

Get started with omi

Learn more: omi.me

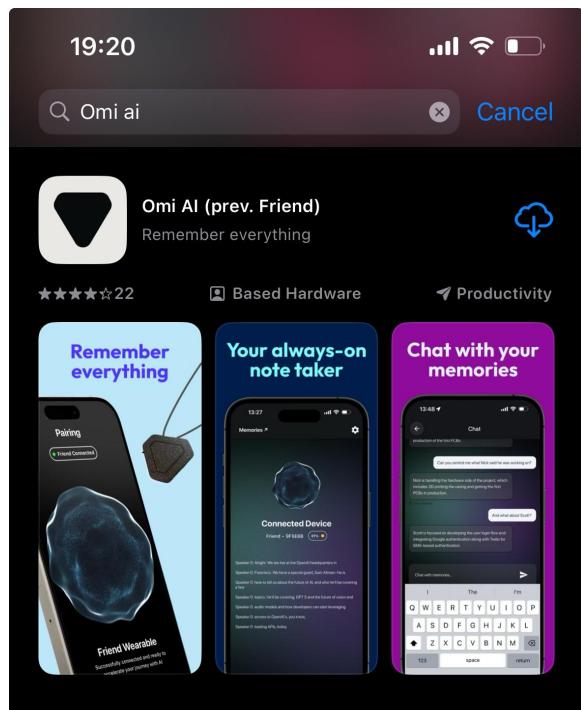

For disassembled version, read [assembly guide](#). For assembled, continue this guide:

1. Make sure the device is charged (when you switch on, there should be any light)

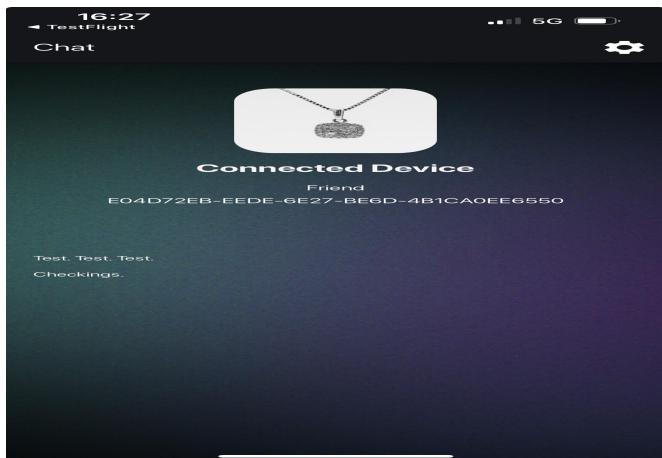

You can turn on the device either by a switch or by clicking the button in the center (depending on the version)

2. **Download the Omi App:** go to app store / play store and search “omi ai”

After downloading, follow the instructions in the app. You should be able to see transcriptions. If you don't see it right away, wait 30+ seconds

FAQ:

NEVER KILL THE APP: Once you activated the app, it should work on the background. you can "collapse" the app but if you kill/close it (remove the process) - it will stop transcribing and will disconnect

Charging: Friend device can only be charged when it's powered on. It will not be charging when powered off

If you have a dev kit 2 (with a small triangle button in the middle), and it doesn't work, try removing the enclosure, and re-insert the SD card

If you don't see any light, your device might not have firmware. Install it [here](#)

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
