

RF Exposure Statement

1. Standard Applicable

According to 1.1307 (b)(1), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a portable device.

2. Measurement Result:

This is a portable device and the max average output power is 10.45 dBm (11.09mW).

The antenna gain of the device is 2dBi

The EIRP of the device is $10.45+2=12.45\text{dBm}=17.5792\text{mW}$

Lower than the low threshold $60/\text{f GHz} = (24.37 \text{ mW})$

The SAR/MPE measurement is not necessary.
