Attention: Director of Certification

**RE: Analysis of RF Exposure for Portable and Mobile use per KDB 447498 D01 Mobile Portable RF Exposure v06.**

FCC ID: ZKCPP-4018-6028

***Portable exposure SAR Exemption Calculation using a separation distance of 5 mm:***

As per Clause 4.3.1.1 of KDB 447498 D01 v06:

$$\left( \frac{\text{max.power of channel,including tune-up tolerance,mW}}{\text{min.test separation distance,mm}} \right) \times (\sqrt{f \text{ (GHz)}}) \leq 3.0$$

$$\left( \frac{0.00220862 \text{ mW}}{5 \text{ mm}} \right) \times (\sqrt{0.01356 \text{ (GHz)}}) \leq 3.0$$

$$5.144\text{e-}5 < 3.0 \text{ (complies)}$$

The above calculation is based on time-averaged maximum radiated output power of 0.00220862 mW which was calculated from the maximum measured emissions field strength of 68.67 dBuV/m @ 3 meters.

Sincerely,
