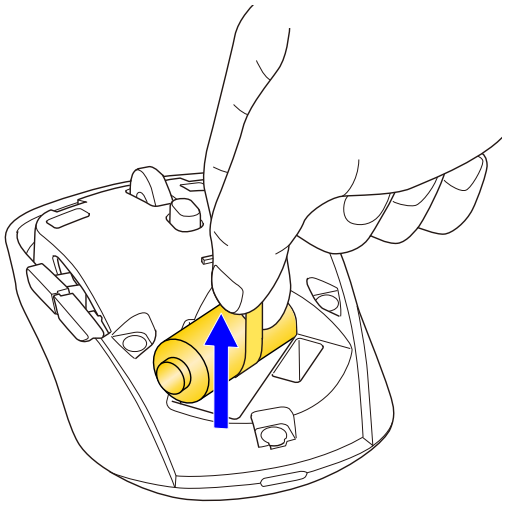
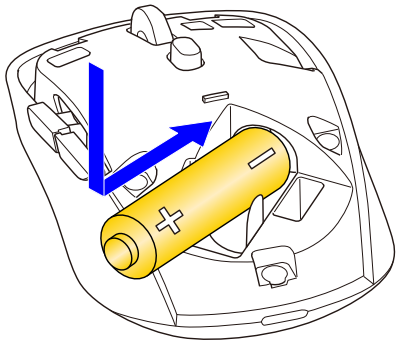
Pull the battery removal sheet to remove the battery.

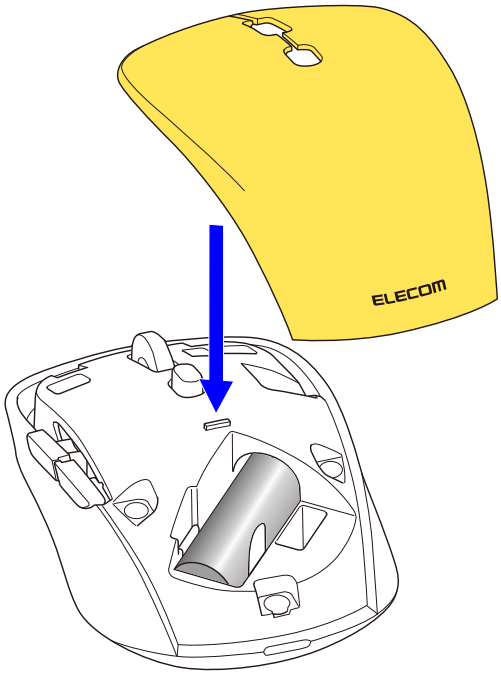


3) Insert the battery with the negative (-) side facing back.



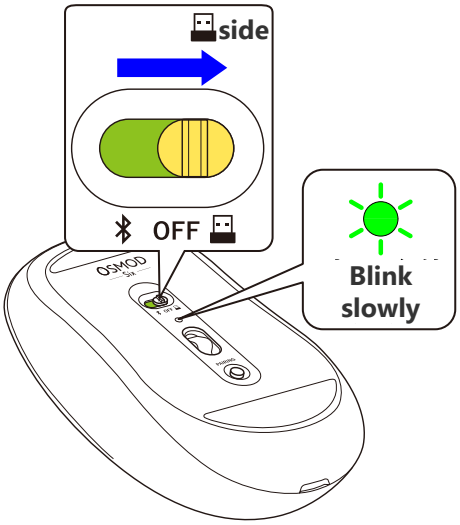
Ensure that the battery is inserted with the positive (+) and negative (-) terminals oriented correctly.

4) Put the battery cover back on.



2. Turn the power ON

1) Slide the power switch on the underside of the product to the position.



The LED light will blink green slowly.

* The LED will blink red for 5 seconds when the battery runs low.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

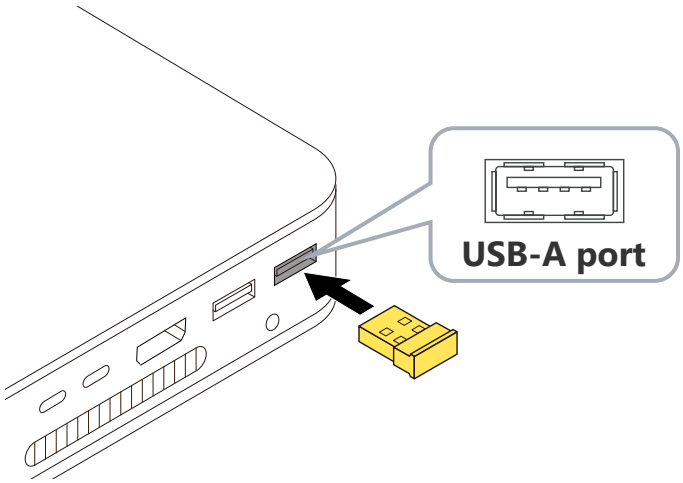
* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

3. Connect to a PC

1) Start up your PC.

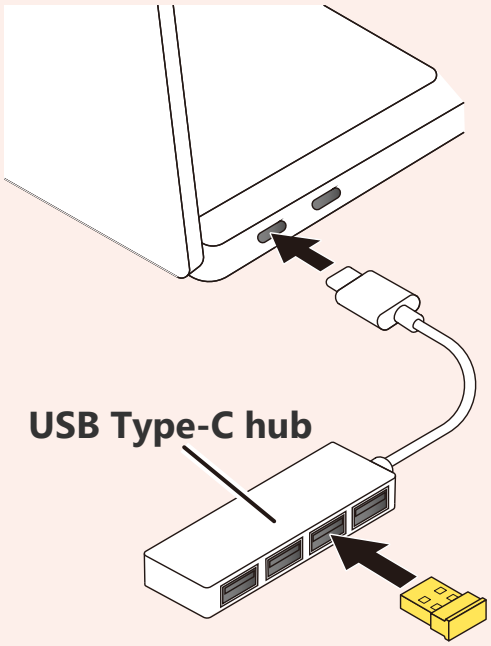
Please wait until the PC has started up and can be operated.

2) Insert the receiver unit into the PC's USB-A port.



You may use any USB-A port.

- For terminals that do not have a USB-A port, such as a MacBook, use the USB Type-C® hub.



- Ensure that the connector is correctly oriented to the port.
- If there is strong resistance when inserting, check the shape and orientation of the connector. Forcibly inserting the connector may damage the connector, and there is a risk of injury.
- Do not touch the terminal portion of the USB connector.

When removing the receiver unit

This product supports hot plugging. The receiver unit can be removed while the PC is on.

4) The driver will be automatically installed, and you will then be able to use the mouse.

You can now use the mouse.

By downloading and installing the "ELECOM Mouse Assistant" from our company website, functions such as button assignment function and presentation mode can be used. Please proceed to “Install ELECOM Mouse Assistant”.

Change the mouse pointer speed

Adjust the mouse pointer movement speed on your PC if the mouse pointer moves too fast or too slow.

1) Click “Mouse” under “System Settings”.

The “Mouse” settings page will load up.

2) Adjust the “Tracking speed” slider to adjust the speed of the mouse pointer.

