

A photograph showing two disassembled mobile phone casings, likely for a Nokia 1110, placed on a blue textured surface. A black ruler with white markings is positioned above the casings, showing measurements in centimeters and millimeters. The ruler also features the 'BOSI TOOLS' logo and the model number 'BS181360'. The casing on the left is the front cover, showing a white label with text including 'Model: 1110', 'Capacity: 1000mAh', and 'Voltage: 3.7V'. The casing on the right is the back cover, showing internal components like the battery compartment and a small metal contact. The casings are black and appear to be made of plastic.
