## Cover Letter

The CC2541EM is a development tool for TI's 2.4 GHz CC2541 *Bluetooth® Low Energy* System-on-Chip. The board is equipped with a 2.4 GHz whip antenna. The board does not have any form of housing or cover.

The CC2541 chips come preprogrammed with Texas Instrument's BLE Stack ver. 1.1. The program allows two devices to communicate with each other. RF output power is set to 0 dBm in the preloaded software.

Texas Instruments Norway AS requests Nemko AS to do all necessary testing on the CC2541EM to be FCC certified according to FCC CRF 47 Part 15.247 for systems operating in the 2.4GHz ISM band.