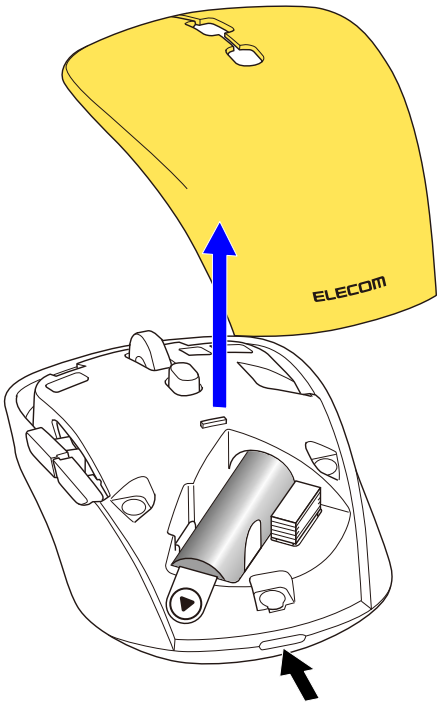
Unchecking “Natural scrolling” will cause the scroll direction to be reversed.

iPhone, iPad

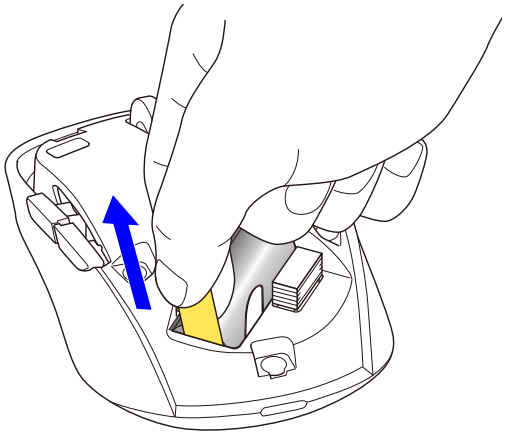
Using Bluetooth connection

1. Remove the battery insulating tab.

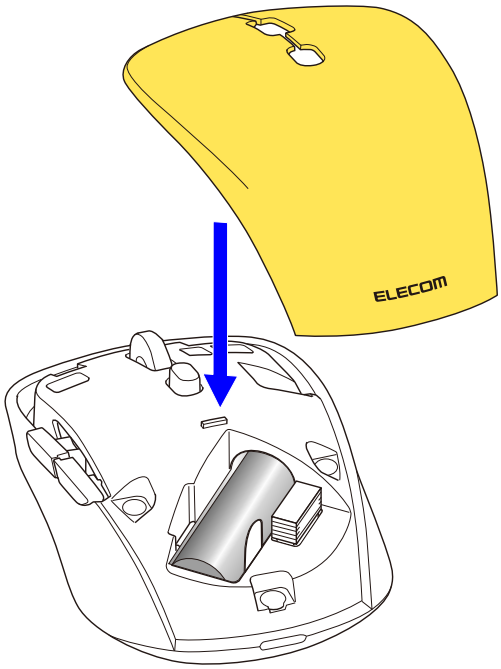
1) Remove the battery cover.



2) Remove the battery insulating tab.



3) Put the battery cover back on.



Replacing the battery...

1) Remove the battery cover.

* The LED will blink red for 5 seconds when the battery runs low.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

3. Pair with an iPad or an iPhone

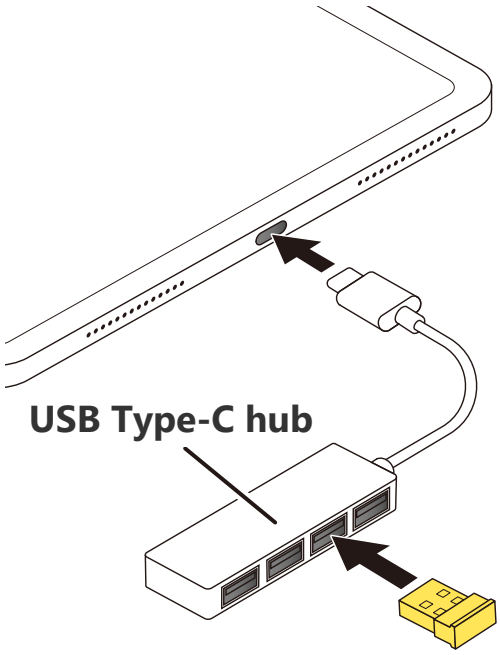
To connect this product to an iPad or iPhone, you need a device with a USB-A port, such as a commercially available USB Type-C hub. This product does not come with a USB Type-C hub.

1) Start up your iPad or iPhone

Please wait until the iPad or iPhone has started up and can be operated.

2) Connect a commercially available USB Type-C hub with a USB-A port to the USB Type-C port on your iPad or iPhone.

3) Insert the USB-A plug of the receiver unit into a USB-A port such as one on a USB Type-C hub.



You may use any USB-A port.

- Ensure that the connector is correctly oriented to the port.
- If there is strong resistance when inserting, check the shape and orientation of the connector. Forcibly inserting the connector may damage the connector, and there is a risk of injury.
- Do not touch the terminal portion of the USB connector.

When removing the receiver unit

This product supports hot plugging. The receiver unit can be removed while the PC is on.

4) The driver will be automatically installed, and you will then be able to use the mouse.

You can now use the mouse.

Register custom actions to the buttons.

Only the 2 buttons and the wheel can be used under the initial settings.

- Button 1: Single-Tap
- Button 2: Secondary Click

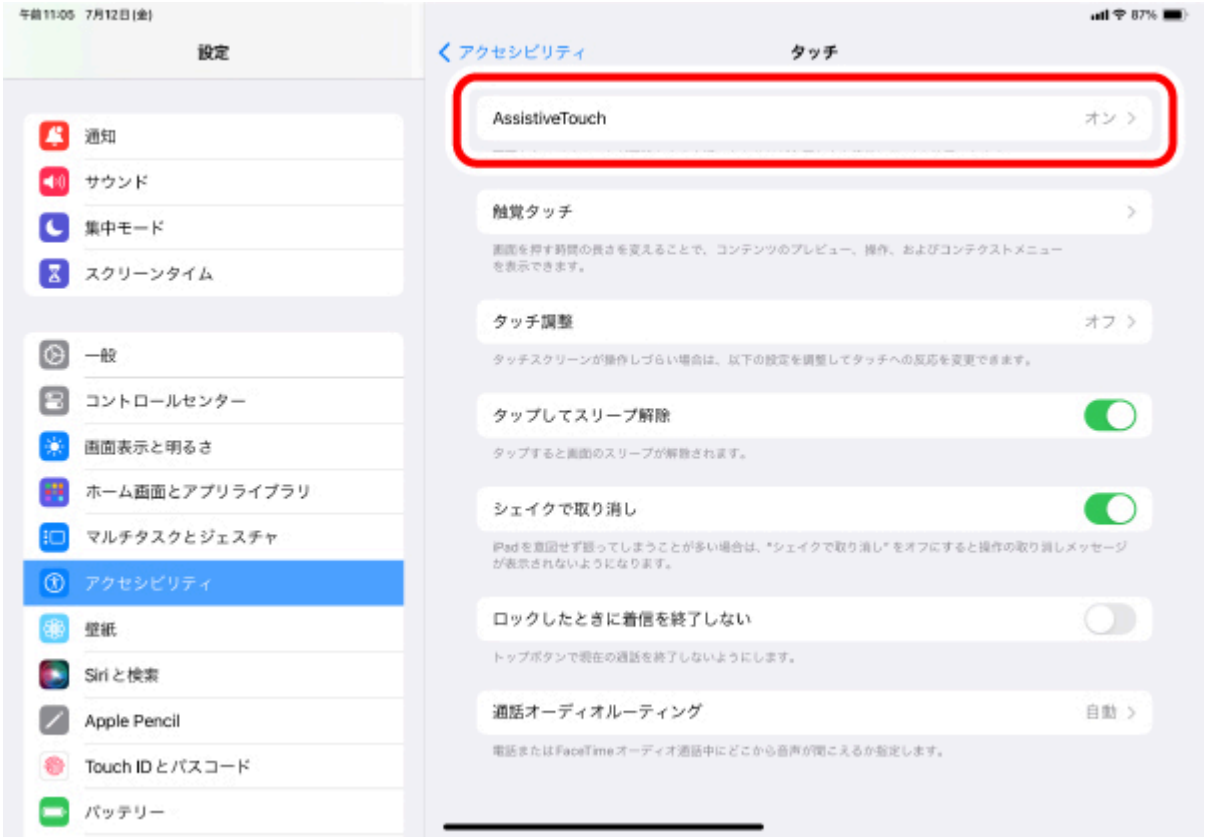
Follow the steps below to assign all other button functions.

