

TP-7

field tape recorder
user guide

TP-7 is an ultra-portable tape recorder, and the fourth release in our field system. with more features than first meets the eye, it's a most diverse audio device, in and outside the studio. this guide is written to take you on a tour of TP-7 to discover its functionality. note that updates are constantly made for this product and an up-to-date manual can be found [online](#).

- have a pleasant field trip!

field system

field system began as an idea to create a series of products that function as part of a whole. with aluminium casings and nylon bag accessories; every item is designed with portability, compatibility and durability in mind. as usual, we aim to pack in as much technology into as **little** space as possible, getting the most out of every device. more than just an engineering **challenge**, field system is driven by a desire to rethink the way we approach music making.

care

before getting started, make sure to carefully read these instructions. see the section at the end on warnings and warranty for more information. TP-7 is a **highly technical** and delicate product. make sure to learn how to properly operate, care for and store your device. take your time to register your unit here: teenage.engineering/register
