

Technical Description

Description	Function	Component
315MHZ Receive module	The radio frequency signal receives and processes	IC101 Y1
CPU	The function signal decodes	U101
Lamp Power	The ON/OFF function of lamp controls	T101
CPU	The fan function controls	U1
The high voltage controls	High voltage control and drive motor	U3,Q3-Q5,Q7-Q9
Feedback electric circuit	current feedback circuit	U5

Antenna Used:

An integral antenna has been used.
