

Shanghai Aero-Sharp Electric Technologies Co.,Ltd

Add:6629 Zhongchun Rd.,Shanghai 201101,China

Dear TCB reviewers,

My product contains of two antenna ports, one for 2.4GHz ISM band and the other for 5.8GHz band in the future's designation.

Among this application, just the 2.4GHz ISM band is enabled while the 5.8GHz band is not opened to the modular user (such as OEM Integrators).

Among actual use, the antenna port J3 which is corresponding to the 5.8GHz band cannot emit any RF signal.

Sincerely yours,
