Problems	Reasons	Solutions
Running Problems	The battery inside the radio controller is too weak.	Replace with new alkaline batteries.
	There is a weak or low reception to the radio controls.	
	The batteries inside the vehicle are too weak.	Replace with new batteries inside the vehicle.
Operating Problems	A small object obstructs movement of the tire of axle.	Use tweezers to remove obstruction.
	The ATV was driven on the carpet and has fabric threads caught in the axle.	Playing on the carpet is not recommended.
Other	The vehicle does not respond to the radio control.	Try playing at another location.
	The radio control's frequency is disrupted by something around the environment.	Some other equipment using the same radio wave could disrupt the radio control. Either play in another location or turn off the other equipment. If you are planning to race your vehicles with another friend, purchase vehicles with two different frequencies (49 MHz and 27 MHz) to avoid disruption.

FCC NOTE:

The antenna provided is a unique antenna. By installation of unauthorized antenna to this equipment, such unauthorized installation could void the user's authority to operate the equipment.

PLEASE NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- · Consult the dealer or an experienced radio/TV technician for help.
