

External Photo Housing

From: William (Bill) Stumpf (DLS1250) <mailto:JSTUMPF@DLSEMC.COM>; BSTUMPF@DLSEMC.COM; AALGER@DLSEMC.COM

The CT-11 is manufactured in the clear epoxy as seen in the external photos. The entire "button" is then dropped into the "housing", which attaches to a strap to be worn on the wrist or ankle. This assembly is performed by the end user. The straps are an accessory to the CT-11. Photos have been uploaded to include as an additional External Photos exhibit, if needed.
