

Manufacturer control of unit once in the field:

The units that these modules are to be installed on, Quantum Storage Range(QTM070-QTM150). Quantum Water range(ECSD175-580), are not able to be modified by the end user. Only an approved installer can retrospectively add these modules to the products. Installers will receive training from a representative of the Dimplex North America team assisted by a member of staff from the group R&D facility. The units will also, in some cases, come with the modules installed during production of the appliance.
