

June, 4 2012

Federal Communications Commission  
C/O  
American Certification Body Inc.  
6731 Whittier Avenue, Suite C110  
McLean, Virginia 22101

To Whom it May Concern:

This letter is to attest that there have been no changes in software or hardware that would affect the RF output power of any of the transceivers on the Home Base that would cause any discrepancy between what is manufactured and what was tested by Professional Testing Inc.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas Kennedy", with a long horizontal stroke extending to the right.

Thomas Kennedy  
Director of Hardware Development  
EnergyHub Inc,