1. Turn ON AssistiveTouch.

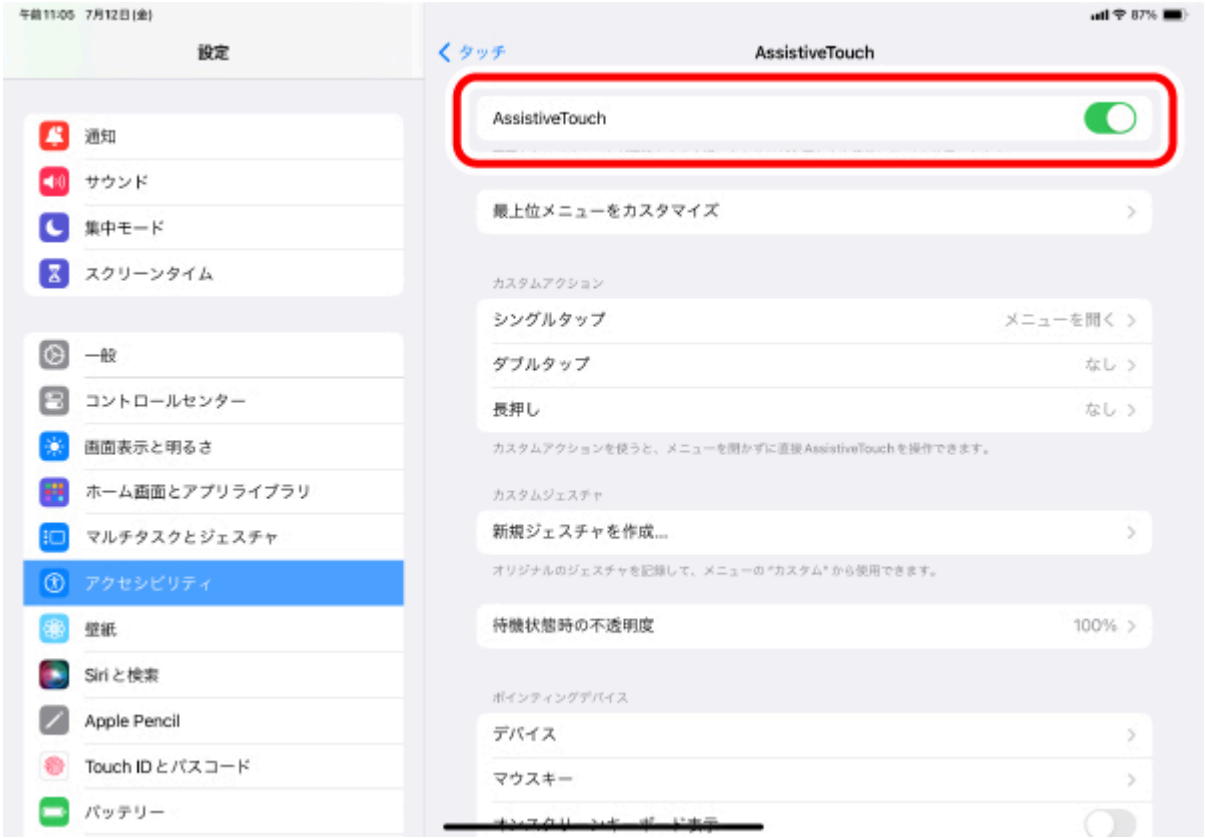
1) Tap on “Accessibility” under “Settings”.

2) Tap on “Touch”.

3) Tap on “AssistiveTouch”.

