RE: FCC Labeling requirements

To whom it may concern:

In accordance with FCC part 15, section 15.19 Labeling requirements, the FCC ID label may not be placed inside the battery compartment unless authorized by the FCC. In the current Guardtrax 2 design there is no area on the device that can accommodate this label. There is room under the battery cover, but the battery cover can easily be removed from the body of the device. Please arrange to request permission from the FCC to locate the label under the battery.

Please contact me if there is any information you may need

Sincerely,

**John Koch**
