

The “HaiJie”electronic energy instructions

FCC ID: ZGGYPZ120182U

Model: YPZ 220/18-2U.RR.D-F

This device complies with Part 18 of the FCC Rules. Operation is Subject to the conditions that this device does not cause harmful Interference.

This product may cause interference to radio equipment and should not be installed near maritime safety communications equipment or other critical navigation or communication equipment operating between 0.45–30 MHz.

Advanced Card Systems Limited

First ,Application:

Electronic energy is the use of the brand energy-saving lamps electronic ballast made of technology, "since ZhenLiu fluorescent lamp", is a new type of energy-saving lighting source, can be easily replace incandescent lamp, widely used in the family, restaurant, hotel, restaurant, shopping malls and similar cases lighting.

Second, Features:

Green lighting products, energy efficiency rating for level 2, with the advanced precision electronic components, lightsome and design, a open that is light, the light can be no flash, in the same lighting effect power consumption is only about 20% of incandescent lamp, life is incandescent light bulb 5-8 times, the light is downy, favorable visual, use it directly. As a saving electricity and promoting the green lighting project, since ZhenLiu fluorescent lamp is a kind of ideal lighting source.

Third, Tips :

1, The use of voltage range, can be in 180 V-250 V ac voltage, frequency frequency 50 Hz / 60 Hz.

2, Not be installed in the rain, and wet places, not used for dimmer circuit.

3, Shall not apply to closed type lamps and lanterns.

4, When installation is plastic parts it, be careful tubes and broken, not allowed to tear open outfit repair, in case of an accident.

5, Installation, when wiping, should first cut off power supply.

Our company has passed the ISO9001 quality management system certification