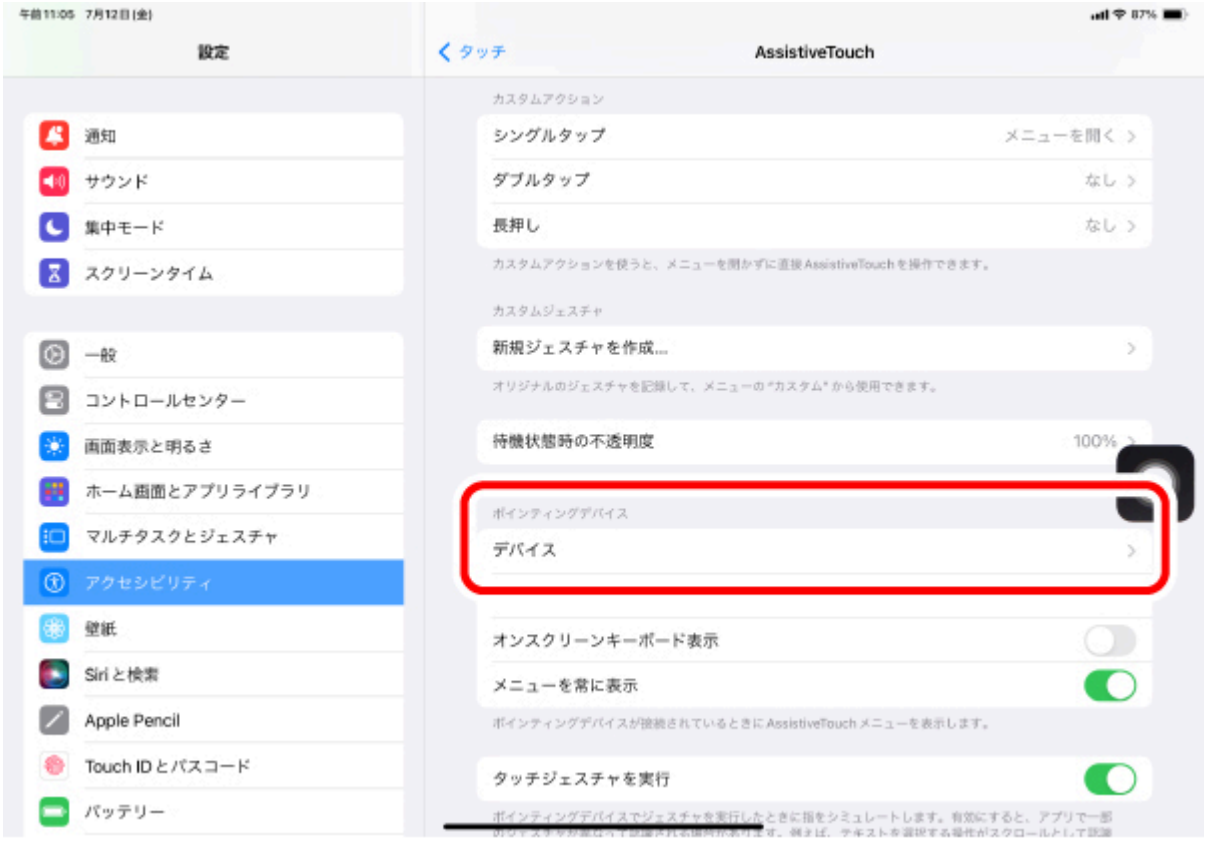


4) Tap on “AssistiveTouch” to turn ON.

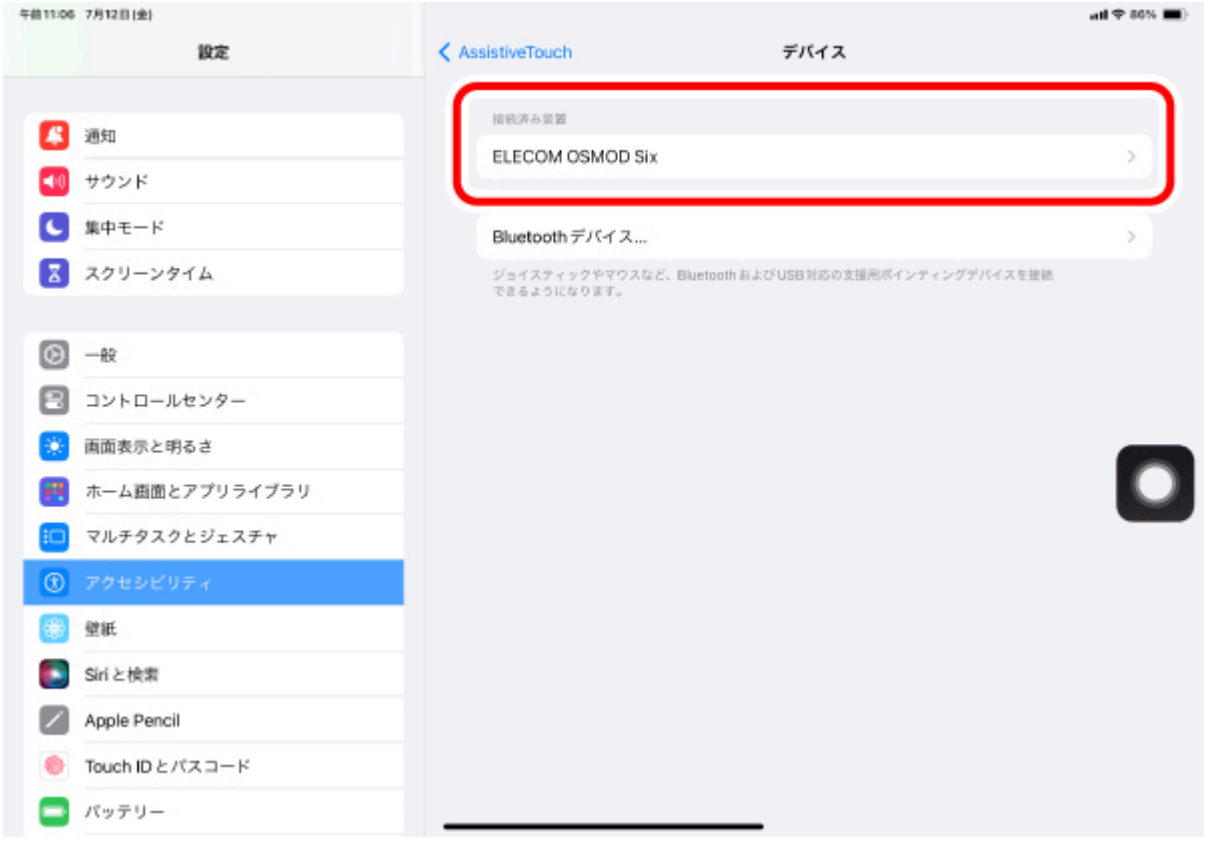


2. Assign custom actions to the buttons.

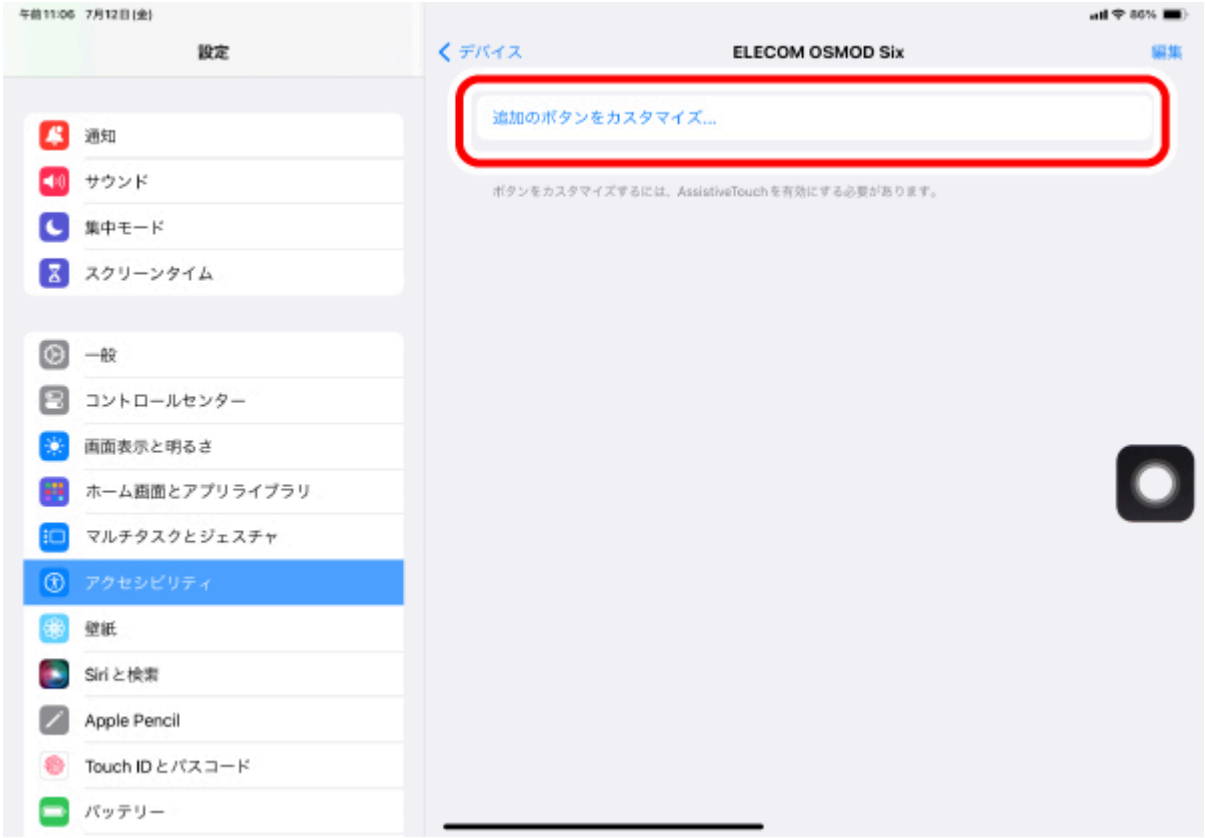
1) Tap on “Devices” under “POINTER DEVICES”.



