S201 Remote Control Manual

Features:

Working Voltage: DC12V (1pc 27A/12V)
Working Current: 10ma/12V
Power: 10mw/12V
Modulation Mode: ASK(Amplitude Modulation)
Emissive Frequency: 433MHZ
Transmission Distance: >100M
Size: 58×30×12mm
Code type: fixed code Serial Code
Usage: Motor, Car, home security alarm, short-distance remote control products, Industrial control products and other similar products.

Operation:

- Alarm mode: when press this button, it means Alarm on.
- Chime mode: when press this button, it means Chime on.
- Off: to disalarm the unit no matter what Alarm or Chime is available.

FCC information:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
