

## Cambium Networks

December 17th, 2012

Product Name: PMP 450 AP/SM/BH

Product Description: Outdoor Point-to-multipoint Transceiver system

Attestation regarding Z8H89FT0001:

The PMP450 system consists of the following device types: Access Point /Subscriber Module / Backhaul. The PMP450SM is a Slave device and will not initiate transmissions until allowed by an approved FCC DFS Master Device. PMP450 radios are Fixed outdoor software defined radio configurable for channel bandwidth, RF channel center Frequency, and Modulation.

We, Cambium Networks, hereby state the PMP450 system which is a software defined radio currently operating only in the US frequency band 5725MHz to 5850MHz and are hereby requesting a class III permissive change to enable the UNII Band from 5470 MHz to 5600 MHz and 5650 MHz to 5725MHz.

We, attest that we have demonstrated compliance under 15.407 and wait for a grant of Authorization from the FCC as defined by a class III permissive change under Permit but Ask procedures.

Sincerely,

Steven M. Payne  
R.F. Principle Staff Engineer