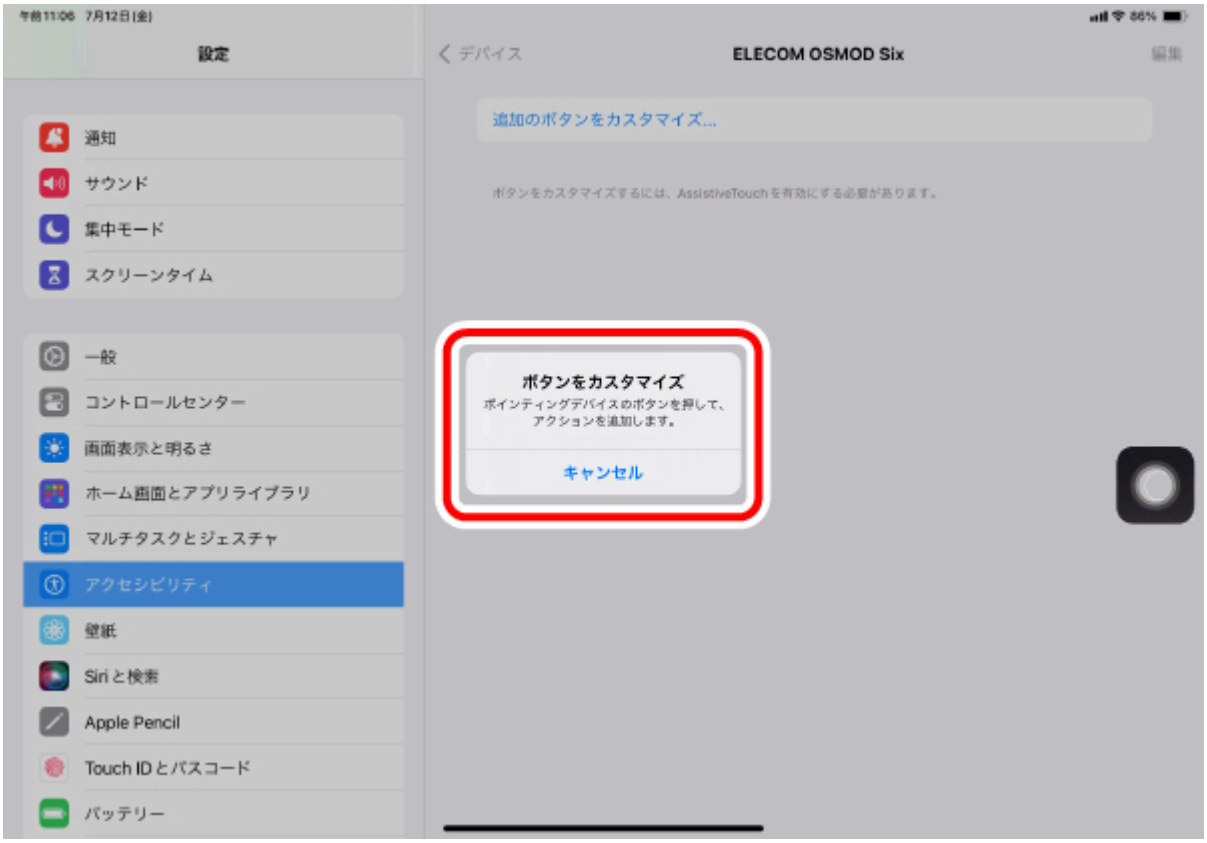
2) Tap on “ELECOM OSMOD Six”.



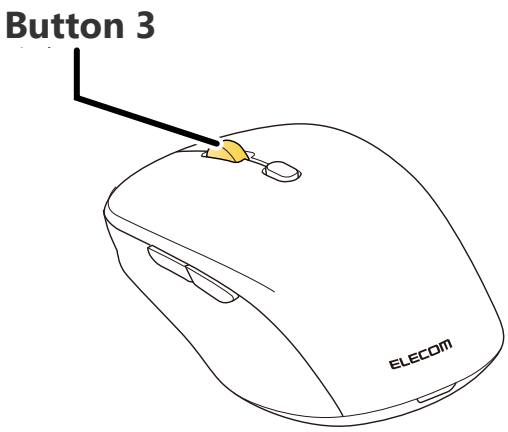
3) Tap on “Customize Additional Buttons...”.



4) When the “Customize Button” page loads, click on the button on this product that you would like to assign an action to.



* When adding an action to "Button 3"



5) A list of all assignable functions will load. Tap on the desired function to assign.

* When assigning “Screenshot” to “Button 3”.

6) A function is assigned to the button. To assign other buttons, repeat the steps above.

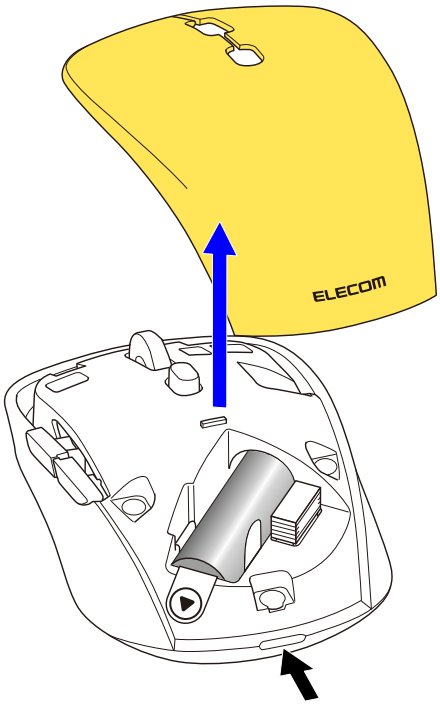
When AssistiveTouch is OFF, the Custom Action function is disabled and only the initial right click, left click and wheel scroll functions may be used.

Android

Using Bluetooth connection

1. Remove the battery insulating tab.

1) Remove the battery cover.



2) Remove the battery insulating tab.

