Inquiry on 07/15/2014 :

Inquiry:

Dear FCC,

Good morning! I would like to consult our agreement that the FCC ID and FCC label information in the user manual.

Our client's product is a headphone with bluetooth. Since the the headphone is too small to put the model and FCC number and FCC statement on the product, we would like to ask FCC permission to allow to put the model number, FCC ID and FCC statement in user manual

The related product photos are attached for your reference.

If you have any queries, please feel free to ask me.

Best regards,

Wilson Loke/ACB

FCC response on 07/16/2014

The FCC Rules state the following: If the device is subject to Certification: (1) Section 2.925 contains information on identification of the equipment; (2) include a label bearing an FCC Identifier (FCC ID) (Section 2.926) and (3) include the appropriate compliance statement in Section 15.19(a). If the labeling area is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labeled with the FCC ID. If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of over crowded identification of other product and regulatory information. Please Note: Justification for placing the FCC ID in the manual must be submitted with the initial application for certification for review and approval. Accordingly, your request is acceptable.

This FCC Publication Revised July 11 2 014.
