Dear Sir :

Regarding subject project referenced,

The Apple iPhone4 while installed in the receiver, with or without the protection ring, will be reviewed for SAR and EMC compliant to prove that iPhone4 remains compliant with the SAR and EMC requirements.

We attest that marketing of the LSWC-TBW20-Q (LS Wireless Charger) and printing of the user manual will be on hold until the use of the receiver, with or without the protecting ring, with the phone during the phone's normal use has been reviewed with respect to compliance of the phone with SAR and EMC requirements.

Sincerely,

---

Section Chief  
LS Cable & System Ltd.