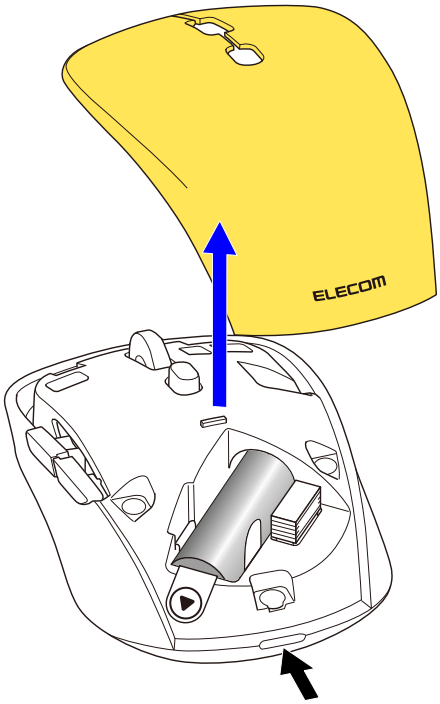
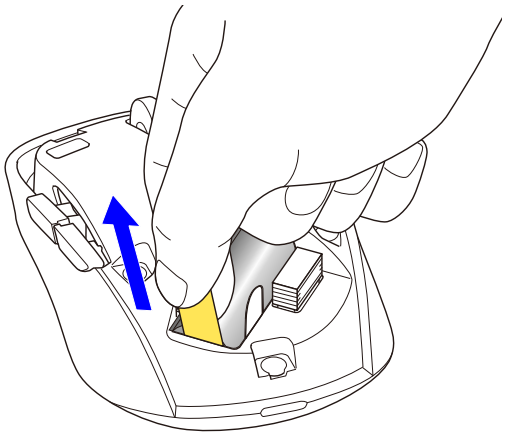
1. Remove the battery insulating tab.

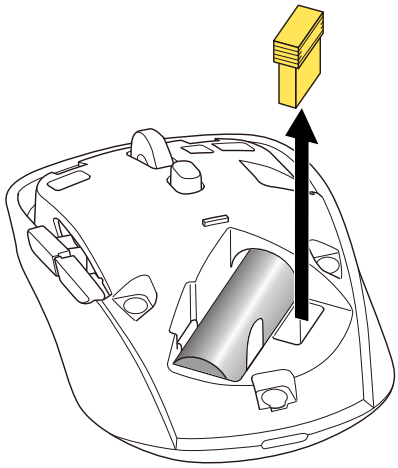
1) Remove the battery cover.



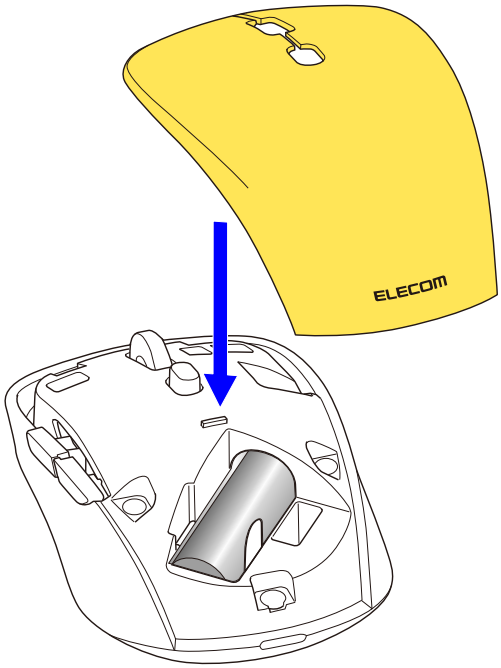
2) Remove the battery insulating tab.



3) Remove the receiver unit.

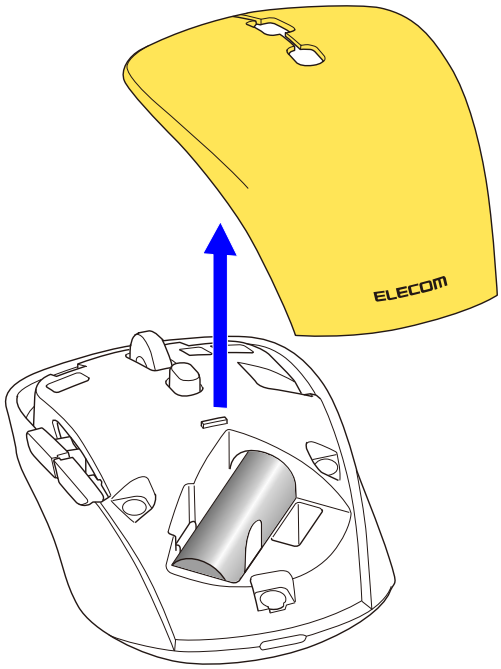


4) Put the battery cover back on.



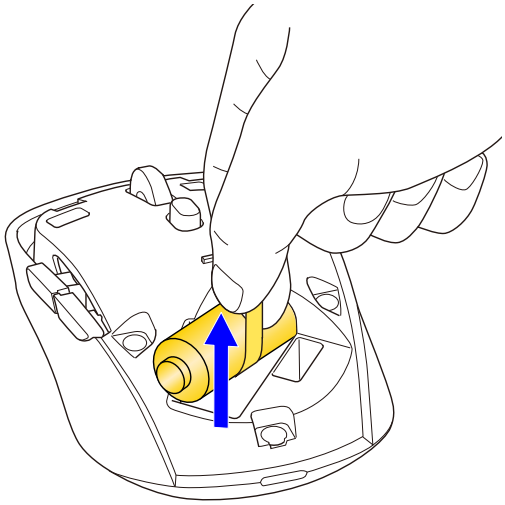
Replacing the battery...

1) Remove the battery cover.

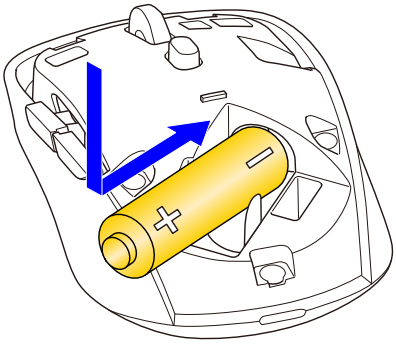


2) Remove the battery.

Pull the battery removal sheet to remove the battery.

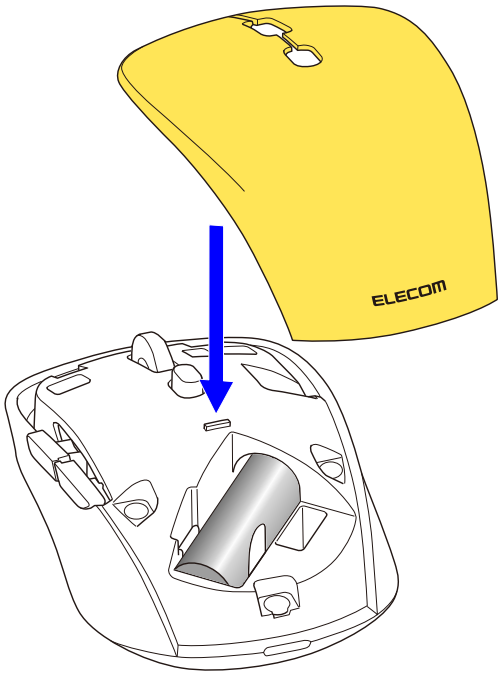


3) Insert the battery with the negative (-) side facing back.



