Subject: Bohua BH034 Antenna Justification
FCC ID: ZDSMM516

Gentlemen:

The MM516 Bluetooth was originally tested for use with the Pulse W3108 helical antenna or the Pulse W1038 6.6" whip antenna. We would like the module to also be authorized to use the Bohua 3" whip antenna. This antenna is the same type as the Pulse W1038 antenna, except that it is both smaller and only has 2.5dBi of gain instead of the 4.9dBi of the tested antenna.

Sincerely,

A handwritten signature in dark ink, appearing to read "Julie Hining", is written over the typed name.
