To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for a 15.247 frequency hopping spread spectrum radio pursuant to Subpart 15 of the FCC's rules.

The device has a permanently attached antenna (refer to details in the Operational Description) and is exempt from the technical requirements for digital devices as it is used exclusively in vehicles (aircraft). Testing has been performed in accordance with the FCC's requirements for transmitters operating under 15.247 of the rules and for receiver spurious emissions as detailed in 15.109. As the device is powered from internal batteries or the aircraft battery no AC conducted emissions tests were performed.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Briggs
Staff Engineer
