FCC Laboratory
7435 Oakland Mills Rd
Columbia MD 21046

SUBJECT: Class II Permissive Change for FCC ID: **ZMOL860GL16L**

The intention of this application is to enable the modular FCC ID: **ZMOL860GL16L**, granted on **09/16/2021** to be integrated in **Lenovo Notebook Computer, TP00123B**. Excepting listing above, the others remain unchanged from original.

The module installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: **ZMOL860GL16L** was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna with lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

Sincerely yours,

Lucy Liu
