

Our Shenzhen test laboratory could complete the tests and provide NII applications to Hong Kong on Apr-30.

Please find the below updated response.

- a) Explanation as to why this device was certified under §15.247:  
Requirements for digitally modulated 5725-5850 MHz device are still kept in the current §15.247 but §15.37(h) was overlooked by the test personnel/reviewer.
- b) Detailed description of how this device will be brought into compliance with the rules:
  - (i) Test laboratory will complete 15.407 tests and will provide the NII application to TCB for review on Apr-30.
  - (ii) TCB will complete the review on May-8. On the same day, TCB will request FCC to allow the previous DTS application into the audit mode and will then process the change to NII. After completion, TCB will notify FCC for final approval.
- c) (i) Detailed description of how this mistake was made:  
Requirements for digitally modulated 5725-5850 MHz device are still kept in the current §15.247 but §15.37(h) was overlooked by the test personnel/reviewer.
  - (ii) How it will be alleviated moving forward:  
Test personnel/Reviewer will be reminded to check §15.37 for all applications.