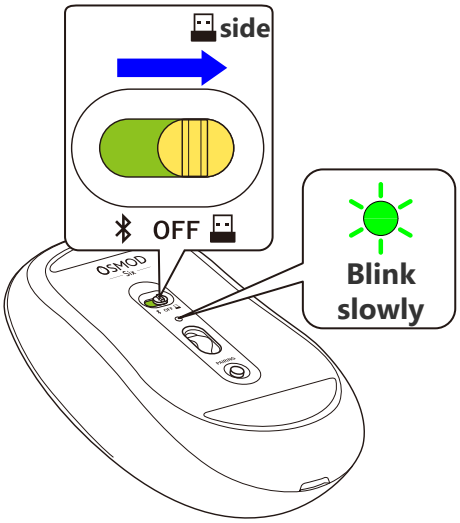
Ensure that the battery is inserted with the positive (+) and negative (-) terminals oriented correctly.

4) Put the battery cover back on.



2. Turn the power ON

1) Slide the power switch on the underside of the product to the position.



The LED light will blink green slowly.

* The LED will blink red for 5 seconds when the battery runs low.

Power-saving mode

When the mouse is left untouched for a fixed period of time while the power is ON, it automatically shifts to power-saving mode.

The mouse returns from power-saving mode when it is moved.

* Mouse operation may be unstable for 2-3 seconds after returning from the power-saving mode.

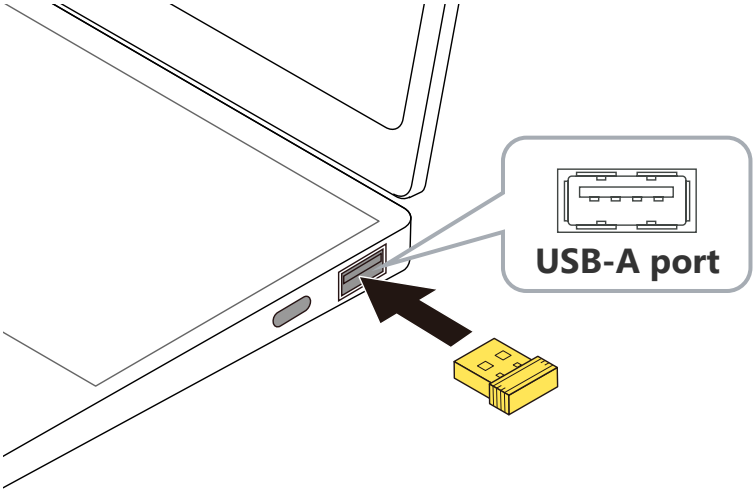
3. Connect to a PC

1) Start up your PC.

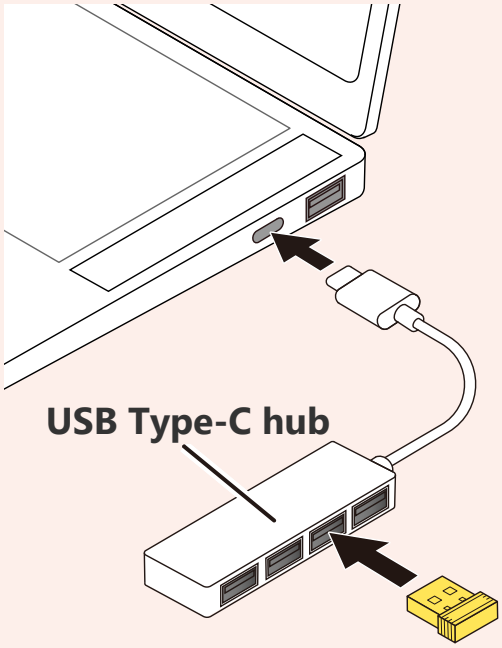
Please wait until the PC has started up and can be operated.

2) Insert the receiver unit into the PC's USB-A port.



You may use any USB-A port.

- For devices that do not have a USB-A port, please use a USB Type-C hub.



- Ensure that the connector is correctly oriented to the port.
- If there is strong resistance when inserting, check the shape and orientation of the connector. Forcibly inserting the connector may damage the connector, and there is a risk of injury.
- Do not touch the terminal portion of the USB connector.

When removing the receiver unit

This product supports hot plugging. The receiver unit can be removed while the PC is on.

3) The driver will be automatically installed, and you will then be able to use the mouse.

You can now use the mouse.

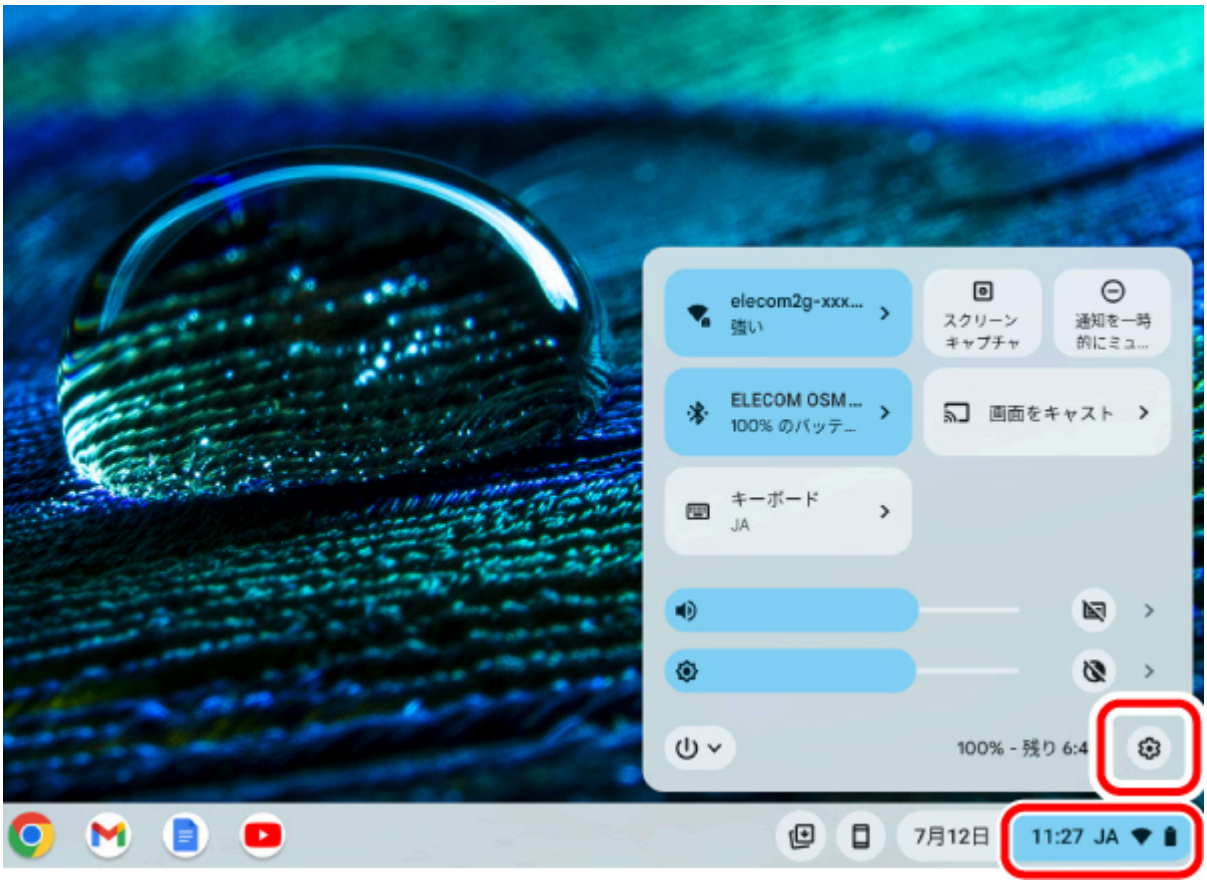
Change the mouse pointer speed

Adjust the mouse pointer movement speed on your PC if the mouse pointer moves too fast or too slow.

