Correspondence Number	Memo
Z4RT10-1	1) Please describe the type of modulation used by the device. Response: The EUT uses FSK modulation. 2) The external photos show a port on the back of the device that was not terminated during testing. Please explain why the port wasn't terminated during the testing. Response: The port is used for in house programming. When a connection is made the transmitter and receiver parts of the device are disabled.
