- To ensure proper use, please use our TYPE-C cable (included) or other fast charging TYPE-C cable.
- It is normal for the wireless charger and your smartphone to get hot under working conditions, especially when the phone is being charged and used at the same time (such as playing music).
- Not works with 5V/1A or lower input. (such as PC powered or USB port from socket).
- Remove the magnetic or metal accessories from the phone case when charging.

- When your wireless charging is not working properly
- Clean the clutter on the wireless charge.
 - Please make sure the wireless charging coil is correctly positioned with the phone coil.
 - When the wireless charger is overheating, keep your mobile device away from the wireless charger.
- Please wait for the wireless transmitter to cool down before trying to charge it.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