1) Click on the battery icon at the bottom right.

2) Click on (settings) on the Quick Settings panel.

The settings page will appear.



3) Click “Mouse” under “Device”.

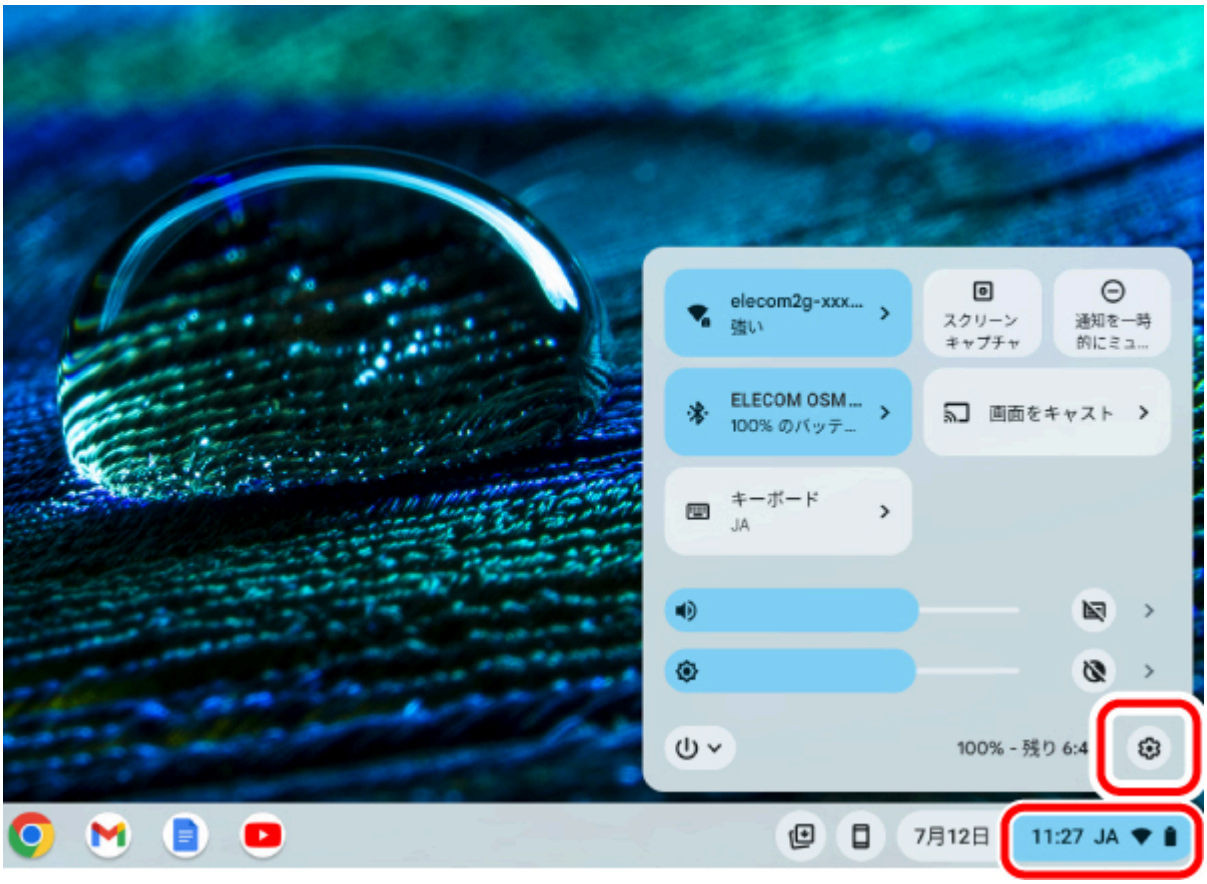
4) Adjust the speed of the mouse pointer using the "Cursor speed" slider of "ELECOM OSMOD Six".

Change the number of lines scrolled in one wheel turn

1) Click on the battery icon at the bottom right.

2) Click on (settings) on the Quick Settings panel.

The settings page will appear.



3) Click “Mouse” under “Device”.

4) If "Controlled scrolling" for "ELECOM OSMOD Six" is disabled, click to enable it.

5) Adjust the number of lines to be scrolled at a time using the slider for "Scrolling speed" under "ELECOM OSMOD Six".

Specifications

Connector type	Receiver unit: USB-A plug
Connection method	USB 2.4 GHz wireless / Bluetooth® wireless
Bluetooth standard	Bluetooth Low Energy Class2
Supported profiles	HOGP (HID Over GATT Profile)
Product Specifications	Windows OS, macOS, Chrome OS, Android, iOS and iPadOS-based devices that support Bluetooth® HOGP or USB-port equipped devices.
Supported OS	Windows 11/10, Android 14, macOS Sonoma 14, iOS 17/iPad OS 17, ChromeOS
Communication method	GFSK
Radio frequency	2.4 GHz
Radio wave range	Maximum length approximately 10 m/3.28 ft * May vary depending on the environment.
Connected device switching function	Supported (USB 2.4 GHz wireless: 1 / Bluetooth: 1)
Sensor type	Blue LED
Sensor Resolution	1000 DPI
Buttons	6 buttons *including wheel button
Number of wheels	1
Receiver unit storage compartment	Supported
Power source	Any AA alkaline battery, AA manganese battery, or AA nickel-metal hydride rechargeable battery × 1
Battery life	Maximum duration approximately XX months (estimated operating time when using alkaline battery) * May vary depending on the usage conditions.
Size category	M size

External dimensions (main unit)	Width approx. 65 × Length approx. 107 mm × Height approx. 38 mm / W 2.56 × L 4.22 × H 1.50 in.
External dimensions (receiver)	Width approx. 13 × Length approx. 19 mm × Height approx. 6 mm / W 0.52 × L 0.75 × H 0.24 in.
Weight (main unit)	Approximately XX g / approximately xx.x oz
Mass (receiver unit)	Approximately 2 g / 0.1 oz
What's Inside	1 mouse body, 1 receiver, 1 AA alkaline battery (for confirming operability)

FCC ID: YWO-MMY30
FCC ID: YWO-E01E

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE; This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

NOTICE: The manufacture is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. Such modifications could void the user's authority to operate the equipment.

In order to make improvements to this product, the design and specifications are subject to change without prior notice.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 0.5 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The antennas used for this transmitter must be installed to provide a separation distance of at least 0.5 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
