Subject: Request for Confidentiality

FCC ID : Z8H89FT0072

To Whom It May Concern,

Cambium Networks attests to the following outlined below:

1) Cambium official software version 6.5 and above restricts each internal radio from selecting the same frequency and ensures each radio cannot transmit simultaneously on the same frequency. When a frequency in one radio is selected it is not available in the other radio configuration.

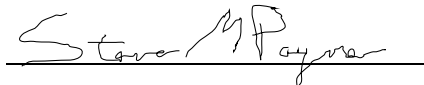

2) The certification data of each radio has been shown to meet the rules and not cause interference across the applicable spectrum in the filing from 5925MHz to 7125MHz. Therefore, to allow flexibility in customer deployments and technology coexistence, the electrically identical radios allow channels to be selected with at least 160MHz frequency spacing between the two channels selected.

Respectfully,
