Re: FCC ID No. ZEF-0610, Long-Term Confidential Treatment

To Whom It May Concern:

In accordance with Sections 0.457 and 0.459 of the Commission's Rules, 47 C.F.R. §§ 0.457, 0.459 (2005), Maywood LLC and its affiliated companies ("Maywood") request that the application for equipment authorization under FCC ID No. ZEF-0610, as well as the following exhibits, be withheld from public disclosure:

Block Diagram;
Schematics;
Parts List;
Tune-Up Procedure; and
Operational Description.

Maywood provides the following in support of this request:

1. *Identification of the specific information for which confidential treatment is sought:*

Maywood seeks confidentiality for the materials identified above (the "Confidential Materials"). These exhibits have been separated from the non-confidential portions of the application.

2. *Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:*

The proceeding is Maywood's application for equipment authorization under FCC ID No. ZEF-0610.

3. *Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged:*

The Confidential Materials contain highly confidential information of Maywood, including circuit diagrams and other key product and technical details normally kept confidential by Maywood.

4. *Explanation of the degree to which the information concerns a service that is subject to competition:*

The Confidential Materials are used in the design and manufacture of radio communications equipment used by consumers in commercial mobile radio services equipment that is offered on a highly competitive basis.

5. *Explanation of how disclosure of the information could result in substantial competitive harm:*

Disclosure of the Confidential Materials would give away the fruits of the labors of Maywood's engineering personnel in the development of the equipment covered by this application. Disclosure would also offer competitors of Maywood unwarranted insight into the state of product development and manufacturing of Maywood, thereby allowing such competitors an advantage that would not be available to Maywood.

6. *Identification of any measures taken by the submitting party to prevent unauthorized disclosure:*

The Confidential Materials are kept confidential by Maywood and not made available to third parties except pursuant to non-disclosure agreements.

7. *Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties:*

To the knowledge of those preparing the application referenced in this letter, the Confidential Materials have not been disclosed publicly heretofore by Maywood. The protection sought is narrowly drawn and pertains to certain specific implementations of the mobile radio technology described in the application.

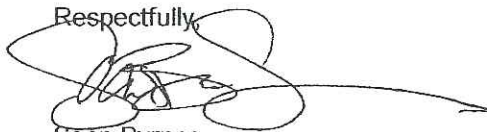

8. *Justification of the period during which the submitting party asserts that material should not be available for public disclosure:*

The Confidential Materials should be kept confidential indefinitely. The equipment is a commercial product that will be offered for sale to the public. Even when improvements in design are made, disclosure of the original design information would lead to insights into both design and manufacturing techniques and could have an adverse competitive effect for many years to come. As such, it is important that the internal design details not be made available to unauthorized persons who might attempt to use knowledge of the design to compromise the applications for which the equipment will be employed or to compete unjustly in the production of similar equipment.

9. *Any other information that the party seeking confidential treatment believes may be useful in assessing whether its request for confidentiality should be granted:*

See above.

Respectfully,

A handwritten signature in black ink, appearing to read 'Sean Byrnes', with a long horizontal line extending to the right.
